General Comment

The clarification letter and its predecessor dated June 29, 2017, both improperly mischaracterize the intent of Technical Specification 4.2.1 which was created explicitly for fuel reconstitution. The proposed clarifications ignore the Regulatory history of amendments associated with Generic Letter 90-01, Supplement 1. The proposed regulatory path described in the clarification letter constitute a industry-wide amendments to TS 4.2.1 and exemptions to 10 CRF 50.59 and 10CFR 50.46 without opportunity for the public to request hearings for amendments or to litigate exemptions. I object to all positions in the clarification letter. All licensing actions must be supported by NRC-approved codes and methods.
