FEE RULE
WORK PAPERS**

FY 2019 Proposed Fee Rule Work Papers

The supporting information to the FY 2019 Proposed Fee Rule is contained in the following work papers. The items identified in the Table of Contents are located behind a corresponding Tab. At the beginning of each Tab is a cross reference, if appropriate, to the location of the subject matter and Tables found within the Proposed Fee Rule Document. For example, a reference to **"Section II."** is the supporting information for: **Section II. FY 2019 Fee Collection A. Amendments to 10 CFR Part 170 1. Professional Hourly Rate.**

The complete outline of the FY 2019 Proposed Fee Rule showing the Section and Table titles is located immediately following the Table of Contents.

Table of Contents

FY 2019 Proposed Fee Rule Outline

Budget and Fee Recovery

Part 170 Fees

- Determination of Professional Hourly Rate
- Licensing Fees
- Export and Import Fees
- Reciprocity Fees--Agreement State Licensees
- General License Registration Fees

Fee Collected for Prior Year

Part 171 Annual Fees

- Fee-Relief Adjustment and LLW Surcharge Included in Annual Fees
- Operating Power Reactors
- Spent Fuel Storage/Reactor Decommissioning
- Fuel Facilities
- Uranium Recovery Facilities
- Test and Research Reactor
- Rare Earth Facilities
- Materials Users
- Transportation

Budget and Fee Recovery

Section III

Table I

The NRC's total budget authority for FY 2019 is \$911.0 million. The Excluded fee items include \$16.0 million for advanced reactor infrastructure, \$10.3 million for international activities, \$1.3 million for WIR activities, \$1.1 million for IG services for the Defense Nuclear Facilities Safety Board, and \$14.6 million for generic homeland security activities. Based on the 90 percent fee-recovery requirement, the NRC will have to recover approximately \$781.9 million in FY 2019 through Part 170 licensing and inspection fees and Part 171 annual fees. The amount required by law to be recovered through fees for FY 2019 would be \$7.4 million less than the amount estimated for recovery in FY 2018, a decrease of 0.9 percent.

The FY 2019 fee recovery amount is increased by \$1.1 million to account for billing adjustments (i.e., for FY 2019 invoices that the NRC estimates will not be paid during the fiscal year, less payments received in FY 2019 for prior year invoices). This leaves approximately \$781.9 million to be billed as fees in FY 2019 through Part 170 licensing and inspection fees and Part 171 annual fees.

The NRC estimates that \$246.7 million would be recovered from Part 170 fees in FY 2019. This represents a decrease of \$34.1 million or approximately 12.1 percent as compared to the estimated Part 170 collections of \$280.8 million for FY 2018. The remaining \$535.2 million would be recovered through the Part 171 annual fees in FY 2019, which is an increase of \$26.7 million when compared to estimated Part 171 collections of \$508.5 million for FY 2018.

See Tab "Budget Authority (FY 2019)" for supplemental information on the distribution of budgeted FTE and contract dollars.

Budget and Fee Recovery
FY 2019
(\$ in Millions)

Part 170 Fees

Determination of Professional Hourly Rate

Section III.A.1

Table II

Proposed Professional Hourly Rate is \$278

The NRC's professional hourly rate is derived by adding budgeted resources for (1) mission-direct program salaries and benefits; (2) mission indirect-program support; and (3) agency support (corporate support and the Inspector General (IG)), then subtracting certain offsetting receipts and then dividing this total by mission direct full-time equivalents (FTE) converted to hours. The only budgeted resources excluded from the professional hourly rate are those for mission-direct contract activities.

The NRC has reviewed and analyzed actual time and labor data in the NRC's Human Resource Management System for the most recent completed fiscal year (FY 2018) to determine if the annual direct hours worked per direct FTE estimate requires updating for the FY 2019 fee rule. Based on this review using actual time and labor data, the NRC determined that 1,510 hours is the best estimate of direct hours worked annually per direct FTE. This estimate excludes all non-direct activities, such as annual leave, sick leave, holidays, training, and general administration tasks.

Definitions of Professional Hourly Rate Components

Mission-Direct Program Salaries and Benefits:

These resources are allocated to perform core work activities committed to fulfilling the agency's mission of protecting public health and safety, promoting the common defense and security, and protecting the environment. These resources include the majority of the resources assigned under the direct business lines (Operating Reactors, New Reactors, Fuel Facilities, Nuclear Materials Users, Decommissioning and Low-Level Waste, and Spent fuel Storage and Transportation) are core work activities considered mission-direct.

Mission-Indirect Program Support:

These resources support the core mission-direct activities. These resources include for example, supervisory and nonsupervisory support, and mission travel and training. Supervisory and nonsupervisory support, and mission travel and training resources assigned under direct business line structure, are considered mission-indirect due to their supporting role of the core mission activities.

Agency Support (Corporate Support and the IG):

These resources are located in executive, administrative, and other support offices such as the Office of the Commission, the Office of the Secretary, the Office of the Executive Director for Operations, the Offices of Congressional and Public Affairs, the Office of the Inspector General, the Office of Administration, the Office of the Chief Financial Officer, the Office of the Chief Information Officer, the Office of the Chief Human Capital Officer and the Office of Small Business and Civil Rights. These resources administer the corporate or shared efforts that more broadly support the activities of the agency. These resources also include information technology services, human capital services, financial management and administrative support.

Offsetting Receipts:

The fees collected by the NRC for the Freedom of Information Act (FOIA) and Indemnity (financial protection required of licensees for public liability claims of 10 CFR Part 140) are subtracted from the budgeted resources amount when calculating the 10 CFR Part 170 professional hourly rate per the guidance in OMB Circular A-25 "User Charges." The budgeted resources for FOIA activities are allocated under the product for information services within the Corporate Support business line. The indemnity activities are allocated under the licensing actions and the Research and Test Reactors products within the Operating Reactors business line.

Estimated Annual Mission Direct FTE Productive hours:

Also referred to as the productive hours assumption, reflects the average number of hours that a mission-direct employee spends on mission-direct work in a given year. This excludes hours charged to annual leave, sick leave, holidays, training and general administration tasks. The productive hours assumption is calculated using actual time and labor data in HRMS (minus support and supervisory staff).

<u>Total hours in mission business lines</u>				
Total hours in mission business lines + "Other Hours"	X	Total work hours in a year (2,087)	=	Productive Hours Assumption
2,478,954				
<u>3,422,244</u>	X	Total work hours in a year (2,087)	=	1,510

- 2,087 hours is used to be consistent with OPM guidance and the Consolidated Omnibus Budget Reconciliation Act of 1985 when determining pay
- The primary increase in productivity assumption is attributed mainly by the decline in direct staff hours for general administration and training attendance.

