Dear Mr. Moul:

By letter dated July 30, 2018 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML18179A467), the U.S. Nuclear Regulatory Commission (NRC) issued Amendment No. 303 and Amendment No. 192 to Renewed Facility Operating License No. DPR-66 and NPF-73 for the Beaver Valley Power Station, Unit Nos. 1 and 2, respectively, Amendment No. 298 to Renewed Facility Operating License No. NPF-3 for the Davis-Besse Nuclear Power Station, Unit No. 1; and Amendment No. 182 to Facility Operating License No. NPF-58 for the Perry Nuclear Power Plant, Unit No. 1. The amendments were in response to your application dated August 11, 2017.

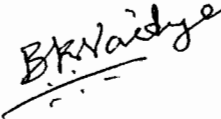

The amendments revised and clarified the technical specification usage rules for completion times, limiting conditions for operation, and surveillance requirements, based on Technical Specification Task Force (TSTF) Traveler TSTF-529, "Clarify Use and Application Rules," Revision 4.

The NRC staff has noted that inadvertently, in paragraph 2 for the Amendment No. 182 to Facility Operating License No. NPF-58 for the Perry Nuclear Power Plant, Unit No. 1, the license number was stated as "DPR-58" instead of "NPF-58."

The corrected Amendment No. 182 for Perry Nuclear Power Plant, Unit 1, is enclosed.

We apologize for the inconvenience this may have caused.

Sincerely,

A handwritten signature in black ink, appearing to read "B.Vaidya", with a horizontal line drawn underneath it.
