General Comment

The attached document contains signatures from 3,774 individuals with the following message:

Dear Nuclear Regulatory Commission:

I urge you to reject the application from Holtec International to build an interim storage facility for spent nuclear waste in Southern New Mexico.

Although Holtec claims a perfect storage record, they can never guarantee safe transport of radioactive materials traveling thousands of miles by rail through numerous communities. An accident involving just one of the nuclear waste rods could contaminate a nearly 50-square mile area, putting our most vital resources at serious risk. Accidental leaks or spills have the potential to cause devastating harm in the form of birth defects, cancers, radiation poisoning, and even death.

Because there are no plans for permanent future disposal, it makes no sense to shuffle this dangerous commodity through dozens of communities across thousands of miles.

We do not consent to putting our lands, aquifers, air, or people at risk of contamination. You must reject this application to protect our public health and environment from irreparable harm.

Signed,
