**SUBJECT: NINE MILE POINT NUCLEAR STATION, UNIT 1, INITIAL OPERATOR  
LICENSING WRITTEN EXAMINATION APPROVAL**

Dear Mr. Hanson:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing written examinations at Nine Mile Point Nuclear Station, Unit 1. Please note that operating test approval has been communicated under separate correspondence.

The U.S. Nuclear Regulatory Commission (NRC) has approved the subject written examination in accordance with NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," Revision 11. Your staff will administer the written examinations during the week of December 10, 2018. The list of applicants approved to take the examination has been provided to Mr. James Tsardakas, Director, Site Training. The examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensed operators at your facility, do not administer the examination and contact me at 610-337-5306.

Please contact your Chief Examiner, Peter Presby, at 610-337-5392, if you have any questions or identify any errors or changes in the license level (reactor operator or senior reactor operator) or type of examination (partial or complete operating test) specified for each applicant approved to take the examination.

Sincerely,