**DETERMINATION OF PROFESSIONAL HOURLY RATE
CALCULATION OF FTE RATES BY PROGRAM**

This is for the purpose of converting FTE to \$.

Part 170 Fees

Specific Services

Section III.A.2

Flat application fees are calculated by multiplying the average professional staff hours needed to process the licensing actions by the proposed professional hourly rate (\$278 for FY 2019). The agency estimates the average professional staff hours every other year as part of its biennial review of fees which was performed in FY 2019.

Full cost fees are determined based on the professional staff time and appropriate contractual support of services. The full cost fees for professional staff time will be determined at the professional hourly rate in effect the time the service was provided.

The NRC estimates the amount of 10 CFR part 170 fees for each fee class based on established fee methodology guidelines (42 FR 22149; May 2, 1977), which specified that the NRC has the authority to recover the full cost of providing services to identifiable beneficiaries. The NRC uses these established guidelines to apply the most current financial data and workload projections by offices and divisions to calculate the 10 CFR part 170 fee estimates.

Current financial data includes: 1) four quarters of the most recent billing data (professional hourly rate invoice data); 2) actual contractual work charged (prior period data) to develop contract work estimates; and 3) the number of FTE hours charged, multiplied by the NRC professional hourly rate

* hours based on FY 2019 Biennial Review

** Inspection costs are used in computation of the Annual fees for the category

¹ Beginning with FY 2011 fee rule, the Master Materials License Part 170 application fee was eliminated. Per FSME's recommendation in their Biennial Review, the fee for a new MML license will be fully costed based on the hours spent on reviewing a new application.

Part 170 Fees

Export and Import Fees

Section III.A.2

Flat application fees are calculated by multiplying the average professional staff hours needed to process the licensing actions by the proposed professional hourly rate (\$278 for FY 2019). The agency estimates the average professional staff hours every other year as part of its biennial review of fees. The agency estimates the average professional staff hours every other year as part of its biennial review of fees which was performed in FY 2019.

Note: Because the FY 2019 enacted budget excludes international activities from the fee-recoverable budget, import and export licensing actions (see fee categories K.1. through K.5. of § 170.21 and fee categories 15.A. through 15.R. of § 170.31) will not be charged fees under the proposed rule. To implement this, the NRC has revised fee categories K.1. through K.5. of § 170.21 and fee categories 15.A. through 15.R. of § 170.31 and included a new footnote in these tables.

Part 170 Fees

Reciprocity Fees - Agreement State Licensees

Section III.A.2

The application fee for Agreement State licensees who conduct activities under the reciprocity provisions of 10 CFR 150.20 is determined using FYs 2014 through 2017 data and the FY 2019 professional hourly rate. The FYs 2014-2017 reciprocity fee data was provided as part of the FY 2019 biennial review of fees.

DETERMINATION OF RECIPROCITY PART 170 FEES FY 2019			
NOTES:			
The reciprocity application and revision fees are determined using FYs 2014-2017 data*, and the FY 2019 professional hourly rate.			
The reciprocity application fee includes average costs for inspections, average costs for processing initial filings of NRC Form 241, and average costs for processing changes to the initial filings of NRC Form 241.

Data based on the NRC budget documents and the 10/18 email from J.Rand(NMSS GL program).			

Fees Collected for Prior Year

As part of the NRC's fees transformation, beginning with the FY 2018 final fee rule work papers, we have compared the FY 2018 actual Part 170 and Part 171 percentage of total collections with the estimated Part 170 and Part 171 percentage of total collections.

FEES COLLECTED FOR PRIOR YEAR

Fee Class	FY 2018 Actual Part 170-User Fees % of Total Collections for the Fee Class	FY 2018 Actual Part 171-Annual Fees % of Total Collections for the Fee Class	FY 2017 Estimated Part 170-User Fees % of Total Collections for the Fee Class	FY 2017 Estimated Part 171-Annual Fees % of Total Collections for the Fee Class
Fee Relief Activities	100%	0%	100%	0%
Operating Power Reactors	35%	65%	36%	64%
Spent Fuel Storage/Reactor Decommissioning	28%	72%	30%	70%
Fuel Facilities	23%	77%	25%	75%
Uranium recovery	80%	20%	96%	4%
Research and Test Reactors	81%	19%	84%	16%
Rare Earth	100%	0%	0%	0%
Materials users	3%	97%	3%	97%
Transportation	73%	27%	74%	26%
Export and Import Fees	100%	0%	0%	0%
Total	34%	66%	31%	69%

As part of improving transparency of the fee setting process, NRC committed to providing more information to identify budgeted activities allocated to user fees or annual fees. The FY 2019 Congressional Budget Justification released on February 12, 2018, included which Products Lines may generally be annual or user fees for each business line.

In addition, NRC will report fees collected for the prior fiscal year, by fee class, beginning with the FY 2018 final fee rule workpapers. Each fee class data includes distribution of fees collected as user fees (10 CFR Part 170) and annual fees (10 CFR Part 171).

Part 171 Annual Fees

Section III.B

Part 171 Annual Fees

Application of Fee-Relief Adjustment and LLW Surcharge

Section III.B.1

Table III

Table IV

The NRC applies the 10 percent of its budget that is excluded from fee recovery under OBRA-90, as amended (fee relief), to offset the total budget allocated for activities which do not directly benefit current NRC licensees. The budgeted resources for these fee-relief activities are totaled, and then reduced by the amount of the NRC's fee relief. Any difference between the fee relief and the budgeted amount of these activities results in a fee relief adjustment (increase or decrease) to all licensees' annual fees, based on their percent of the budget (the majority is allocated to power reactors each year).

The FY 2019 budgeted resources for NRC's fee-relief activities are \$86.6 million. The NRC's 10 percent fee relief amount in FY 2019 is \$86.8 million, leaving a \$0.2 million fee-relief credit that will decrease all licensees' annual fees based on their percentage share of the budget.

Separately, the NRC has continued to allocate the low-level waste (LLW) surcharge based on the volume of LLW disposal of three classes of licensees, operating reactors, fuel facilities, and materials users.

Note: For FY 2019, the enacted budget excludes international activities from the fee-recoverable budget. This includes conventions and treaty activities that are not attributable to an existing NRC licensee or class of licensees, and it included international cooperation activities that are not attributable to an existing NRC licensee or class of licensees.

