Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-20048-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/17/2016; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSSSU3P2-RSY10-U9-S901 (160-20048-1), TITO04-BS-FSSSU3P2-RSY10-U9-S902 (160-20048-2), TITO04-BS-FSSSU3P2-RSY10-U9-S903 (160-20048-3), TITO04-BS-FSSSU3P2-RSY10-U9-S904 (160-20048-4), TITO04-BS-FSSSU3P2-RSY10-U9-S905 (160-20048-5), TITO04-BS-FSSSU3P2-RSY10-U9-S906 (160-20048-6), TITO04-BS-FSSSU3P2-RSY10-U9-S907 (160-20048-7), TITO04-BS-FSSSU3P2-RSY10-U9-S908 (160-20048-8), TITO04-BS-FSSSU3P2-RSY10-U9-S909 (160-20048-9), TITO04-BS-FSSSU3P2-RSY10-U9-S910 (160-20048-10), TITO04-BS-FSSSU3P2-RSY10-U9-S911 (160-20048-11), TITO04-BS-FSSSU3P2-RSY10-U9-S912 (160-20048-12), TITO04-BS-FSSSU3P2-RSY10-U9-S913 (160-20048-13), TITO04-BS-FSSSU3P2-RSY10-U9-S914 (160-20048-14) and TITO04-BS-FSSSU3P2-RSY10-U9-S915 (160-20048-15) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 11/17/2016, prepared on 11/18/2016 and analyzed on 12/09/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

Definitions/Glossary

Client: CB&I Federal Services LLC
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-20048-2

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Method Summary

Client: CB&I Federal Services LLC
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-20048-2

Method	Method Description	Protocol	Laboratory
GA-01-R	Radium-226 & Other Gamma Emitters (GS)	DOE	TAL SL

Protocol References:

DOE = U.S. Department of Energy

Laboratory References:

TAL SL = TestAmerica St. Louis, 13715 Rider Trail North, Earth City, MO 63045, TEL (314)298-8566

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-19923-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/10/2016 8:30 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 18.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSSSU3-RSY11-U7-S701 (160-19923-1), TITO04-BS-FSSSU3-RSY11-U7-S702 (160-19923-2), TITO04-BS-FSSSU3-RSY11-U7-S703 (160-19923-3), TITO04-BS-FSSSU3-RSY11-U7-S704 (160-19923-4), TITO04-BS-FSSSU3-RSY11-U7-S705 (160-19923-5), TITO04-BS-FSSSU3-RSY11-U7-S706 (160-19923-6), TITO04-BS-FSSSU3-RSY11-U7-S707 (160-19923-7), TITO04-BS-FSSSU3-RSY11-U7-S708 (160-19923-8), TITO04-BS-FSSSU3-RSY11-U7-S709 (160-19923-9), TITO04-BS-FSSSU3-RSY11-U7-S710 (160-19923-10), TITO04-BS-FSSSU3-RSY11-U7-S711 (160-19923-11) and TITO04-BS-FSSSU3-RSY11-U7-S712 (160-19923-12) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 11/10/2016, prepared on 11/11/2016 and analyzed on 12/02/2016.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-20016-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

Case Narrative

Client: CB&I Federal Services LLC
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-20016-2

Job ID: 160-20016-2 (Continued)

Laboratory: TestAmerica St. Louis (Continued)

RECEIPT

The samples were received on 11/16/2016; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 18.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSSSU4P1-RSY10-U9-S901 (160-20016-1), TITO04-BS-FSSSU4P1-RSY10-U9-S902 (160-20016-2), TITO04-BS-FSSSU4P1-RSY10-U9-S903 (160-20016-3), TITO04-BS-FSSSU4P1-RSY10-U9-S904 (160-20016-4), TITO04-BS-FSSSU4P1-RSY10-U9-S905 (160-20016-5), TITO04-BS-FSSSU4P1-RSY10-U9-S906 (160-20016-6), TITO04-BS-FSSSU4P1-RSY10-U9-S907 (160-20016-7), TITO04-BS-FSSSU4P1-RSY10-U9-S908 (160-20016-8), TITO04-BS-FSSSU4P1-RSY10-U9-S909 (160-20016-9), TITO04-BS-FSSSU4P1-RSY10-U9-S910 (160-20016-10), TITO04-BS-FSSSU4P1-RSY10-U9-S911 (160-20016-11) and TITO04-BS-FSSSU4P1-RSY10-U9-S912 (160-20016-12) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 11/16/2016, prepared on 11/17/2016 and analyzed on 12/08/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-19954-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/11/2016; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 18.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSSSU4-RSY10-U8-S801 (160-19954-1), TITO04-BS-FSSSU4-RSY10-U8-S802 (160-19954-2), TITO04-BS-FSSSU4-RSY10-U8-S803 (160-19954-3), TITO04-BS-FSSSU4-RSY10-U8-S804 (160-19954-4), TITO04-BS-FSSSU4-RSY10-U8-S805 (160-19954-5), TITO04-BS-FSSSU4-RSY10-U8-S806 (160-19954-6), TITO04-BS-FSSSU4-RSY10-U8-S807 (160-19954-7), TITO04-BS-FSSSU4-RSY10-U8-S808 (160-19954-8), TITO04-BS-FSSSU4-RSY10-U8-S809 (160-19954-9), TITO04-BS-FSSSU4-RSY10-U8-S810 (160-19954-10), TITO04-BS-FSSSU4-RSY10-U8-S811 (160-19954-11), TITO04-BS-FSSSU4-RSY10-U8-S812 (160-19954-12), TITO04-BS-FSSSU4-RSY10-U8-S813 (160-19954-13), TITO04-BS-FSSSU4-RSY10-U8-S814 (160-19954-14), TITO04-BS-FSSSU4-RSY10-U8-S815 (160-19954-15), TITO04-BS-FSSSU4-RSY10-U8-S816 (160-19954-16), TITO04-BS-FSSSU4-RSY10-U8-S817 (160-19954-17), TITO04-BS-FSSSU4-RSY10-U8-S818 (160-19954-18), TITO04-BS-FSSSU4-RSY10-U8-S819 (160-19954-19) and TITO04-BS-FSSSU4-RSY10-U8-S820 (160-19954-20) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 11/11/2016, prepared on 11/14/2016 and analyzed on 12/05/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-20102-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/19/2016; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 17.5° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSSSU5-RSY11-U9-S901 (160-20102-1), TITO04-BS-FSSSU5-RSY11-U9-S902 (160-20102-2), TITO04-BS-FSSSU5-RSY11-U9-S903 (160-20102-3), TITO04-BS-FSSSU5-RSY11-U9-S904 (160-20102-4), TITO04-BS-FSSSU5-RSY11-U9-S905 (160-20102-5), TITO04-BS-FSSSU5-RSY11-U9-S906 (160-20102-6), TITO04-BS-FSSSU5-RSY11-U9-S907 (160-20102-7), TITO04-BS-FSSSU5-RSY11-U9-S908 (160-20102-8), TITO04-BS-FSSSU5-RSY11-U9-S909 (160-20102-9), TITO04-BS-FSSSU5-RSY11-U9-S910 (160-20102-10), TITO04-BS-FSSSU5-RSY11-U9-S911 (160-20102-11) and TITO04-BS-FSSSU5-RSY11-U9-S912 (160-20102-12) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 11/21/2016, prepared on 11/22/2016 and analyzed on 12/13/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Creator: Clarke, Jill C

