SUBJECT: TURKEY POINT NUCLEAR GENERATING UNIT NOS. 3 AND 4 –
CORRECTION TO AMENDMENT NOS. 266 AND 261 REGARDING CYBER
SECURITY MILESTONE 8 COMPLETION DATE IN THE RENEWED FACILITY
OPERATING LICENSES (CAC NOS. MF4983 AND MF4984)

Dear Mr. Nazar:

On May 28, 2015, the U.S. Nuclear Regulatory Commission (NRC) issued Amendment Nos. 262 and 257 to Renewed Facility Operating License Nos. DPR-31 and DPR-41 for the Turkey Point Nuclear Generating Unit Nos. 3 and 4, respectively (Agencywide Documents Access and Management System (ADAMS) Accession No. ML15061A237). The amendments revised the Renewed Facility Operating Licenses and Technical Specifications to incorporate a new fire protection licensing basis in accordance with Section 50.48(c) of Title 10 of the *Code of Federal Regulations*. Those amendments added Transition License Condition 3 to page 6 of the Renewed Facility Operating Licenses, which stated:

The licensee shall implement the items listed in Enclosure 1, Attachment S, Table S-3, "Implementation Items," of FPL letter L-2014-303, dated 11/05/2014, with the exception of Items 12, 18, 19, and 22, no later than 12 months after issuance of the license amendment. Items 12, 18 and 19 are associated with modifications in Table S-2 and will be completed in accordance with Transition License Condition 2 above. Item 22 will be completed within 6 months of the NRC approval of the Flowserve RCP Seal Topical Report.

On September 28, 2015, the NRC issued Amendment Nos. 266 and 261 to Renewed Facility Operating License Nos. DPR-31 and DPR-41 (ADAMS Accession No. ML15233A379), which revised license condition 3.E to change the scheduled completion date for Milestone 8 of the Cyber Security Plan implementation schedule from December 31, 2015, to December 31, 2017. Based on recent discussions with the licensee, the NRC staff has determined that an incorrect version of Transition License Condition 3 was used in preparation of Amendment Nos. 266 and 261, such that Implementation Item 22 was inadvertently left off of the list exceptions in the first sentence. As such, Transition License Condition 3 currently states:

The licensee shall implement the items listed in Enclosure 1, Attachment S, Table S-3, "Implementation Items," of FPL letter L-2014-303, dated 11/05/2014,

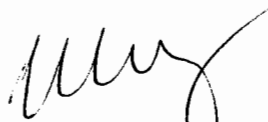

with the exception of Items 12, 18, and 19, no later than 12 months after issuance of the license amendment. Items 12, 18 and 19 are associated with modifications in Table S-2 and will be completed in accordance with Transition License Condition 2 above. Item 22 will be completed within 6 months of the NRC approval of the Flowserve RCP Seal Topical Report.

The licensee's October 7, 2014, request to revise Milestone 8 did not include changes to Transition License Condition 3 (ADAMS Accession No. ML14308A054).

The purpose of this letter is to issue a correction to page 6 for Renewed Facility Operating License Nos. DPR-31 and DPR-41 to reflect the correct wording of Transition License Condition 3, as approved by Amendment Nos. 262 and 257. Copies of page 6 of Renewed Facility Operating License Nos. DPR-31 and DPR-41 are enclosed. The NRC staff determined that the correction to the license pages do not change the staff's previous conclusion in its no significant hazards consideration as published in the *Federal Register* on October 27, 2015 (80 FR 65819) and regarding the acceptability of the changes approved in Amendment Nos. 266 and 261.

If you have any questions regarding this matter, please contact me at (301) 415-6459 or by email at michael.wentzel@nrc.gov.

Sincerely,

Michael J. Wentzel, Project Manager
