General Comment

I was aghast to learn of this "self certification" proposal for on-site, in-progress testing of nuclear fuel alternatives.

Perhaps not shockingly, it comes in tandem with reports that the Department of Energy seeks to inhibit the Nuclear Safety Board's oversight of the national labs. (Ref: <https://propublica.org/article/nuclear-safety-board-information-access-trump-administration>.)

I am in accord with the critique submitted on behalf of the Union of Concerned Scientists on June 27: <http://static1.1.sqspcdn.com/static/f/356082/27941846/1530806329357/7+2+18+20180627-ucs-comments-draft-nrc-nei-letter-re-lta.pdf>