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

Definitions/Glossary

Client: CB&I Federal Services LLC
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-20102-2

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Method Summary

Client: CB&I Federal Services LLC
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-20102-2

Method	Method Description	Protocol	Laboratory
GA-01-R	Radium-226 & Other Gamma Emitters (GS)	DOE	TAL SL

Protocol References:

DOE = U.S. Department of Energy

Laboratory References:

TAL SL = TestAmerica St. Louis, 13715 Rider Trail North, Earth City, MO 63045, TEL (314)298-8566

Laboratory: TestAmerica St. Louis

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-20643-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 1/10/2017 8:30 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-SU5P1-RSY10-U11-S001 (160-20643-1), TITO04-BS-SU5P1-RSY10-U11-S002 (160-20643-2), TITO04-BS-SU5P1-RSY10-U11-S003 (160-20643-3), TITO04-BS-SU5P1-RSY10-U11-S004 (160-20643-4), TITO04-BS-SU5P1-RSY10-U11-S005 (160-20643-5), TITO04-BS-SU5P1-RSY10-U11-S006 (160-20643-6), TITO04-BS-SU5P1-RSY10-U11-S007 (160-20643-7), TITO04-BS-SU5P1-RSY10-U11-S008 (160-20643-8), TITO04-BS-SU5P1-RSY10-U11-S009 (160-20643-9), TITO04-BS-SU5P1-RSY10-U11-S010 (160-20643-10), TITO04-BS-SU5P1-RSY10-U11-S011 (160-20643-11) and TITO04-BS-SU5P1-RSY10-U11-S012 (160-20643-12) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 01/10/2017, prepared on 01/11/2017 and analyzed on 02/01/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Number: 20643

List Source: TestAmerica St. Louis

List Number: 1

Creator: Clarke, Jill C

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-19855-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/04/2016; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-NP-FSS-SU3-BSRSY10-U7-S001 (160-19855-1), TITO04-NP-FSS-SU3-BSRSY10-U7-S002 (160-19855-2), TITO04-NP-FSS-SU3-BSRSY10-U7-S003 (160-19855-3), TITO04-NP-FSS-SU3-BSRSY10-U7-S004 (160-19855-4), TITO04-NP-FSS-SU3-BSRSY10-U7-S005 (160-19855-5), TITO04-NP-FSS-SU3-BSRSY10-U7-S006 (160-19855-6), TITO04-NP-FSS-SU3-BSRSY10-U7-S007 (160-19855-7), TITO04-NP-FSS-SU3-BSRSY10-U7-S008 (160-19855-8), TITO04-NP-FSS-SU3-BSRSY10-U7-S009 (160-19855-9), TITO04-NP-FSS-SU3-BSRSY10-U7-S010 (160-19855-10), TITO04-NP-FSS-SU3-BSRSY10-U7-S011 (160-19855-11), TITO04-NP-FSS-SU3-BSRSY10-U7-S012 (160-19855-12), TITO04-NP-FSS-SU3-BSRSY10-U7-S013 (160-19855-13), TITO04-NP-FSS-SU3-BSRSY10-U7-S014 (160-19855-14), TITO04-NP-FSS-SU3-BSRSY10-U7-S015 (160-19855-15), TITO04-NP-FSS-SU3-BSRSY10-U7-S016 (160-19855-16), TITO04-NP-FSS-SU3-BSRSY10-U7-S017 (160-19855-17), TITO04-NP-FSS-SU3-BSRSY10-U7-S018 (160-19855-18), TITO04-NP-FSS-SU3-BSRSY10-U7-S019 (160-19855-19) and TITO04-NP-FSS-SU3-BSRSY10-U7-S020 (160-19855-20) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 11/04/2016, prepared on 11/07/2016 and analyzed on 11/28/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-19909-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/9/2016 8:30 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-NP-SU5-SWFSS-5-13-S001 (160-19909-1), TITO04-NP-SU5-SWFSS-5-16-S002 (160-19909-2) and TITO04-NP-SU5-SWFSS-5-17-S003 (160-19909-3) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 11/09/2016, prepared on 11/11/2016 and analyzed on 12/02/2016.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-19909-3

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/9/2016 8:30 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Sample TITO04-NP-SU5-SWFSS-5-13-S001 (160-19909-1) was analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 11/09/2016, and prepared and analyzed on 01/12/2017.

