North Little Rock, AR 72114

SUBJECT: NRC INSPECTION REPORT 03034325/2018004(DNMS) – VA NEW JERSEY
HEALTHCARE SYSTEM, EAST ORANGE, NEW JERSEY

Dear Mr. Yurko:

On August 6-7, 2018, the U.S. Nuclear Regulatory Commission (NRC) conducted a routine inspection at the VA New Jersey Healthcare System, East Orange, New Jersey. The inspection was limited to a review of activities authorized under Permit Number 29-04481-01. The inspector conducted an exit meeting with the management and staff at the facility at the completion of the inspection.

The inspection was an examination of activities conducted under the Permit as they relate to radiation safety and to compliance with the Commission's rules and regulations. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, independent measurements, and observation of activities in progress. Within the scope of the inspection no violations of NRC requirements were identified; therefore, no response to this letter or the enclosed NRC Form 591M is required.

Please note that as part of this inspection, we reviewed your followup to an event involving several written directives for radiopharmaceutical therapies that occurred between December 2015 and March 2017 (NMED No. 170236; Event No. 52728). No concerns were noted with your followup and corrective actions taken in response to this event. Therefore, we consider this matter closed.

In accordance with Title 10 of the *Code of Federal Regulations* (CFR) 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC's Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC's website at <http://www.nrc.gov/reading-rm/adams.html>.

P. Yurko