Fee-Relief Activity-Rebaseline

FY 2019 FEE-RELIEF ACTIVITIES AND LLW GENERIC SURCHARGE

FTE rate: \$419,767

	DIRECT RESOURCES		Less Part 170	FEE AMOUNT
	\$,M	FTE	materials decommissioning revenue, \$ M	(\$,M)
TOTAL NRC				
NONPROFIT EDUCATIONAL EXEMPTION	0.64	20.2		9.116

Part 171 Annual Fees

Operating Power Reactors

Section III.B.2.a

Table VI

The budgeted costs to be recovered through annual fees to power reactors are divided equally among the 98 power reactors licensed to operate. This results in a FY 2019 annual fee of \$4,697,000 per reactor. Additionally, each power reactor licensed to operate would be assessed the FY 2019 spent fuel storage/reactor decommissioning annual fee of \$163,000. This results in a total FY 2019 annual fee of \$4,860,000 for each power reactor licensed to operate.

Note: The NRC amended its licensing, inspection and annual fee regulations to establish a variable annual fee structure for light-water small modular reactors (SMR) on May 24, 2016. Under the variable annual fee structure, an SMR's annual fee would be calculated as a function of its licensed thermal power rating. This fee methodology complies with OBRA-90, as amended. Currently, there are no operating SMRs; therefore, the NRC will not propose an annual fee in FY 2019 for this type of licensee.

FY 2019 MISSION DIRECT BUDGETED RESOURCES

The budgetary resources allocated to Power Reactors Fee Class from Nuclear Materials & Waste Safety Program include (but are not limited to) activities pertaining to analysis, data collection, modeling future strategies for disposal of spent fuel and high level waste and monitoring developments in the evolving national waste management strategy. In addition to tribal program activities, dosimeter costs and materials training widely attended by all agency staff including inspectors benefitting numerous facets of the agency's mission.

ANNUAL FEE PER REACTOR (rounded) (BUDGETED COSTS DIVIDED BY 98 OPERATING POWER REACTORS)	\$ 4,697,000
PLUS SPENT FUEL STORAGE/ REACTOR DECOMMISSIONING ANNUAL FEE	\$163,000
TOTAL ANNUAL FEE PER LICENSE	\$ 4,860,000

Part 171 Annual Fees

Spent Fuel Storage/Reactor Decommissioning

Section III.B.2.b

Table VII

For FY 2019, budgeted costs of approximately \$19.9 million for spent fuel storage/reactor decommissioning are to be recovered through annual fees assessed to part 50 power reactors, and to part 72 licensees who do not hold a part 50 license. Those reactor licensees that have ceased operations and have no fuel onsite are not subject to these annual fees. The required annual fee recovery amount is divided equally among 122 licensees, resulting in a FY 2019 annual fee of \$163,000 per licensee.

San Onofre, Unit 2	50-361
San Onofre, Unit 3	50-362
Vermont Yankee	50-271
Fort Calhoun	50-285
Oyster Creek	50-219

**Total No. of Reactors in decommissioning or possession only status
with fuel onsite: 20**

Part 72 Licensees without a Part 50 License

Ft. St. Vrain	72-009
GE Morris	72-001
Foster Wheeler Environmental Corp.	72-025
Trojan	72-017

Total Part 72 licenses: 4

The annual fee is determined by dividing the total budgeted costs of approximately \$24.2 million (including the fee-relief activities) by the total number of licensees (122). This results in an annual fee (rounded) of \$198,000 per license.

Part 171 Annual Fees

Fuel Facilities

Section III.B.2.c

Table VIII

Table IX

Table X

The FY 2019 budgeted cost to be recovered in the annual fees assessment to the fuel facility class of licenses [which includes licensees in fee categories 1.A.(1)(a), 1.A.(1)(b), 1.A.(2)(a), 1.A.(2)(b), 1.A.(2)(c), 1.E., and 2.A.(1), under §171.16] is approximately \$24.8 million. This value is based on the full cost of budgeted resources associated with all activities that support this fee class, which is reduced by estimated part 170 collections and adjusted for allocated generic transportation resources, and the fee relief surcharge.

Notes:

- 1 Centrus ACP is licensed, but not proceeding with construction.
- 2 Global Laser Enrichment is licensed, but not proceeding with construction.
- 3 International Isotopes is licensed, but not proceeding with construction.
- 4 The license for AREVA Eagle Rock was terminated.
- 5 Global Nuclear Fuels effort factors for safeguards made consistent with other LEU facilities
- 6 NFS factors for Scrap/Waste changed to be consistent with BWXT

** I hereby agree that the operating licenses noted above are in agreement with the operating and billable licenses in the Web-Based Licensing (WBL) system.

Division Director, FCSE

Part 171 Annual Fees

Uranium Recovery Facilities

Section III.B.2.d

Table XI

Table XII

Table XIII

Table XIV

The total FY 2019 budgeted cost to be recovered through annual fees assessed to the uranium recovery class [which includes licensees in fee categories 2.A.(2)(a), 2.A.(2)(b), 2.A.(2)(c), 2.A.(2)(d), 2.A.(2)(e), 2.A.(3), 2.A.(4), 2.A.(5) and 18.B., under § 171.16], is approximately \$170,000 (rounded).

Of the required annual fee collections, \$120,000 is assessed to DOE's Uranium Mill Tailings Radiation Control Act (UMTRCA) under fee category 18.B. The remaining \$49,000 (rounded) would be recovered through annual fees assessed to the other licensees in this fee class (i.e., conventional mills, in-situ recovery facilities, 11e.(2) mill tailings disposal facilities (incidental to existing tailings sites), and a uranium water treatment facility.)

Part 171 Annual Fees

Research and Test Reactors

Section III.B.2.e

Table XV

- Approximately \$316,000 in budgeted costs is to be recovered through annual fees assessed to the research and test reactor class of licenses for FY 2019. This required annual fee recovery amount is divided equally among the four research and test reactors subject to annual fees, and results in a FY 2019 annual fee of \$79,000 for each licensee.

DETERMINATION OF ANNUAL FEE

BUDGETED COSTS

\$316,054

ANNUAL FEE PER LICENSE (rounded)

(Budgeted costs divided by number of test and research reactor licensees subject to annual fee)

\$81,300

NOTE: Does not include License R-38 (TRIGA MARK I), Docket No. 50-89, issued to General Atomics. License R-38 was amended in 1997 to authorize possession only.

Part 171 Annual Fees

Rare Earth Facilities

Section III.B.2.f

During FY 2016 NRC did receive an application under the Rare Earth fee class 2.A. (2)(f). However, no FY 2019 budgetary resources were allocated to this fee class, and did not require an annual fee to be established.