Sample was recounted in duplicate to confirm original results.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-14443-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/23/2015 8:45 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI_TO04-BS-R-SU8-S017 (160-14443-1), TI_TO04-BS-R-SU8-S018 (160-14443-2), TI_TO04-BS-R-SU8-S020 (160-14443-3) and TI_TO04-BS-R-SU8-S021 (160-14443-4) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/23/2015, prepared on 10/26/2015 and analyzed on 11/16/2015.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

TestAmerica Job ID: 160-14443-2

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Method Summary

Client: CB&I Environmental & Infrastructure, Inc
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-14443-2

Method	Method Description	Protocol	Laboratory
GA-01-R	Radium-226 & Other Gamma Emitters (GS)	DOE	TAL SL

Protocol References:

DOE = U.S. Department of Energy

Laboratory References:

TAL SL = TestAmerica St. Louis, 13715 Rider Trail North, Earth City, MO 63045, TEL (314)298-8566

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-14512-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/28/2015; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 20.2 C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-FSS-BISU8-S001 (160-14512-1), TI-TO04-FSS-BISU8-S002 (160-14512-2), TI-TO04-FSS-BISU8-S003 (160-14512-3) and TI-TO04-FSS-BISU8-S004 (160-14512-4) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/28/2015, prepared on 10/30/2015 and analyzed on 11/20/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-14445-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/23/2015 8:45 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-BS-R-SU9-S008 (160-14445-1), TI-TO04-BS-R-SU9-S009 (160-14445-2), TI-TO04-BS-R-SU9-S010 (160-14445-3), TI-TO04-BS-R-SU9-S011 (160-14445-4), TI-TO04-BS-R-SU9-S019 (160-14445-5) and TI-TO04-BS-R-SU9-S020 (160-14445-6) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/23/2015, prepared on 10/26/2015 and analyzed on 11/16/2015.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Sample Receipt Checklist

Client: CB&I Environmental & Infrastructure, Inc

Job Number: 160-14445-2

Login Number: 14445

List Number: 1

Creator: Clarke, Jill C

List Source: TestAmerica St. Louis

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-17266-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

Case Narrative

Client: CB&I Environmental & Infrastructure, Inc
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-17266-2

Job ID: 160-17266-2 (Continued)

Laboratory: TestAmerica St. Louis (Continued)

Revision 1: Sample ID was logged in incorrectly: TI-TO04-BS-R-FSS-SWSU9-S9-18 (160-17266-3). The error was not caught during login review. The reports and EDDs have been revised.

RECEIPT

The samples were received on 5/6/2016 8:30 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-BS-R-FSS-SWSU9-S9-16 (160-17266-1), TI-TO04-BS-R-FSS-SWSU9-S9-17 (160-17266-2) and TI-TO04-BS-R-FSS-SWSU9-S9-18 (160-17266-3) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 05/06/2016, prepared on 05/11/2016 and analyzed on 06/01/2016.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Sample Receipt Checklist

Client: CB&I Environmental & Infrastructure, Inc

Job Number: 160-17266-2

Login Number: 17266

List Number: 1

Creator: Clarke, Jill C

List Source: TestAmerica St. Louis

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

Definitions/Glossary

Client: CB&I Environmental & Infrastructure, Inc
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-17266-2

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Method Summary

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-14498-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/27/2015; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 20.1 C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-BS-FSS-SU1-S001 (160-14498-1), TI-TO04-BS-FSS-SU1-S002 (160-14498-2), TI-TO04-BS-FSS-SU1-S003 (160-14498-3), TI-TO04-BS-FSS-SU1-S004 (160-14498-4), TI-TO04-BS-FSS-SU1-S005 (160-14498-5), TI-TO04-BS-FSS-SU1-S006 (160-14498-6), TI-TO04-BS-FSS-SU1-S007 (160-14498-7), TI-TO04-BS-FSS-SU1-S008 (160-14498-8), TI-TO04-BS-FSS-SU1-S009 (160-14498-9), TI-TO04-BS-FSS-SU1-S010 (160-14498-10), TI-TO04-BS-FSS-SU1-S011 (160-14498-11), TI-TO04-BS-FSS-SU1-S012 (160-14498-12), TI-TO04-BS-FSS-SU1-S013 (160-14498-13), TI-TO04-BS-FSS-SU1-S014 (160-14498-14), TI-TO04-BS-FSS-SU1-S015 (160-14498-15), TI-TO04-BS-FSS-SU1-S016 (160-14498-16), TI-TO04-BS-FSS-SU1-S017 (160-14498-17), TI-TO04-BS-FSS-SU1-S018 (160-14498-18), TI-TO04-BS-FSS-SU1-S019 (160-14498-19) and TI-TO04-BS-FSS-SU1-S020 (160-14498-20) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/27/2015, prepared on 10/29/2015 and analyzed on 11/19/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-21509-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 3/17/2017 8:45 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-RSY15-U8-BS-FSSSU6-S001 (160-21509-1), TITO04-RSY15-U8-BS-FSSSU6-S002 (160-21509-2), TITO04-RSY15-U8-BS-FSSSU6-S003 (160-21509-3), TITO04-RSY15-U8-BS-FSSSU6-S004 (160-21509-4), TITO04-RSY15-U8-BS-FSSSU6-S005 (160-21509-5), TITO04-RSY15-U8-BS-FSSSU6-S006 (160-21509-6), TITO04-RSY15-U8-BS-FSSSU6-S007 (160-21509-7), TITO04-RSY15-U8-BS-FSSSU6-S008 (160-21509-8), TITO04-RSY15-U8-BS-FSSSU6-S009 (160-21509-9), TITO04-RSY15-U8-BS-FSSSU6-S010 (160-21509-10), TITO04-RSY15-U8-BS-FSSSU6-S011 (160-21509-11) and TITO04-RSY15-U8-BS-FSSSU6-S012 (160-21509-12) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 03/17/2017, prepared on 03/20/2017 and analyzed on 04/11/2017 and 04/12/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Sample Receipt Checklist

