Nuclear Regulatory Commission WCS Waste Storage Application

RE: Docket No. 72-1050; NRC-2016-0231 Waste Control Specialists LLC's / ISP's Consolidated Interim Spent Fuel Storage Facility Project

Dear Nuclear Regulatory Commission WCS Waste Storage Application,

Dear Nuclear Regulatory Commission,

Please reject the proposal by Waste Control Specialists and its partner to import up to 40,000 tons of high-level radioactive waste from nuclear reactors around the country and store it in Andrews County for 40 years or longer.

The NRC has not held a single public meeting on the revised application.

Please extend public intervention and public comment deadlines by at least 180 days to allow for public input, and host public meetings in Dallas, Houston, San Antonio, El Paso, Midland and Andrews – and other locations that would be impacted by this proposal.

Improved monitoring, security and worker protections are needed, and the emergency plan should include actions to be taken in the event of an accident, not just a notification structure. It appears there are no viable plans for action should an emergency arise.

Sending radioactive waste to this site would risk public health and security for residents near the site and along transportation routes. An inadequate permanent disposal site could be created since it's likely that the waste will never get moved to a permanent repository. This waste will be dangerous for a million years. Storing it for decades above ground in extreme climate conditions is too risky. In the interest of our public health and safety, this license should be denied.

Thank you for your consideration of my concerns.

Sincerely,

Sincerely,
Rebecca Walding
