Subject: License Amendment Request for Source Materials License SUA-1475,  
United Nuclear Corporation Church Rock Mill Groundwater Corrective Action  
Program

Dear Ms. Kock:

On behalf of United Nuclear Corporation and the General Electric Company (UNC/GE), this is to confirm that an *Application for Amendment of USNRC Source Material License SUA-1475 for the United Nuclear Corporation Mill Site* was submitted electronically to the USNRC along with the associated *Supplemental Environmental Report for the United Nuclear Corporation Site Source Material License Amendment Request*, via an email from Melanie Davis, Stantec, on September 24, 2018..

As of September 1997 United Nuclear Corporation became a wholly-owned, indirect subsidiary of General Electric Company. GE Global Operations has been retained through a separate administrative services agreement to assist United Nuclear both technically and administratively with environmental issues at the Church Rock site. Please contact me if you have any questions.

Sincerely,

Roy Blickwedel  
Senior Project Manager – Remediation  
GE Global Operations - EHS