Client: CB&I Federal Services LLC

Job Number: 160-21509-2

Login Number: 21509

List Source: TestAmerica St. Louis

List Number: 1

Creator: Clarke, Jill C

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Aptim Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-24995-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/13/2017; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 16.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSS-SU7A-U1-S007 (160-24995-1), TITO04-BS-FSS-SU7A-U1-S008 (160-24995-2), TITO04-BS-FSS-SU7A-U1-S009 (160-24995-3), TITO04-BS-FSS-SU7A-U1-S010 (160-24995-4), TITO04-BS-FSS-SU7A-U1-S011 (160-24995-5) and TITO04-BS-FSS-SU7A-U1-S012 (160-24995-6) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/13/2017, prepared on 10/16/2017 and analyzed on 11/06/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

Definitions/Glossary

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 160-24996-2

Laboratory: TestAmerica St. Louis

Narrative

CASE NARRATIVE

Client: Aptim Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-24996-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/13/2017; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 16.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSS-SU7B-LANE1-U1-S013 (160-24996-1), TITO04-BS-FSS-SU7B-LANE1-U1-S014 (160-24996-2), TITO04-BS-FSS-SU7B-LANE1-U1-S015 (160-24996-3), TITO04-BS-FSS-SU7B-LANE2-U1-S016 (160-24996-4), TITO04-BS-FSS-SU7B-LANE2-U1-S017 (160-24996-5) and TITO04-BS-FSS-SU7B-LANE2-U1-S018 (160-24996-6) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/13/2017, prepared on 10/16/2017 and analyzed on 11/06/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Sample Receipt Checklist

Client: Aptim Federal Services LLC

Job Number: 160-24996-2

Login Number: 24996

List Source: TestAmerica St. Louis

List Number: 1

Creator: Taylor, Kristene N

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Aptim Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-24829-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/04/2017; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 19.0 C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSS-SU7C-RSY13-U15-S001 (160-24829-1), TITO04-BS-FSS-SU7C-RSY13-U15-S002 (160-24829-2), TITO04-BS-FSS-SU7C-RSY13-U15-S003 (160-24829-3), TITO04-BS-FSS-SU7C-RSY13-U15-S004 (160-24829-4), TITO04-BS-FSS-SU7C-RSY13-U15-S005 (160-24829-5), TITO04-BS-FSS-SU7C-RSY13-U15-S006 (160-24829-6) and TITO04-BS-FSS-SU7C-RSY13-U15-S007 (160-24829-7) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/05/2017, prepared on 10/06/2017 and analyzed on 10/27/2017.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

List Number: 1

Creator: Daniels, Brian J

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Aptim Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-24992-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/13/2017; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 16.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSS-SU7D-U1-S001 (160-24992-1), TITO04-BS-FSS-SU7D-U1-S002 (160-24992-2), TITO04-BS-FSS-SU7D-U1-S003 (160-24992-3), TITO04-BS-FSS-SU7D-U1-S004 (160-24992-4), TITO04-BS-FSS-SU7D-U1-S005 (160-24992-5) and TITO04-BS-FSS-SU7D-U1-S006 (160-24992-6) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/13/2017, prepared on 10/16/2017 and analyzed on 11/06/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Sample Receipt Checklist

Job Number: 160-24992-2

Login Number: 24992

List Source: TestAmerica St. Louis

List Number: 1

Creator: Taylor, Kristene N

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-21651-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 3/30/2017 8:40 AM; the samples arrived in good condition, properly preserved. The temperatures of the 3 coolers at receipt time were 20.0° C, 20.0° C and 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSSSU09-9-12 (160-21651-1), TITO04-BS-FSSSU09-9-13 (160-21651-2), TITO04-BS-FSSSU09-9-14 (160-21651-3) and TITO04-BS-FSSSU09-9-15 (160-21651-4) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 03/30/2017, prepared on 04/05/2017 and analyzed on 04/25/2017 and 04/26/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-21652-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 3/30/2017 8:40 AM; the samples arrived in good condition, properly preserved. The temperatures of the 3 coolers at receipt time were 20.0° C, 20.0° C and 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Sample TITO04-BS-FSSSU9-B001 (160-21652-1) was analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 03/30/2017, prepared on 04/05/2017 and analyzed on 04/25/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Sample Receipt Checklist

Client: CB&I Federal Services LLC

Job Number: 160-21652-2

Login Number: 21652

List Source: TestAmerica St. Louis

List Number: 1

Creator: Taylor, Kristene N

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

Definitions/Glossary

TestAmerica Job ID: 160-21652-2

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 160-21668-2

Laboratory: TestAmerica St. Louis

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-21668-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The sample was received on 3/31/2017 8:30 AM; the sample arrived in good condition, properly preserved. The temperature of the cooler at receipt was 18.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Sample TITO04-BS-FSSSU9-B002 (160-21668-1) was analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 04/01/2017, prepared on 04/05/2017 and analyzed on 04/25/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 160-21129-2

