Jedic.

Utah reactor is down. The exam is postponed until Utah provides an operational status update. I will keep you posted as information becomes available.

Thank you.
Michele DeSouza

Hi Michele,

We are currently still down due to our fission counter, and the reactor probably will be down for 1-2 weeks more. Currently we are testing a new amplifier and SCA along with a preamp, then we will be revisiting the 50.59 process on it. I will keep you up to date as we are making repairs.

Several of my reactor operators in training have been gone this summer completing internships. They just got back and will have the final medical forms by first thing next week to submit.

Thanks,
Matt

Mr. Lund,

My understanding is your Utah reactor is currently non-operational. Please send an update on the reactor status as well as the impact on the August operator licensing examination. We require this information in writing ASAP.

Please contact me for questions.

Thank you,
Michele DeSouza

Hi Michele,
I just wanted to double check to see if you were able to arrange for testing the week of August 20th. I have 3 ROs and 1 SRO to do the exam sometime this fall.

Thanks,
Matt

Mr. Lund,

Please contact me ASAP. We need to identify the week for conducting your facility examinations. Per my schedule, the week of August 20th, 2018 might work well. In addition, we will need number of ROs and SROs.

Thank you,
Michele DeSouza
