AUG 29 2018

Ashok B. Jain, M.D.
Radiation Safety Officer
Beaumont Hospital – Wayne
33155 Annapolis Ave.
Wayne, MI 48184

Dear Dr. Jain:

Enclosed is Amendment No. 41 to your NRC Material License No. 21-11457-02 in accordance with your June 5, 2018 (ML18158A236) letter. In that letter, you requested to remove the Ford Road and Venoy Road locations of use, listed on the previous version to your license.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

In your June 5, 2018 letter, you confirmed that all residual licensed material located previously at your facilities located at the 29150 Ford Rd., Garden City, Michigan location of use listed in Condition No. 10.A. to the most recent amendment to your license had been removed – such that any remaining residual radioactivity in those locations of use is within the limits of Title 10 of the *Code of Federal Regulations* Part 20, Subpart E, and is ALARA. You also confirmed that all residual licensed material from the licensee's 4020 Venoy Road location been transferred to another NRC licensee – Venocure, PLLC, NRC Lic. No. 21-35088-01.

Based on its review, the staff has concluded that all licensable radioactive material has been removed from the Ford Road location of use referenced in your letter, and residual radioactive material attributable to licensed activities in that location does not exceed current NRC criteria. Based on these conclusions no further remediation or actions with respect to NRC regulated material at the 29150 Ford Road location of use referenced in your letter are required. That location authorized previously on your license, under Condition No. 10.A., is suitable for unrestricted use.

Based on its review, the staff has concluded that all licensable radioactive material used or stored at the licensee's facilities located 4020 Venoy Rd., Wayne, MI, has been removed from the above referenced license. Based on these conclusions no further remediation or actions with respect to NRC regulated material at that location are required, on the part of the licensee. Your facilities are suitable for use by another NRC licensee under NRC license number 21-35088-01.

The enclosure to this letter contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with Title 10 of the *Code of Federal Regulations* (CFR) Section 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

In accordance with 10 CFR 2.390, a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS, which is accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Sara A. Forster, M.S.