Laboratory: TestAmerica St. Louis

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-21129-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 2/20/2017 8:31 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperatures of the 3 coolers at receipt time were 20.0° C, 20.0° C and 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSSSU9-LLRO#711-SWSU2-B001 (160-21129-1), TITO04-BS-FSSSU9-LLRO#711-SWSU2-B002 (160-21129-2), TITO04-BS-FSSSU9-LLRO#711-SWSU2-B003 (160-21129-3), TITO04-BS-FSSSU9-LLRO#711-SWSU2-B004 (160-21129-4) and TITO04-BS-FSSSU9-LLRO#711-SWSU2-B005 (160-21129-5) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were leached on 02/20/2017, prepared on 02/22/2017 and analyzed on 03/15/2017.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Method Summary

Client: CB&I Federal Services LLC
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-21129-2

Method	Method Description	Protocol	Laboratory
GA-01-R	Radium-226 & Other Gamma Emitters (GS)	DOE	TAL SL

Protocol References:
DOE = U.S. Department of Energy

Laboratory References:
TAL SL = TestAmerica St. Louis, 13715 Rider Trail North, Earth City, MO 63045, TEL (314)298-8566

Narrative

CASE NARRATIVE

Client: CB&I Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-21561-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 3/22/2017 8:40 AM; the samples arrived in good condition and properly preserved. The temperatures of the 2 coolers at receipt time were 19.0° C and 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-RSY15-U9-BS-FSSSU5-S001 (160-21561-1), TITO04-RSY15-U9-BS-FSSSU5-S002 (160-21561-2), TITO04-RSY15-U9-BS-FSSSU5-S003 (160-21561-3), TITO04-RSY15-U9-BS-FSSSU5-S004 (160-21561-4), TITO04-RSY15-U9-BS-FSSSU5-S005 (160-21561-5), TITO04-RSY15-U9-BS-FSSSU5-S006 (160-21561-6), TITO04-RSY15-U9-BS-FSSSU5-S007 (160-21561-7), TITO04-RSY15-U9-BS-FSSSU5-S008 (160-21561-8), TITO04-RSY15-U9-BS-FSSSU5-S009 (160-21561-9), TITO04-RSY15-U9-BS-FSSSU5-S010 (160-21561-10), TITO04-RSY15-U9-BS-FSSSU5-S011 (160-21561-11) and TITO04-RSY15-U9-BS-FSSSU5-S012 (160-21561-12) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 03/22/2017, prepared on 03/27/2017 and analyzed on 04/18/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Method Summary

Client: CB&I Federal Services LLC
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-21561-2

Method	Method Description	Protocol	Laboratory
GA-01-R	Radium-226 & Other Gamma Emitters (GS)	DOE	TAL SL

Protocol References:

DOE = U.S. Department of Energy

Laboratory References:

TAL SL = TestAmerica St. Louis, 13715 Rider Trail North, Earth City, MO 63045, TEL (314)298-8566

Narrative

CASE NARRATIVE

Client: Aptim Federal Services LLC

Project: Treasure Island - 500060

Report Number: 160-25032-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/16/2017; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-BS-FSS-SU7B-LANE3-U2-S021 (160-25032-1) and TITO04-BS-FSS-SU7B-LANE3-U2-S022 (160-25032-2) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/16/2017, prepared on 10/17/2017 and analyzed on 11/07/2017.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Client: Aptim Federal Services LLC

Job Number: 160-25032-2

Login Number: 25032

List Source: TestAmerica St. Louis

List Number: 1

Creator: Daniels, Brian J

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-17136-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 04/27/2016; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 18.7° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04_NP-R-FSSSU4-S421 (160-17136-1), TITO04_NP-R-FSSSU4-S422 (160-17136-2), TITO04_NP-R-FSSSU4-S423 (160-17136-3), TITO04_NP-R-FSSSU4-S424 (160-17136-4), TITO04_NP-R-FSSSU4-S425 (160-17136-5), TITO04_NP-R-FSSSU4-S426 (160-17136-6), TITO04_NP-R-FSSSU4-S427 (160-17136-7), TITO04_NP-R-FSSSU4-S428 (160-17136-8), TITO04_NP-R-FSSSU4-S429 (160-17136-9), TITO04_NP-R-FSSSU4-S430 (160-17136-10), TITO04_NP-R-FSSSU4-S431 (160-17136-11) and TITO04_NP-R-FSSSU4-S432 (160-17136-12) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 04/27/2016, prepared on 04/28/2016 and analyzed on 05/19/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-16804-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 04/06/2016; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 19.3° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-NP-R-FSSSU4-S401 (160-16804-1), TI-TO04-NP-R-FSSSU4-S402 (160-16804-2), TI-TO04-NP-R-FSSSU4-S403 (160-16804-3), TI-TO04-NP-R-FSSSU4-S404 (160-16804-4), TI-TO04-NP-R-FSSSU4-S405 (160-16804-5), TI-TO04-NP-R-FSSSU4-S406 (160-16804-6), TI-TO04-NP-R-FSSSU4-S407 (160-16804-7), TI-TO04-NP-R-FSSSU4-S408 (160-16804-8), TI-TO04-NP-R-FSSSU4-S409 (160-16804-9), TI-TO04-NP-R-FSSSU4-S410 (160-16804-10), TI-TO04-NP-R-FSSSU4-S411 (160-16804-11), TI-TO04-NP-R-FSSSU4-S412 (160-16804-12), TI-TO04-NP-R-FSSSU4-S413 (160-16804-13), TI-TO04-NP-R-FSSSU4-S414 (160-16804-14), TI-TO04-NP-R-FSSSU4-S415 (160-16804-15), TI-TO04-NP-R-FSSSU4-S416 (160-16804-16), TI-TO04-NP-R-FSSSU4-S417 (160-16804-17), TI-TO04-NP-R-FSSSU4-S418 (160-16804-18), TI-TO04-NP-R-FSSSU4-S419 (160-16804-19) and TI-TO04-NP-R-FSSSU4-S420 (160-16804-20) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 04/06/2016, prepared on 04/07/2016 and analyzed on 04/28/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

