INDIANA & MICHIGAN ELECTRIC COMPANY

P. O. BOX 18
BOWLING GREEN STATION
NEW YORK, N. Y. 10004

January 25, 1978

Mr. Edson G. Case, Acting Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Case:

On September 23, 1977, Indiana & Michigan Power Company submitted its Modified Amended Security Plan for the Donald C. Cook Nuclear Plant to the NRC in fulfillment of the requirements of 10 CFR 73.55.

Prior to this submittal, we hired a security consultant to write technical specifications for the equipment described in the plan, and formed an AEPSC security task force to review, revise, and approve the specifications. On October 14, 1977 we requested bids from equipment vendors qualified by our consultant. By November 30th, bids had been received and immediately reviewed and evaluated by our task force and consultants. When we were close to selecting a vendor, we informed the NRC staff by telephone on December 7, 1977 of our above described actions.

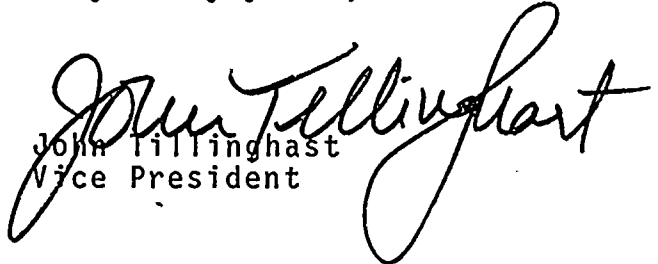

We have not yet received the NRC staff's evaluation of our Modified Amended Security Plan. Nevertheless, we are proceeding to place orders and install the necessary equipment as described in our Plan in order to meet the NRC's date of August 24, 1978. We do not believe that work can be delayed if we are to meet that implementation date. On December 22, 1977 we awarded a contract to the S. M. Stoller Corporation for an integrated security and radiation exposure and maintenance access control system.

780320002

January 25, 1978

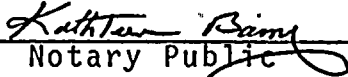

In order to meet the implementation date and in the absence of NRC staff comments, we are compelled to continue with our course of action for contractual commitments based on the equipment requirements of our Modified Amended Security Plan.

Very truly yours,

John Tillinghast
Vice President
