General Comment

Nuclear Medicine is an important specialty with need for thorough and in-depth training of doctors. Any shortening or loosening of training will be at the cost of patients who will receive suboptimal care. As a patient, I totally disagree with taking specialized therapies out of hands of experts. Highly specialized treatments belong in the hands of highly specialized doctors, in this case thoroughly trained nuclear medicine physicians who have been recognized by the nuclear medicine board certification process.

Best Regards

Mahnoosh Jafari