UPS Tracking No. <u>1Z89V46201 9425 9141</u>	

Sample Checklist	Yes	No	Comments
Sample lids are tight and custody seals in place?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Are all sample numbers, dates, times, and other label information legible and complete?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Have all sample numbers, dates, times, and sampling data been logged into the sample log book?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Do sample numbers and sample descriptions on the labels match those on the COC?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Have the COCs been filled out completely and correctly?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Does the analytical specified on the COC match the analytical specified in the scope of work?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Have the COCs been properly signed in the transfer section?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

Packaging Checklist	Yes	No	Comments
Has each sample been placed into an individually plastic bag?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has the drain plug of the cooler been taped closed with water proof tape from the inside?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>no drain plug</u>
Have all the samples been placed into the cooler in an upright position?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Is there adequate spacing of samples so that they will not touch during shipment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has the cooler been filled with additional cushioning material?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has the COC been placed in a Ziploc® bag and taped to the inside of the lid of the cooler?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Have custody seals been placed onto the lid?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has the cooler been labeled "This Side Up"?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
If required, has the cooler been labeled with the DOT proper shipping name, UN number, and label?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>UN 2910</u>
Has the laboratory performing the analyses been notified of the shipment of samples?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

Review Checklist	Yes	No	Comments
Has smear data been verified?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has survey data been reviewed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Creator: McKinney, Gerrod E

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-16805-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 04/06/2016; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 19.3 C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TITO04-BS-R-FSSSU6-S601 (160-16805-1), TI-TITO04-BS-R-FSSSU6-S602 (160-16805-2), TI-TITO04-BS-R-FSSSU6-S603 (160-16805-3), TI-TITO04-BS-R-FSSSU6-S604 (160-16805-4), TI-TITO04-BS-R-FSSSU6-S605 (160-16805-5), TI-TITO04-BS-R-FSSSU6-S606 (160-16805-6), TI-TITO04-BS-R-FSSSU6-S607 (160-16805-7), TI-TITO04-BS-R-FSSSU6-S608 (160-16805-8), TI-TITO04-BS-R-FSSSU6-S609 (160-16805-9), TI-TITO04-BS-R-FSSSU6-S610 (160-16805-10), TI-TITO04-BS-R-FSSSU6-S611 (160-16805-11), TI-TITO04-BS-R-FSSSU6-S612 (160-16805-12), TI-TITO04-BS-R-FSSSU6-S613 (160-16805-13), TI-TITO04-BS-R-FSSSU6-S614 (160-16805-14), TI-TITO04-BS-R-FSSSU6-S615 (160-16805-15), TI-TITO04-BS-R-FSSSU6-S616 (160-16805-16), TI-TITO04-BS-R-FSSSU6-S617 (160-16805-17), TI-TITO04-BS-R-FSSSU6-S618 (160-16805-18), TI-TITO04-BS-R-FSSSU6-S619 (160-16805-19) and TI-TITO04-BS-R-FSSSU6-S620 (160-16805-20) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were leached on 04/06/2016, prepared on 04/07/2016 and analyzed on 04/28/2016.

Several analytes exceeded the RPD limit for the duplicate of sample TI-TITO04-BS-R-FSSSU6-S601DU (160-16805-1). Refer to the QC report for details.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Sample Checklist	Yes	No	Comments
Sample lids are tight and custody seals in place?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Are all sample numbers, dates, times, and other label information legible and complete?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Have all sample numbers, dates, times, and sampling data been logged into the sample log book?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Do sample numbers and sample descriptions on the labels match those on the COC?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Have the COCs been filled out completely and correctly?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Does the analytical specified on the COC match the analytical specified in the scope of work?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Have the COCs been properly signed in the transfer section?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

Packaging Checklist	Yes	No	Comments
Has each sample been placed into an individually plastic bag?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has the drain plug of the cooler been taped closed with water proof tape from the inside?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>no drain plug</u>
Have all the samples been placed into the cooler in an upright position?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Is there adequate spacing of samples so that they will not touch during shipment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has the cooler been filled with additional cushioning material?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has the COC been placed in a Ziploc® bag and taped to the inside of the lid of the cooler?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Have custody seals been placed onto the lid?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has the cooler been labeled "This Side Up"?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
If required, has the cooler been labeled with the DOT proper shipping name, UN number, and label?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<u>UN 2910</u>
Has the laboratory performing the analyses been notified of the shipment of samples?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