NRC revised the fee category for this fee class from 2.A.(2)(c) to 2.A.(2)(f) in FY 2009.

Part 171 Annual Fees

Materials Users

Section III.B.2.g

Table XVI

The following fee categories under §171.16 are included in this fee class: 1.C., 1.D., 1.F., 2.B., 2.F., 3.A. through 3.S., 4.A. through 4.C., 5.A., 5.B., 6.A., 7.A. through 7.C., 8.A., 9.A. through 9.D., 16, and 17. The annual fee for these categories of materials users licenses is developed as follows:

Annual fee = Constant x [Application Fee + (Average Inspection Cost / Inspection Priority)] + Inspection Multiplier x (Average Inspection Cost / Inspection Priority) + Unique Category Costs.

To equitably and fairly allocate the \$36.5 million in FY 2019 budgeted costs to be recovered in annual fees assessed to the approximately 2,600 diverse materials users licensees, the NRC continues to calculate the annual fees for each fee category within this class based on the 10 CFR part 170 application fees and estimated inspection costs for each fee category. Because the application fees and inspection costs are indicative of the complexity of the material license, this approach provides a proxy for allocating the generic and other regulatory costs to the diverse fee categories. This fee calculation method also considers the inspection frequency (priority), which is indicative of the safety risk and resulting regulatory costs associated with the categories of licenses.

Part 171 Annual Fees

Transportation

Section III.B.2.h

Table XVII

Table XVIII

Consistent with the policy established in the NRC's FY 2006 final fee rule, the NRC will recover generic transportation costs unrelated to DOE as part of existing annual fees for license fee classes. NRC will continue to assess a separate annual fee under §171.16, fee category 18.A., for DOE transportation activities.

The resources associated with generic transportation activities are distributed to the license fee classes based on the number of Certificates of Compliance (CoCs) benefiting (used by) that fee class, as a proxy for the generic transportation resources expended for each fee class. The amount of the generic resources allocated is calculated by multiplying the percentage of total CoCs used by each fee class (and DOE) by the total generic transportation resources to be recovered.

TRANSPORTATION ANNUAL FEES

FY 2019

The total transportation budgeted costs of \$4,734,403 to be recovered from annual fees (not including fee-relief adjustments) is to be obtained from two sources:

1. Department of Energy (DOE)—has own annual fee (fee category 18A)
2. Other licensees (included in their annual fees)

Distribute these costs to DOE and the fee classes based on the percentage of CoCs benefitting (used) per fee class:

Fee Class	# CoCs	% CoCs	Transportation Resources to be included in annual fees	Resources in Millions
DOE	22.00	24.6%	\$1,163,554	\$1.2
Operating Reactors	5.00	5.6%	\$264,444	\$0.3
Spent fuel/reactor decom	14.00	15.6%	\$740,444	\$0.7
T&R reactors	0.52	0.6%	\$27,297	\$0.0
Fuel Facilities	24.00	26.8%	\$1,269,332	\$1.3
Materials Users	24.00	26.8%	\$1,269,332	\$1.3
Total	89.52	100.0%	\$4,734,403	\$4.7

Regulatory Flexibility Analysis

Section IV.

The Regulatory Flexibility Act (RFA), as amended 5 U.S.C. § 601 *et seq.*, requires that agencies consider the impact of their rulemakings on small entities and, consistent with applicable statutes, consider alternatives to minimize these impacts on the businesses, organizations, and government jurisdictions to which they apply.

Additionally, the Small Business Regulatory Enforcement Fairness Act (SBREFA) requires all Federal agencies to prepare a written compliance guide for each rule for which the agency is required to prepare a regulatory flexibility analysis. Therefore, in compliance with the law, the NRC has made publicly available via ADAMS the "FY 2019 Small Entity Compliance Guide".

Licensees may use this guide to determine whether they qualify as a small entity under NRC regulations and are eligible to pay reduced FY 2019 annual fees assessed under 10 CFR part 171. The NRC has established two tiers of annual fees for those materials licensees who qualify as small entities under the NRC's size standards.

Note: Using the FY 2009 calculation method Implemented to Determine Upper Tier Small Entity Fee Each Biennial Year To Be 39 % Of The Prior Two-year Weighted Average Of Small Materials Users Fees.

	1D	2B	2C	2E	2F	3A	3B	3C	3E	3G	3H	3I	3J	3K	3M
2016 small entities	7	1	4	1	2	0	7	13	0	0	10	17	1	0	16
2017 small entities	6	1	4	1	4	0	7	13	0	0	10	17	1	0	16
2017 Total # of Licensees	43	10	18	1	39	3	32	37	59	7	33	69	6	3	85
	13.95%	10.00%	22.22%	100.00%	10.26%	0.00%	21.88%	32.43%	0.00%	0.00%	21.21%	15.94%	16.67%	0.00%	15.29%
2016 Fee	\$8,100	\$3,600	\$6,800	\$8,300	\$7,700	\$30,500	\$12,800	\$13,500	\$10,000	\$107,900	\$12,300	\$18,200	\$4,700	\$3,500	\$12,300
2017 Fee	\$8,600	\$3,400	\$5,500	\$8,000	\$9,400	\$30,500	\$11,600	\$12,900	\$10,800	\$95,700	\$11,800	\$16,300	\$4,600	\$3,300	\$14,800

Implementing this method in FY 2019 resulted in a 13 percent and 6% increase from the previous year small entity.

	Prior Year	21% ceiling	Increase	Rounded Fee

Budget Authority (FY 2019)

The table below delineates where the major portion of a Business Line's direct budgetary resources are allocated when calculating 10 CFR Part 171 fees for a license fee class. The indirect portion of a Business Line (e.g. Training, Travel, Mission Support and Supervisors), as well as Corporate Support and Inspector General budgetary resources, are distributed among all license fee classes.

CROSSWALK OF BUSINESS LINES' ALLOCATION TO FEE CLASSES*

Business Line	License Fee Class
Operating Reactors	Power Reactors, Test and Research Reactors, Import/Export
New Reactors	Power Reactors
Fuel Facilities	Fuel Facilities
Nuclear Materials Users	Materials Users, Import/Export
Spent Fuel Storage and Transportation	Spent Fuel Storage/Reactor Decommissioning, Transportation
Decommissioning and Low-level Waste	Spent Fuel Storage/Reactor Decommissioning, Uranium Recovery

**Delineates where the major portion of a Business Line's direct budgetary resources are allocated for a license fee class. Does not include fee-relief allocation. NRC does not have licensees under the Rare Earth fee class.*

More information about 10 CFR Part 170 and 10 CFR Part 171 can be found at NRC's public website: <http://www.nrc.gov/about-nrc/regulatory/licensing/fees.html>.

