Docket No. 50-315

Dear Mr. Keppler:

This is to confirm our verbal report to NRC RO: III Inspector, Mr. K.R. Baker, of April 22, 1976. At that time we reported that auxiliary feed water valve FM0-211 was found to be installed with flow in the wrong direction.

A review of the consequences of this condition indicated that there were no adverse effects to the public health and safety.

We are continuing our investigation and will submit a formal report by May 6, 1976, as required by Nuclear Regulatory Commission Regulatory Guide 1.16, Revision 4, Section 2.a.

Sincerely,

R.W. Jurgensen
Plant Manager
