Subject: Exelon Generation Company, LLC - Acceptance of License Amendment Request to Revise Emergency Plan for Calvert Cliffs, FitzPatrick, and Nine Mile Point (EPID L-2018-LLA-0240)

Mr. Gropp:

By application dated August 31, 2018 (Agencywide Documents Access and Management System Accession No. ML18249A096), Exelon Generation Company, LLC (the licensee) submitted a license amendment request for Calvert Cliffs Nuclear Power Plant, Units 1 and 2; James A. FitzPatrick Nuclear Power Plant; and Nine Mile Point Nuclear Station, Units 1 and 2. The amendments would revise the emergency plans by changing the emergency response organization staffing requirements for each of these facilities. The request also noted that the independent spent fuel storage installations (ISFSIs) for these sites are included in the site emergency plans. The NRC staff's review will consider changes applicable to the ISFSIs, as necessary. Although the Calvert Cliffs ISFSI is specifically licensed by the NRC, an amendment to this materials license is not required.

The purpose of this e-mail is to provide the results of the NRC staff's acceptance review of this amendment request. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

Consistent with Section 50.90 of Title 10 of the *Code of Federal Regulations* (10 CFR), an amendment to the license must fully describe the changes requested, and following as far as applicable, the form prescribed for original applications. Section 50.34 of 10 CFR addresses the content of technical information required. This section stipulates that the submittal address the design and operating characteristics, unusual or novel design features, and principal safety considerations.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. You will be advised of any further information needed to support the NRC staff's detailed technical review by separate correspondence.

Based on the information provided in your submittal, the NRC staff has estimated that the review of this licensing request will take approximately 325 hours to complete. The NRC staff expects to complete this review by September 30, 2019. If there are emergent complexities or challenges in our review that would cause changes to the initial forecasted completion date or significant changes in the forecasted hours, the reasons for the changes, along with the new estimates, will be communicated during the routine interactions with the assigned project manager.

These estimates are based on the NRC staff's initial review of the application and they could change, due to several factors including requests for additional information, unanticipated addition of scope to the review, and review by NRC advisory committees or hearing-related activities. Additional delay may occur if the submittal is provided to the NRC in advance or in parallel with industry program initiatives or pilot applications.

If you have any questions, please contact me at (301) 415-1380.

Sincerely,

Blake Purnell, Project Manager
Plant Licensing Branch III
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