Budget Authority (FY 2019)

FY 2019 Budget Summary by Program

This report is provided as supplemental information. It provides a summary of the FY 2019 budgeted FTE and contract dollars allocated to each fee class and fee-relief/surcharge activities at the Program level. The Programs include: 1) Nuclear Reactor Safety, 2) Nuclear Materials & Waste Safety, 3) Corporate Support, and 4) Inspector General.

Budget Authority (FY 2019)

FY 2019 Budget by Product Line

These reports are provided as supplemental information. They provide a summary of the FY 2019 budgeted FTE and contract dollars by Product Line and allocated by: 1) the Nuclear Reactor Safety Program and the Nuclear Materials & Waste Safety Program, 2) Corporate Support, 3) Inspector General, by each office with mission direct budgeted resources.

The offices include:

- Office of Inspector General
- Office of Research
- Office of Nuclear Reactor Regulations
- Office of New Reactors
- Regional Offices
- Office of Nuclear Material Safety and Safeguards
- Office of Nuclear Security and Incident Response
- Office of General Counsel
- Advisory Committee on Reactor Safeguards
- Office of International Programs
- Office of Enforcement
- Office of Investigations
- Atomic Safety and Licensing Board
- Office of the Chief Human Capital Officer
- Office of Administration

Omnibus Budget Reconciliation Act of 1990 (OBRA-90)

Referenced throughout the proposed rule

This document is provided as supplemental information. The proposed amendments to 10 CFR Parts 170 and 171 are necessary to implement the Omnibus Budget Reconciliation Act of 1990 (OBRA-90), as amended. The OBRA-90, as amended, requires that the NRC recover approximately 90 percent of its budget authority in fiscal year 2019, less the amounts appropriated for Waste Incidental to Reprocessing, Defense Nuclear Facilities Safety Board, Nuclear Waste Fund, and amounts appropriated for generic homeland security activities.

Court Decision, 1993

Allied Signal, Inc. v. NRC and Combustion Engineering v. NRC

This document is provided as supplemental information. In 1990 Congress required the NRC to collect annual charges and user fees approximating 100 percent of the agency's budget, effective for fiscal year 1991. NRC's FY 1991 fee rule imposed annual charges against virtually all of the agency's licensees in an effort to be more fair and equitable. Previously, it had levied annual charges only on operating nuclear power reactors, which constitute the most significant group of NRC licensees.

On July 10, 1991 (56 FR 31472), the NRC published a final rule in the *Federal Register* that established the Part 170 professional hourly rate and the materials licensing and inspection fees, as well as the Part 171 annual fees, to be assessed to recover approximately 100 percent of the FY 1991 budget. In addition to establishing the FY 1991 fees, the final rule established the underlying basis and methodology for determining both the Part 170 hourly rate and fees and the Part 171 annual fees. The FY 1991 rule was challenged in Federal court by *Allied Signal, Inc. v. NRC* and *Combustion Engineering v. NRC*.

The court remanded two issues to the NRC for further consideration. Despite the remand, the court did not vacate the rule. One of the remanded issues related to the exemption from annual fees for nonprofit educational institutions. The second remand issue dealt with LLW disposal costs.

UNITED STATES COURT OF APPEALS FOR THE DISTRICT OF COLUMBIA
 CIRCUIT

300 U.S. App. D.C. 194; 983 F.2d 146; 1993 U.S. App. LEXIS 4684

November 5, 1992, Argued
 March 16, 1993, Decided

PRIOR HISTORY: [*1] Petitions for Review of An Order of the U.S. Nuclear Regulatory Commission.

COUNSEL: John Hoff, with whom Leonard A. Miller was on the brief, for petitioner Allied Signal, Inc. in Nos. 91-1407 and 92-1019.

Harold F. Reik, with whom Michael F. Healy was on the brief, for petitioner Combustion Engineering, Inc. in Nos. 91-1435 and 92-1001.

L. Michael Ruffly, with whom William C. Parler, General Counsel, John F. Cordes, Sr., Solicitor, and E. Leo Staggie, Deputy Solicitor, U.S. Nuclear Regulatory Commission, and Katherine Adams, Attorney, Department of Justice, were on the brief, for respondents.

JUDGES: Before: Silberman, Williams and D.H. Ginsburg, Circuit Judges. Opinion for the Court filed by Circuit Judge Williams.

OPINION BY: WILLIAMS

OPINION:

[*148] Williams, Circuit Judge

Congress has directed the Nuclear Regulatory Commission to recover 100% of its costs from those who

receive its regulatory "services" and to allocate the costs "fairly and equitably" among those recipients. Petitioners Allied Signal and Combustion Engineering challenge an NRC rule making that allocation; they also attack the NRC's denial of various requested exemptions from the fees. They allege that the Commission's [*2] actions did not satisfy Congress's "fair[] and equitable" standard and also were arbitrary and capricious. We agree in part and remand the case to the Commission.

Under authority granted in the Independent Offices Appropriation Act of 1952 ("IOAA"), 51 U.S.C. § 9701, the Commission has long charged fees to any person who received a "service or thing of value" from the Commission. (That term includes, perhaps synonymously, "regulatory services" such as permit processing.) In 1983, Congress expanded the NRC's recovery authority in the Consolidated Omnibus Budget Reconciliation Act of 1985 ("COBRA"), Pub. L. No. 99-272, 100 Stat. 147, and authorized it to recover 33% of its total annual budget through fees. Because IOAA fees could not generate that sum, Congress allowed the NRC to assess fees not only for the service-specific costs covered by IOAA but also for the Commission's generic costs of operation (e.g., costs associated with rulemaking proceedings or safety research). Later acts raised the budget recovery level to 45% for the years 1988 through 1990. In carrying out the 33% and 45% recovery mandates, the Commission imposed fees for [*3] generic costs only on licensees who operated nuclear

power reactors, reasoning that they absorbed the most regulatory resources. See *Florida Power and Light Co. v. United States*, 289 U.S. App. D.C. 377, 846 F.2d 763 (D.C. Cir. 1988).

¶1 See *Cummins Budget Reconciliation Act of 1987*, Pub. L. No. 100-202, 101 Stat. 1330-273; *Cummins Reconciliation Act of 1989*, Pub. L. No. 101-239, 105 Stat. 2132.

