Summary of Meeting:

On August 16, 2018, staff from the NRC conducted a public meeting with representatives from SNC to discuss issues associated with the safety review of licensing actions for SNC's VEGP Units 3 and 4. Specifically, the meeting discussed (1) SNC's revised response to comments regarding UINs and (2) pre-submittal information regarding LAR ITP-3.

The first topic discussed was SNC's revised response to comments regarding UINs. The staff noted that this topic was previously discussed at the public meeting on July 19, 2018. The staff stated that they reviewed SNC's revised response and proposed changes and noted that the revisions provide consistency with information contained elsewhere in the UINs. The staff stated that the proposed revisions resolves the staff's concern. SNC stated that they would resubmit the six UINs identified (ITAAC Index Nos. 53, 114, 154, 248, 309, and 384) with the revised language in the near future.

The second topic discussed was pre-submittal information regarding LAR ITP-3. SNC provided an overview of the LAR and walked through the proposed changes in Enclosure 3. SNC noted that the LAR proposed to align Tier 1 descriptions for ITP with RG 1.68, which includes the preoperational and startup test programs. The component test program would be a prerequisite for ITP and occur as a part of the construction testing. SNC noted that they are not proposing to change the number of tests or technical content of the tests. SNC stated that they plan to submit a Preliminary Amendment Request (PAR) immediately after the LAR is submitted so that they can start performing tests on components already installed at VEGP Units 3 and 4. The staff stated that they understood the proposed request. SNC stated that they plan to submit the LAR and PAR before the end of the month.

At the end of each topic discussed, there was an opportunity for the public to provide comments and ask questions. There were no questions or comments from members of the public.
