Subject: Unanticipated area found above ALARA levels but below DCGL screening levels
Discussion:

Mr. Fahey, the decommissioning contractor for Bristol-Myers Squibb, called to inform the NRC that an unanticipated area above the Bristol-Myers Squibb Administrative Limits was found in the upper plenum heading of the duct system. The contamination of interest at the site is Carbon-14. The levels found were approximately 15,000 dpm/100cm² removable and 20,000 dpm/100 cm² fixed. These levels are well below the DCGLs listed in the approved decommissioning plan. The decommissioning plan was approved in Amendment Number 23 to Bristol-Myers Squibb License 06-27843-02. We asked Mr. Fahey to document these results in the Final Status Survey.

Action Required: No immediate action required, review information upon receipt of final status survey.