In the 1990 *Cummins Reconciliation Act* ("1990 OBRA"), Pub. L. No. 101-508, 104 Stat. 1334-299, Congress raised the recovery mandate for 1991-95 to 100% of the Commission's budget, see Pub. L. No. 101-508, § 6101 (codified at 42 U.S.C. § 2214), and told the Commission to promulgate a rule apportioning the generic fees "fairly and equitably" among licensees. *Id.* at § 6101(c)(3) (codified at 42 U.S.C. § 2214(c)(3)). The legislation further said that "to the maximum extent practicable, the charges [imposed by the rule] shall have a reasonable [*4] relationship to the cost of providing regulatory services and may be based on the allocation of the Commission's resources among licensees or classes of licensees." *Id.* After notice and comment, the Commission issued a rule purporting to carry out these directions. In doing so, it imposed fees on virtually all licensees. See *Revision of Fee Schedules*, 100% Fee Recovery (the "Final Rule"), 56 Fed. Reg. 31,472 (July 10, 1991) (codified at 10 CFR §§ 52, 71, 170, and 171).

[*4a] 1

Allied, a uranium hexafluoride (UF) converter, first complains about the Commission's failure to consider the inability of UF converters to "pass through" OBRA fees to customers—i.e., to recoup them in whole or in part by raising prices. Allied asserts that the Commission's treatment of the issue was inconsistent with OBRA and also with the NRC's treatment of other licensees' pass-through capability.

Allied's claim rests on simple facts. It explains that domestic UF converters compete with foreign UF converters who are not subject to NRC licensing and thus are not required to pay NRC fees. Competition, it says, is stiff, success in bidding on UF conversion contracts often turns on [*5] differentials as small as one cent per pound. Fees imposed under the Final Rule, however, add up to almost five cents per pound of UF. Because adding

the fee to their prices will drive customers to foreign converters, domestic UF converters cannot pass the cost forward. Allied draws a sharp contrast between UF converters and other NRC licensees such as electric utilities, which it says are readily able to pass the cost on to customers. The Commission disputes none of these assertions.

Allied's statutory theory rests both on the 1990 OBRA and on the legislative history of 1986 COBRA—the latter being explicitly linked to the 1990 OBRA via its legislative history. Section 6201(c)(3) of the 1990 OBRA (codified at 42 U.S.C. § 2214(c)(3)) provides that

the Commission shall establish, by rule, a schedule of charges fairly and equitably allocating the aggregate amount of charges — [necessary to recoup 100% of the Commission's budget].

(Emphasis added.) The Conference Report to the 1990 OBRA states that the Commission has "the discretion — to assess actual charges against all of its licensees." H.R. Conf. Rep. No. 964, 101st Cong., [*6] 21 Stat. (1990), at 961. At the same time, however, the Report expressly "affirms the statement of the [floor] managers [of 1986 COBRA] on the present authority" of the NRC to assess fees. *Id.* That statement in turn declared that it was the "intention of the conferees that, because certain Commission licensees, such as universities, hospitals, research and medical institutions, and uranium producers have limited ability to pass through the costs of their charges to the ultimate consumer, the Commission should take this factor into account in determining whether to modify [its] current fee schedule for such licensees." 132 Cong. Rec. H57913 (March 6, 1986) (emphasis added).

The statutory language and legislative history do not, in our view, add up to an inescapable mandate to protect classes of licensees with limited ability to pass fees forward. Even the 1986 legislative history, written in the context of COBRA's less-demanding 33% recovery mandate, only directed the Commission to "take — account" of pass-through considerations, which would not necessarily entail that those considerations control. Moreover, the 1990 Conference Report explicitly said that Congress preserved [*7] NRC's discretion to impose fees on "one or more classes of

non-power-reactor licensees if the Commission believes it can fairly, equitably, and practicably do so." H.R. Conf. Rep. No. 964, 101st Cong., 2d Sess. (1990), at 961. Even if we were to give the legislative history great weight, we could not conclude that Congress has "directly spoken" to whether the Commission must spare licensees that cannot pass the fees forward. See *Cheney v. Natural Resources Defense Council*, 467 U.S. 837, 842, 81 L. Ed. 2d 694, 104 S. Ct. 2778 (1984). The question therefore is whether the Commission's interpretation is reasonable. See *id.* at 845; *Chemical Manufacturers Ass'n v. EPA*, 287 U.S. App. D.C. 49, 919 F.2d 154, 163-65 (D.C. Cir. 1990).

The Commission offered two justifications for its decision to disregard the pass-through concerns of UF converters. First, it argued that it could not adjust fees based on competitive impact because the 100% recovery mandate of 1990 CBRA, "[150] would require any abatement of fees for one class of licensees to be recouped from others. See Final Rule, 56 Fed. Reg. at 31,476; Letter of NRC Denying Allied Exemption Request at 3-4. However, while one could argue that it is unfair to charge any licensee more than its pro rata share of generic costs (and not unfair to excuse some regulated from paying all of their pro rata share when less than 100 percent must be recovered), that potential explanation does not carry the day here. The Commission's willingness to make an exemption for nonprofit educational institutions belies the assertion that it will not charge any licensee more than its pro rata share.

Nonetheless, the Commission also pointed to an entirely legitimate concern—the difficulty of assessing the ability of its 9000 licensees to pass through costs. See NRC Denial of Allied Exemption Request at 4. A firm's ability to pass through a burden to its customers depends on the price elasticities of supply and demand. "Inelastic suppliers and demanders pay taxes." Donald R. McCloskey, *The Applied Theory of Price* 334 (1982). (While the fees are technically not taxes, the same principle applies to costs generally.) Because these elasticities are typically hard to discover with much confidence, the Commission's refusal to read the statute as a rigid mandate to do so is not only understandable [**9] but reasonable.

It does not follow, however, that the Commission's application of the statute was in every respect reasonable. If capacity to pass the fees through can be discerned with reasonable accuracy and at reasonable cost for

specific classes of licensees, there appears no reason why the Commission should not do so. In fact, the Commission *has* made such a determination for another class of licensees, even though that class's claim seems not better founded than the claim of the domestic UF converters.

Specifically, in the Final Rule the Commission exempted nonprofit educational institutions from payment of certain 1990 CBRA fees. See 56 Fed. Reg. at 31,487-1-2, 31,491-1-2; 10 CFR § 171.11(a). This appears to be based at least in part on the rationale that such institutions "have a limited ability to pass [fees] costs on to others." Final Rule, 56 Fed. Reg. at 31,477-1-2 (1991). *Id.* See also 56 Fed. Reg. at 31,487-2 (speaking of educational institutions' "limited ability to pass regulatory costs through to their clients").

