Subject: [External_Sender] Lost Creek KPW2 Excursion Notice SUA-1598

An excursion according to the NRC criteria (i.e. well specific UCLs) has been confirmed for well KPW2 at the Lost Creek ISR Project (SUA-1598). The well is completed in the underlying KM horizon and therefore pursuant to LC 10.10 injection in the area will be shut off. Monitoring of KPW2 will be increased to weekly. Additional details will be provided in the forthcoming 7-day Excursion Notification.

Let me know if you have any questions. For clarification, the well does not qualify as an excursion under the WDEQ-LQD criteria (i.e. well group UCLs).
