November 01, 2018

Title:	Notice of Meeting with Exelon Generating Company, LLC			
Date(s) and Time(s): November 06, 2018, 01:00 PM to 03:00 PM				
Location:	NA			
Category:	This is a Category 1 meeting. The public is invited to observe this meeting and will have one or more opportunities to communicate with the NRC after the business portion of the meeting but before the meeting is adjourned.			
Purpose:	The purpose is to discuss Exelon's license amendment request dated August 10, 2018 (Agencywide Documents Access and Management System Accession No. ML18226A097), regarding a one-time extension of technical specification 3.8.1 required action A.2.			
Contact:	Joel S. Wiebe	Bhalchandra K. Vaidya 301-415-3308		
	301-415-6606			
	Joel.Wiebe@nrc.gov	Bhalchan	Bhalchandra.Vaidya@nrc.gov	
Participants:	NRC		External	
	NRR Staff, Office of Nuclear Read	tor	David Gullott, Exelon Generation Co LLC	
	Regulation		Et. Al., Exelon Generation Co LLC	
Docket No:	05000454			
	05000455			
Comments:	Members of the public who wish to attend the meeting should call the meeting contact individual to obtain the conference call information by November 6, 2018.			

PUBLIC MEETING AGENDA

Notice of Meeting with Exelon Generating Company, LLC

November 06, 2018, 01:00 PM to 03:00 PM

NA

<i>Time</i> 1:00	Topic	Speaker
pm	Introductions	NRC/Exelon
	• In its letter dated August 10, 2018, the licensee provides an overview of the current plant design, the current plant electrical lineup with SAT 242-2 failed, and a proposed modification to the electrical lineup should SAT 242-1 fail. To facilitate the NRC staff review, provide a discussion of the above.	Exelon
	• In its letter dated August 10, 2018, the licensee identifies the request as a one- time extension. However, the proposed TS does not limit use of the extension to one time. Provide a description of how the extension is limited to a one time use or propose a change to the TS to limit its use to one time.	Exelon
	• In its letter dated August 10, 2018, the licensee states that FLEX coping equipment and strategies are available. Provide a description of the FLEX equipment capability (i.e., capability to bring the plant to cold shutdown, needed support equipment, testing of functionality, and time required to connect compared to time required to connect the Alternate AC power source).	Exelon
	• If SAT 142-1 fails in addition to SAT 242-2, describe the operator actions and SAT loading conditions?	Exelon
	• The proposed modification feeding the Unit 2 ESF buses from the main generator via UAT buses is not a preferred circuit as per TS bases. Explain the basis for feeding the ESF buses with this configuration? In this scenario, the proposed modification will be credited as preferred circuit during this period? Explain your basis with respect to defense in depth, loading conditions and operator actions if any.	Exelon
	• In its letter dated August 10, 2018, the licensee proposes an extension of the completion time based on the limiting Unit 2 time (79 days) to reach the acceptance guidance incremental conditional core damage probability (ICCDP) of 1.0E-5. The licensee's risk assessment is provided in Attachment 7 of its August 10, 2018, letter. To facilitate the NRC staff review, provide a discussion of the risk assessment in Attachment 7.	Exelon
2:45 pm	Public Comment	Public

The time of the meeting is local to the jurisdiction where the meeting is being held.

The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If reasonable accommodation is needed to participate in this meeting, or if a meeting notice, transcript, or other information from this meeting is needed in another format (e.g., Braille, large print), please notify the NRC meeting contact. Determinations on requests for reasonable accommodation will be made on a case-by-case basis.
