## General Comment

Docket ID NRC-2018-0230

The idea to lower the amount of training to become an AU is outrageous. This will definitely decrease the quality of care that can be provided in Nuclear Medicine and theranostics. Lesser quality will lead to poorer outcomes which in turn will lead to the death of nuclear medicine and theranostics (if not patients as well). While it might be a nice idea to have more AU's, lessening the amount of required training is not the way to achieve this. Create an alternate pathway that actually provides the clinicians with the proper training to provide safe and effective patient care.

As a NM tech, we have enough issues finding competent AUs within our AU pool of those that have gone through the 700 hours of training!!
