## General Comment

To Whom It May Concern:

I am extremely disturbed to read of the proposal to deregulate the NRC to the point of allowing the nuclear industry to regulate its own fuel tests and put all of the safeguards the NRC has had in place for many years in jeopardy. We are talking about the safety of the American People! These safeguards were put in place for a reason - to protect us and protect our health and well-being. This "plan" may save companies money, but at what cost? To relax these protocols is to make us all unsafe. I oppose unreviewed and unapproved fuel tests in nuclear power plants in our communities.