12 This passage refers to the service-specific fees, but no independent justification for the exemption from generic costs appears, and the Commission here seems to assume that the explanation extends to the generic. See Commission Brief at 8, 19-21.

[**10]

The Commission nowhere explains how it was able to make this finding for non-profits but is not able to resolve the elasticity claim one way or the other for domestic UF converters. The Commission does not so much as hint at data relating to the markets in which educational institutions serve their "clients." *13* Neither does the Commission explain why a demand elasticity calculation was any easier or less costly to complete for educational institutions than for UF converters. Thus the Commission's denial of relief for UF converters, both as to rate-making and the exemption aspect, cannot be viewed as reasoned decision-making.

13 We note that for educational institutions with certain types of licensees, the exemption is unavailable with respect to activities such as "recreational services — [performed for] other persons" and "activities performed under a Government contract." See 10 CFR § 171.13(a)(2) & (4). This exclusion from the exemption, however, is limited to specific types of licensees, namely "byproduct, source or special

nuclear material licenses."

[*11]

An inadequately supported rule, however, need not necessarily be vacated. See, e.g., *International Union, UMW v. FACA*, 287 U.S. App. D.C. 168, 920 F.2d 960, 966-67 (D.C. Cir. 1990); *Maryland People's Council v. FERC*, 247 U.S. App. D.C. 333, 758 F.2d 451, 455 (D.C. Cir. 1985); *ICORE, Inc. v. FCC*, 985 F.2d 1075, Slip Op. at 12 (D.C. Cir. 1993). The decision whether to vacate depends on "the seriousness of the order's deficiencies (and thus the extent of doubt whether the agency chose correctly) and the disruptive consequences of an interim [*15] change that may itself be changed." *International Union*, 920 F.2d at 967.

It is conceivable that the Commission may be able to explain how the principles supporting an exemption for educational institutions do not justify a similar exemption for domestic UF converters. For example, the Commission may develop a reasoned explanation based on an alternative justification that it offered for the non-profit educational institutions' exemption—that "educational research provides an important benefit to the nuclear industry and the public at large and should not be discouraged." 56 Fed. Reg. at 31,477 [*12]. If, while this reference is quite vague—the benefits of UF conversion can hardly be determined merely because the converter operates in a conventional market—perhaps the Commission's focus is on education, with the idea that education yields exceptionally large externalized benefits that cannot be captured in tuition or other market prices. We cannot tell at this point whether the exemption for educational institutions could be reasonably rooted in such a theory, but there is at least a serious possibility that the Commission will be able to substantiate its decision on remand.

At the same time, the consequences of vacating may be quite disruptive. Even assuming that we could merely vacate the rule insofar as it denies an exemption for UF converters, the Commission would need to refund all 1990 OBRA fees collected from those converters; in addition it evidently would be unable to recover those fees under a later-enacted rule. See *Bowen v. Georgetown University Hospital*, 483 U.S. 204, 208-09, 102 L. Ed. 2d 493, 109 S. Ct. 468 (1988), (rejecting retroactive application of rules even if operating only to cure defects in previously enacted rule). Therefore, because of the

possibility [*15] that the Commission may be able to justify the Rule, and the disruptive consequences of vacating, we remand to the Commission for it to develop a reasoned treatment of exemption claims based on pass-through limitations.

Combustion Engineering also raised a related pass-through argument—that long-term fixed price contracts in its sector of the industry constrain its ability to pass through costs and therefore require some sort of gradual phase-in. See *Comments of Combustion Engineering*, May 13, 1991 at 2. On remand, the Commission must address this claim as well.

II

Allied also argues that the Commission's apportionment of fees within the class of domestic UF converters violated the 1990 OBRA. Allied argues (again without dispute by the Commission) that it has required much less regulatory attention than the only other member of the UF converter class, the Sargoyah Fleck Corporation, because of the latter's environmental problems. See NRC Denial of Allied Exemption Request at 7. Thus, Allied says, allocation of the fees equally between the two UF converters violated the 1990 OBRA's directives that OBRA charges be apportioned "fairly and equitably" and that "to the maximum extent [*14] practicable, the charges shall have a reasonable relationship to the cost of providing regulatory services." Pub. L. No. 101-508, § 6101(c)(3) (codified at 42 U.S.C. § 2214(c)(3)). Allied contends that the Commission instead ought to have divided the class's fees either in proportion to the amount of NRC attention required by each converter or in proportion to the service-specific (IOAA) fees paid by the two converters.

Allied's argument fails because it disregards the premise that 1990 OBRA fees are not service-specific: they do not relate to identifiable services but rather constitute generic costs. See Final Rule, 56 Fed. Reg. at 31,472. Assuming that the Commission correctly classified the costs in question (and Allied does not contest the classification), there is a presumption that even regulatory effort precipitated by the circumstances of a single licensee of a given class will yield results, such as research findings or regulations, of roughly equal importance for all members of the same class.

[*15] This conclusion is not undermined by the Commission's willingness to apportion 1990 OBRA fees

between groups [*15] of licensees on the basis of the surcharge required by each group. See Final Rule, 56 Fed. Reg. at 31,476; Letter of NRC Denying Allied Exemption Request at 2, 4-5. First, the spillover of benefits seems far greater within a group of licensees than between groups. See *id.* at 5. Second, the administrative costs of group-level apportionment are obviously much lower than licensee-level apportionment because the number of licensees greatly exceeds the number of groups.

Here, neither of the measuring devices proposed by Allied was workable or accurate enough to warrant our holding the Commission's rejection of these arbitrary or capricious. Any correlation between a licensee's IDAA (licensee-specific) costs and its benefits from generic costs seems purely coincidental. And to use as a yardstick each licensee's tendency to precipitate regulatory effort would not only disregard spillover effects but would raise exceptional measurement problems. See NRC Denial of Allied Exemption Request at 4-8.

III

Allied makes a narrower attack on the Commission's rejection of intra-group apportionment, namely that the Commission was arbitrary and capricious in failing [*16] to apportion the generic costs associated with the disposal of low level radioactive waste ("LLW") on the basis of each licensee's actual waste. See Final Rule, 56 Fed. Reg. at 31,497; 10 CFR § 171.16(c). At the class level, the Commission allocated costs in accordance with each class's contribution to the total quantity of LLW. Because materials licensees (a group that includes UF converters) collectively generate 40% of the nation's LLW, the Commission allocated 40% of its LLW costs to that class. See *id.* When it turned to apportionment of those fees among the materials licensees, however, the Commission abandoned that approach and simply assessed each large fuel facility (of which Allied is one) an identical charge of \$ 143,500. For explanation, the NRC offered only the conclusory statement that "the Commission ... believes ... the surcharge should be the same for all large fuel facility licensees." See Final Rule, 56 Fed. Reg. at 31,481.

