---

Dear Mr. Nazar:

By letters dated January 30, 2018, (Agencywide Documents Access and Management System (ADAMS) Accession No. ML18037A812), February 9, 2018 (ADAMS Accession No. ML18044A653), February 16, 2018 (ADAMS Accession No. ML18053A123), March 1, 2018 (ADAMS Accession No. ML18072A224), and April 10, 2018 (ADAMS Accession Nos. ML18102A521 and ML18113A132), Florida Power & Light Company (FPL) submitted an application for subsequent license renewal of Renewed Facility Operating License Nos. DPR-31 and DPR-41 for the Turkey Point Nuclear Generating Unit Nos. 3 and 4 (Turkey Point) to the U.S. Nuclear Regulatory Commission (NRC) pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, and Part 54 of Title 10 of the *Code of Federal Regulations*, "Requirements for renewal of operating licenses for nuclear power plants".

The NRC staff is reviewing the information contained in the subsequent license renewal application and has identified, in the enclosure, areas where additional information is needed to complete the review.

On August 9, 2018, the staff held a clarification call regarding these requests for additional information (RAI). As a result of this call, the staff deleted an RAI regarding Turkey Point Unit 3 "System Intended Functions" because the FPL staff were able to refer to specific sections in the application where the information could be found. The original RAI (2.3.3.11.3-4) can be found in the attached "Safety RAIs – Set 2 – draft.pdf."

These requests for additional information were discussed with Steve Franzone of your staff, and a mutually agreeable date for the response is within 30 days from the date of this e-mail or September 19, 2018. If you have any questions, please contact me by e-mail [Lois.James@nrc.gov](mailto:Lois.James@nrc.gov).

Sincerely,

Lois James, Senior Project Manager  
License Renewal Projects Branch  
Division of Materials and License Renewal  
Office of Nuclear Reactor Regulation

Enclosure:  
Requests for Additional Information