Review Checklist	Yes	No	Comments
Has smear data been verified?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	
Has survey data been reviewed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-14097-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/5/2015 8:20 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-NP-R-SU1-S002 (160-14097-1), TI-TO04-NP-R-SU1-S003 (160-14097-2), TI-TO04-NP-R-SU1-S005 (160-14097-3), TI-TO04-NP-R-SU1-S007 (160-14097-4), TI-TO04-NP-R-SU1-S010 (160-14097-5), TI-TO04-NP-R-SU1-S012 (160-14097-6), TI-TO04-NP-R-SU1-S013 (160-14097-7), TI-TO04-NP-R-SU1-S015 (160-14097-8), TI-TO04-NP-R-SU1-S016 (160-14097-9), TI-TO04-NP-R-SU1-S017 (160-14097-10) and TI-TO04-NP-R-SU1-S019 (160-14097-11) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/05/2015, prepared on 10/08/2015 and analyzed on 10/29/2015.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-14255-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/14/2015 8:45 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04_SU1_FSS_NP-S001 (160-14255-1), TI-TO04_SU1_FSS_NP-S004 (160-14255-2), TI-TO04_SU1_FSS_NP-S006 (160-14255-3), TI-TO04_SU1_FSS_NP-S008 (160-14255-4), TI-TO04_SU1_FSS_NP-S009 (160-14255-5), TI-TO04_SU1_FSS_NP-S011 (160-14255-6), TI-TO04_SU1_FSS_NP-S014 (160-14255-7), TI-TO04_SU1_FSS_NP-S018 (160-14255-8) and TI-TO04_SU1_FSS_NP-S020 (160-14255-9) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/14/2015, prepared on 10/15/2015 and analyzed on 11/06/2015 and 11/10/2015.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-14100-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/5/2015 8:20 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-NP-R-SU5-S010 (160-14100-1), TI-TO04-NP-R-SU5-S011 (160-14100-2) and TI-TO04-NP-R-SU5-S012 (160-14100-3) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/05/2015, prepared on 10/08/2015 and analyzed on 10/29/2015.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-17267-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 5/6/2016 8:30 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-NP-R-FSS-SWSU5-S5-14 (160-17267-1) and TI-TO04-NP-R-FSS-SWSU5-S5-15 (160-17267-2) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 05/06/2016, prepared on 05/11/2016 and analyzed on 06/01/2016.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-17479-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 05/21/2016; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 11.5° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-NP-R-FSS-SWSU5-S5-01 (160-17479-1), TI-TO04-NP-R-FSS-SWSU5-S5-02 (160-17479-2) and TI-TO04-NP-R-FSS-SWSU5-S5-23 (160-17479-3) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 05/23/2016, prepared on 05/24/2016 and analyzed on 06/14/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Method Summary

Client: CB&I Environmental & Infrastructure, Inc
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-17479-2

Method	Method Description	Protocol	Laboratory
GA-01-R	Radium-226 & Other Gamma Emitters (GS)	DOE	TAL SL

Protocol References:

DOE = U.S. Department of Energy

Laboratory References:

TAL SL = TestAmerica St. Louis, 13715 Rider Trail North, Earth City, MO 63045, TEL (314)298-8566

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-17240-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 5/5/2016 8:40 AM; the samples arrived in good condition, properly preserved. The temperatures of the 2 coolers at receipt time were 19.0° C and 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-NP-FSS SU5-LLRO518CH-S001 (160-17240-1), TITO04-NP-FSS SU5-LLRO518CH-S002 (160-17240-2), TITO04-NP-FSS SU5-LLRO518CH-S003 (160-17240-3), TITO04-NP-FSS SU5-LLRO518CH-S004 (160-17240-4) and TITO04-NP-FSS SU5-LLRO518CH-S005 (160-17240-5) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 05/05/2016, prepared on 05/06/2016 and analyzed on 05/30/2016.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Sample Receipt Checklist

Login Number: 17240

List Source: TestAmerica St. Louis

List Number: 1

Creator: Clarke, Jill C

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-17243-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 5/5/2016 8:40 AM; the samples arrived in good condition, properly preserved. The temperatures of the 2 coolers at receipt time were 19.0° C and 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-NP-R-FSS-SU7-S001 (160-17243-1), TI-TO04-NP-R-FSS-SU7-S002 (160-17243-2), TI-TO04-NP-R-FSS-SU7-S003 (160-17243-3), TI-TO04-NP-R-FSS-SU7-S004 (160-17243-4), TI-TO04-NP-R-FSS-SU7-S005 (160-17243-5), TI-TO04-NP-R-FSS-SU7-S006 (160-17243-6), TI-TO04-NP-R-FSS-SU7-S007 (160-17243-7), TI-TO04-NP-R-FSS-SU7-S008 (160-17243-8), TI-TO04-NP-R-FSS-SU7-S009 (160-17243-9), TI-TO04-NP-R-FSS-SU7-S010 (160-17243-10), TI-TO04-NP-R-FSS-SU7-S011 (160-17243-11), TI-TO04-NP-R-FSS-SU7-S012 (160-17243-12), TI-TO04-NP-R-FSS-SU7-S013 (160-17243-13), TI-TO04-NP-R-FSS-SU7-S014 (160-17243-14), TI-TO04-NP-R-FSS-SU7-S015 (160-17243-15), TI-TO04-NP-R-FSS-SU7-S016 (160-17243-16), TI-TO04-NP-R-FSS-SU7-S017 (160-17243-17), TI-TO04-NP-R-FSS-SU7-S018 (160-17243-18), TI-TO04-NP-R-FSS-SU7-S019 (160-17243-19) and TI-TO04-NP-R-FSS-SU7-S020 (160-17243-20) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 05/05/2016, prepared on 05/06/2016 and analyzed on 05/30/2016 and 05/31/2016.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

List Source: TestAmerica St. Louis

List Number: 1

Creator: Clarke, Jill C

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-17238-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 05/05/2016; the samples arrived in good condition, properly preserved. The temperatures of the 2 coolers at receipt time were 19.0° C and 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Sample TI-TO04-NP-R-FSS-BISU7-S001 (160-17238-1) was analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 05/05/2016, prepared on 05/06/2016 and analyzed on 05/30/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Login Sample Receipt Checklist

Client: CB&I Environmental & Infrastructure, Inc

Job Number: 160-17238-2

Login Number: 17238

List Source: TestAmerica St. Louis

List Number: 1

Creator: Clarke, Jill C

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-17242-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 5/5/2016 8:40 AM; the samples arrived in good condition, properly preserved. The temperatures of the 2 coolers at receipt time were 19.0° C and 19.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-NP-FSS SU7-LLRO505CH-S001 (160-17242-1), TITO04-NP-FSS SU7-LLRO505CH-S002 (160-17242-2), TITO04-NP-FSS SU7-LLRO505CH-S003 (160-17242-3), TITO04-NP-FSS SU7-LLRO505CH-S004 (160-17242-4) and TITO04-NP-FSS SU7-LLRO505CH-S005 (160-17242-5) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 05/05/2016, prepared on 05/06/2016 and analyzed on 05/30/2016.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Sample Receipt Checklist