The Commission provides no rationale for apportioning costs among classes of LLW producers on the basis of LLW output but refusing to apply that same yardstick in apportioning generic costs [*17] within

classes, and no rationale is readily apparent. While it is conceivable that the real benefit of LLW disposal services is merely the availability of such services—in which case a flat fee would make sense—any such idea is inconsistent with the Commission's method of apportioning LLW fees among classes of licensees, which appears to assume that benefit is proportional to LLW quantity. If, on the other hand, any licensee's benefit from LLW disposal is directly proportional to its LLW disposal, apportioning even generic costs on the basis of output seems to make sense—not only as to classes but also as to individual licensees. Finally, assuming that the Commission calculated each class's quantity of LLW waste from data supplied by each licensee (as seems occasionally true), it is hard to see any administrative problem with apportioning the fees within the class on the basis of output; the data are available and the required computations would be rudimentary.

.... In applying the balancing of *International Union* and *Eike* cases, we here give little weight to the possibility that the Commission could pull a reasonable explanation out of the hat. Nonetheless, vacating the intra-class [*18] apportionment of LLW costs would give licensees a peculiar windfall: even ones that benefited from the Commission's choice would presumably be entitled to a refund, and, under *Georgetown University Hospital*, the LLW costs could be recovered from no one. To be sure, the costs are not great, absolutely or as a percentage of the Commission's \$ 463 [*19] million budget for FY 1991—\$ 3.8 million. See 56 Fed. Reg. at 31,486, 31,497. But that alone is hardly a reason to create such a windfall. Accordingly, we refrain from vacating the rule. If on remand the Commission concludes that the apportionment must be in accordance with usage, then those firms whose burden is lower under a new, non-arbitrary, rule should be entitled to refunds of the difference.

If indeed the remand leads to replacement of the per-licensee allocation, and licensees enjoy only refunds for the difference between liability under the old rule and liability under the new (rather than total refunds), it might be argued that such a result allows the new rule to have "retroactive effect", in violation of *Georgetown University Hospital*. See 488 U.S. at 208. That [*19] is, plainly, some retroactive effect. The effect, however, is only to define that aspect of the old rule that must be cut away as legally excessive. We do not read *Georgetown* as having so limited a retroactive impact.

IV

Finally, Combustion Engineering challenges the Commission's decision to allocate OBRA fees equally to each low enriched uranium (LEU) manufacturing license instead of dividing the fees equally among the LEU manufacturing facilities. Combustion owns and operates two LEU facilities, each separately licensed, and Combustion asserts that in the aggregate the two are operationally equivalent to the single-plant, single-license facilities of the other LEU manufacturers. As oral argument Combustion explained that it has two licenses for the facilities only because of historical chance; it bought a company with a separate license almost 20 years ago and until the Commission implemented the current OBRA fee schedule there has never been any reason to consolidate the licenses. As before, the Commission disputes none of these contentions.

Combustion attacks both the regulation imposing the "equal fee per license" rule and the Commission's denial of an exemption. [*20] Both claims rest ultimately on the 1990 OBRA's direction that fees must be apportioned "fairly and equitably" and that "to the maximum extent practicable... charges shall have a reasonable relationship to the cost of providing regulatory services." Pub. L. No. 101-508, § 6101(c)(3) (codified at 42 U.S.C. § 2214(c)(3)). Although we find the first claim unconvincing, we agree that the Commission has not justified its refusal to give the requested exemption.

The argument that the "equal fee per license" rule is "unfair and inequitable" is persuasive only on the ground that the rule produced troubling results when applied to Combustion's circumstances—which Combustion itself asserts are unusual. We see no reason for requiring the Commission to amend to that rather rare situation in the rule itself. cf. *NLRB v. Bell Aerospace Co.*, 416 U.S. 267, 40 L. Ed. 2d 134, 94 S. Ct. 1757 (1974), especially as the generic rule allowed (generically) for exemption. n4

n4 Insofar as Combustion argues, in parallel with Allied, that § 6101(c)(3) of OBRA generally requires intra-group apportionment on the basis of factors such as the amount of attention a licensee requires, the competitive position of the licensee, and the safety risks posed by the licensee's

activities, we reject it for the reasons stated as to Allied.

[**21]

Combustion's exemption argument, however, has merit. The Commission's own criteria call for an exemption if the licensee can show that "the assessment of the annual fee would result in a significantly disproportionate allocation of costs to the licensee." 10 CFR § 171.11(d). The double assessment against Combustion's two licenses increased its OBRA fees by \$ 836,500. Against this, the Commission is able to point to almost nothing by way of greater costs. Speaking to the issue in unusually murky, obfuscatory language, the NRC in substance could point to only two additional burdens—the need to mail an extra copy of certain NRC publications to the second facility and the need for two different NRC regional offices to monitor and respond to [*154] allegations about the two plants. See NRC Denial of Combustion Exemption Request at 5-6.

The double burden for Combustion, measured against *de minimis* additional burdens for the Commission, simply overcomes the hurdle established by 10 CFR § 171.11(d). n5 Thus the exemption denial is arbitrary and capricious. We therefore direct the Commission to grant an exemption for Combustion on the additional fees collected as a result of the double-licensing [*22] of its operation. n6

n5 10 CFR § 171.11(d) also contains two other factors that the Commission shall consider when evaluating an exemption request. Although parts of § 171.11(d) are ambiguous regarding whether an applicant must fulfill all, or only one, of the factors, the fact that an applicant could not "fulfill" the criterion listed in § 171.11(d)(3)—"any other relevant matter that the licensee believes shows that the annual fee was not based on a fair and equitable allocation of NRC costs"—reveals that the "factors" should not be read as conjunctive requirements. The factors listed seem to be best understood as independent considerations which can support an exemption.

n6 We are not required to address Allied's fee exemption request because of our previous disposition of Allied's other claims. The aspects of Allied's request dealing with postdisposal

ability and LLW fees are almost certain to stand or fall along with the remanded claims; and the aspect claiming that OBRA requires licensee-specific calibration of fees fails.

reasoned and coherent treatment of (1) licensees' claim for special treatment on the basis of inability to pass the burden of the fees through to customers; and (2) the method of apportioning generic LLW disposal costs among materials licensees. In addition, we direct the Commission to grant an exemption to Combustion for the generic fees attributable to the double-licensing of its LEU operation.

[**23]

We remand the case to the Commission for a

So ordered.
