EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)									
02		Following modifications to PORV power supplies, the valves were stroked per							
03		pre-op test procedure and declared operable. However, because required ad-							
04		ministrative reviews of the modification package had not been completed, the							
05		PORVs should not have been declared operable. Subsequent administrative re-							
06		views revealed no discrepancies in the modification package; therefore, the							
07		valves were capable of performing their intended safety function during							
08		period in question. Tech Spec 3.1.8 and Tech Spec 6.9.2.B.3 apply.
