Additional Information for Eastpointe Radiologists, # 21-24311-02, CN# 610099

Dear Ms. Casey,

All nine sources are accounted for in the documentation you received. The Co-57 disk sources are in pairs of two and I am not sure why each serial number is not listed individually. However, I can attest that all nine sources are accounted for on that confirmation page.

As for the decay in storage recordings, we never had any waste that was put into storage for decay. The sharps container that was active when we closed was measured at background and disposed of with the other non-radioactive sharp containers at our facility. Attached is a copy of our in house storage and disposal record of this reading.

Thank you for your assistance with this matter. Please let me know if you require any other documentation.

Cordially,

Raymond Rahi, M.D.
President Eastpointe Radiologists, P.C. and R.S.O.
