Dear Sir or Madam:

By letter dated December 6, 2017 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML17340B321), as supplemented by letter dated June 29, 2018 (ADAMS Accession No. ML18180A271), you applied for an amendment to the Waterford Steam Electric Station, Unit 3, Facility Operating License No. 50-382. The proposed amendment would have revised Technical Specification 3/4.3.2 Table 4.3-2, "Engineered Safety Features Actuation System [ESFAS] Instrumentation Surveillance Requirements." The amendment would have removed from Note 3 of the table the exemption from testing ESFAS relays K114, K305, and K313 at power. Subsequently, by letter dated December 20, 2018 (ADAMS Accession No. ML18354B283), you withdrew the amendment request. Your letter states that the amendment request was withdrawn due to procurement delays to implement the plant modification required by the proposed amendment.

Before this license amendment request was withdrawn, the U.S. Nuclear Regulatory Commission (NRC) staff had conducted a partial review of the technical aspects of the request. This review is documented in an internal memorandum, which is located under ADAMS Accession No. ML18362A312 (not publicly available). Should you resubmit this license amendment request at a later date, it is advisable to refer to this withdrawal acknowledgement letter in your application so that staff may access the documentation of this partial review.

The NRC has filed the enclosed Notice of Withdrawal of Application for Amendment to Facility Operating License with the Office of the Federal Register for publication.

If you have any questions, please contact me at 301-415-1390 or via e-mail at [April.Pulvirenti@nrc.gov](mailto:April.Pulvirenti@nrc.gov).

Sincerely,
