**SUBJECT: INDIAN POINT ENERGY CENTER, UNIT 2 – OPERATOR LICENSING  
OPERATING TEST APPROVAL**

Dear Mr. Vitale:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examination for the operating test at the Indian Point Energy Center, Unit 2. Please note that written examination approval will be communicated under separate correspondence.

The U.S. Nuclear Regulatory Commission (NRC) has approved the subject operating test in accordance with Revision 11 to NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC staff will administer the operating tests during the weeks of February 4, 2019, and February 11, 2019. The list of applicants approved to take the examination has been provided to Mr. Leonard Beller, Training Manager.

The examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensed operators at your facility, do not administer the examination and contact me at 610-337-5306.

Please contact your Chief Examiner, Peter Presby, at 610-337-5392, if you have any questions or identify any errors or changes in the license level (reactor operator or senior reactor operator) or type of examination (partial or complete operating test) specified for each applicant approved to take the examination.

Sincerely,

**/RA/**
