August 19, 1976

Donald C. Cook Nuclear Plant Unit No. 1
Docket No. 50-315
DPR No. 58

Mr. Benard Rusche, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

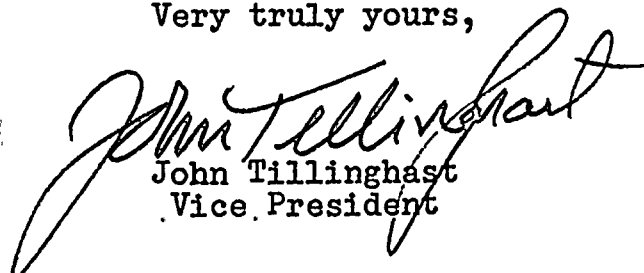

Dear Mr. Rusche:

This letter is in response to Mr. Dennis L. Ziemann's letter dated July 19, 1976 which was received July 23, 1976, and which requested a determination of whether our containment leakage testing is in full compliance with 10 CFR Part 50, Appendix J.

This determination was performed at the time of the technical specifications review. The conclusion, as stated in the Donald C. Cook Nuclear Plant Unit No. 1 Appendix "A" Technical Specifications Bases defining the Limiting Condition For Operation (3/4.6.1.2), was that "The surveillance testing for measuring leakage rates are consistent with the requirements of Appendix J of 10 CFR 50."

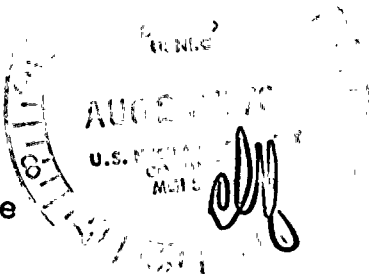

The only exception in the Appendix "A" Technical Specifications is a footnote to Surveillance Requirement 4.6.1.3b (involving the containment air lock), which states that there is an "Exemption to Appendix J of 10 CFR 50." This exemption was granted by the NRC in Amendment 12 to the Facility Operating License effective March 30, 1976.

Very truly yours,

John Tillingshast
Vice President
