Non-Profit Association

SUBJECT: RECEIPT OF YOUR AUGUST 15 VOICEMAIL

Dear Mr. Comley:

I writing to acknowledge receipt of your voicemail from earlier today, August 15, 2018. I will be out of the Region I office until later this month and will be unavailable for a telephone call.

As this office has informed you in previous correspondence and communications, FEMA and the States have jurisdiction over offsite emergency preparedness involving commercial nuclear power plants. FEMA is the authority that must validate your assertions with the adequacy of emergency evacuation capability in the emergency planning zone around Seabrook Station. Therefore, it would be best for you to share your concerns regarding offsite emergency preparedness directly with FEMA Region I representatives.

If you have new issues that you have not previously communicated to the NRC, I request that you submit the issues in writing via electronic mail. Written communications help us ensure that the public record reflects your issues exactly as you communicate them to us and helps prevent misunderstandings. If your written correspondence provides new information regarding Seabrook Station, or other NRC licensees' activity, we will review the information and take appropriate action as it pertains to safety and security.

Sincerely,

Fred Bower, Chief
Reactor Projects Branch 3
Division of Reactor Projects
