

Operability Initiative  
Public Meeting  
NRC Staff Feedback Related  
To NEI 10/25 Presentation

Jane Marshall  
Deputy Director, Division of Safety Systems  
Office of Nuclear Reactor Regulation

December 13, 2018

# Terms Consistent Between Draft NEI 18-03 and IMC 0326

- Current Licensing Basis
- Design Basis
- Mission Time
- Operability Declaration
- Reasonable Expectation (of Operability)
- Presumption of Operability

# Terms Defined in IMC 0326

## Not Included in Draft 18-03

- List presented by NEI contains items related to CAP.
- NRC to decide if separate guidance to be generated for inspector use (separating Operability and CAP programs).
- List included:
  - Degraded Condition and Nonconforming Condition
  - Functional – Functionality
  - Fully Qualified
  - Defect, Flaw, High Energy System, Moderate Energy Systems, NDE Indication

## Terms Defined in IMC 0326

### Defined Differently in Draft 18-03 or are new to Draft 18-03

- Deficient SSC Condition
- Compensatory Actions
- Necessary Support Function
- Operable/Operability
- Specified Function/Specified Safety Function
  - IMC 0326 definition is more inclusive and appropriate.
  - Draft 18-03 definition is a subset (only referencing Chapters 6 & 15)

# DISCUSSION

- Open Dialogue (Staff and NEI)
- Staff/NEI Logistics
  - RIC Panel Discussion (March 12-14)
  - Future Public Meeting Schedule
    - Currently Scheduled for 1/10, 2/21, & 4/11.