Client: CB&I Environmental & Infrastructure, Inc

Job Number: 160-17242-2

Login Number: 17242

List Source: TestAmerica St. Louis

List Number: 1

Creator: Clarke, Jill C

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

Definitions/Glossary

Client: CB&I Environmental & Infrastructure, Inc

TestAmerica Job ID: 160-17242-2

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Method Summary

Client: CB&I Environmental & Infrastructure, Inc

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-13114-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 08/03/2015; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 22.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04_RSY14_2-CH-S201 (160-13114-1), TITO04_RSY14_2-CH-S202 (160-13114-2), TITO04_RSY14_2-CH-S203 (160-13114-3), TITO04_RSY14_2-CH-S204 (160-13114-4), TITO04_RSY14_2-CH-S205 (160-13114-5), TITO04_RSY14_2-CH-S206 (160-13114-6), TITO04_RSY14_2-CH-S207 (160-13114-7), TITO04_RSY14_2-CH-S208 (160-13114-8), TITO04_RSY14_2-CH-S209 (160-13114-9), TITO04_RSY14_2-CH-S210 (160-13114-10), TITO04_RSY14_2-CH-S211 (160-13114-11), TITO04_RSY14_2-CH-S212 (160-13114-12), TITO04_RSY14_2-CH-S213 (160-13114-13), TITO04_RSY14_2-CH-S214 (160-13114-14), TITO04_RSY14_2-CH-S215 (160-13114-15), TITO04_RSY14_2-CH-S216 (160-13114-16), TITO04_RSY14_2-CH-S217 (160-13114-17), TITO04_RSY14_2-CH-S218 (160-13114-18), TITO04_RSY14_2-CH-S219 (160-13114-19) and TITO04_RSY14_2-CH-S220 (160-13114-20) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 08/03/2015, prepared on 08/05/2015 and analyzed on 08/27/2015.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-13119-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 8/3/2015 8:40 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 22.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04_RSY17_2-CH-S201 (160-13119-1), TITO04_RSY17_2-CH-S202 (160-13119-2), TITO04_RSY17_2-CH-S203 (160-13119-3), TITO04_RSY17_2-CH-S204 (160-13119-4), TITO04_RSY17_2-CH-S205 (160-13119-5), TITO04_RSY17_2-CH-S206 (160-13119-6), TITO04_RSY17_2-CH-S207 (160-13119-7), TITO04_RSY17_2-CH-S208 (160-13119-8), TITO04_RSY17_2-CH-S209 (160-13119-9), TITO04_RSY17_2-CH-S210 (160-13119-10), TITO04_RSY17_2-CH-S211 (160-13119-11), TITO04_RSY17_2-CH-S212 (160-13119-12), TITO04_RSY17_2-CH-S213 (160-13119-13), TITO04_RSY17_2-CH-S214 (160-13119-14), TITO04_RSY17_2-CH-S215 (160-13119-15), TITO04_RSY17_2-CH-S216 (160-13119-16), TITO04_RSY17_2-CH-S217 (160-13119-17), TITO04_RSY17_2-CH-S218 (160-13119-18), TITO04_RSY17_2-CH-S219 (160-13119-19) and TITO04_RSY17_2-CH-S220 (160-13119-20) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 08/04/2015, prepared on 08/05/2015 and analyzed on 08/27/2015.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is <=/ background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-15048-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/24/2015 8:30 AM; the samples arrived in good condition, properly preserved. The temperature of the cooler at receipt was 19.9° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TITO04-RSY10_SU2-S001 (160-15048-1), TITO04-RSY10_SU2-S002 (160-15048-2), TITO04-RSY10_SU2-S003 (160-15048-3), TITO04-RSY10_SU2-S004 (160-15048-4), TITO04-RSY10_SU2-S005 (160-15048-5), TITO04-RSY10_SU2-S006 (160-15048-6), TITO04-RSY10_SU2-S007 (160-15048-7), TITO04-RSY10_SU2-S008 (160-15048-8), TITO04-RSY10_SU2-S009 (160-15048-9), TITO04-RSY10_SU2-S010 (160-15048-10), TITO04-RSY10_SU2-S011 (160-15048-11), TITO04-RSY10_SU2-S012 (160-15048-12), TITO04-RSY10_SU2-S013 (160-15048-13), TITO04-RSY10_SU2-S014 (160-15048-14), TITO04-RSY10_SU2-S015 (160-15048-15), TITO04-RSY10_SU2-S016 (160-15048-16), TITO04-RSY10_SU2-S017 (160-15048-17), TITO04-RSY10_SU2-S018 (160-15048-18), TITO04-RSY10_SU2-S019 (160-15048-19) and TITO04-RSY10_SU2-S020 (160-15048-20) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 11/24/2015, prepared on 11/30/2015 and analyzed on 12/21/2015.

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Login Number: 15048

List Number: 1

Creator: Clarke, Jill C

List Source: TestAmerica St. Louis

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-17034-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client.

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

Laboratory: TestAmerica St. Louis (Continued)

Revision 1: The report was revised to replace the original count data with a recount for samples: TI-TO04-BS-R-SU8-S002 (160-17034-2), TI-TO04-BS-R-SU8-S003 (160-17034-3). No other data was affected.

RECEIPT

The samples were received on 04/19/2016; the samples arrived in good condition, properly preserved. The temperature of the coolers at receipt was 20.0° C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-BS-R-SU8-S001 (160-17034-1), TI-TO04-BS-R-SU8-S002 (160-17034-2), TI-TO04-BS-R-SU8-S003 (160-17034-3), TI-TO04-BS-R-SU8-S004 (160-17034-4), TI-TO04-BS-R-SU8-S005 (160-17034-5), TI-TO04-BS-R-SU8-S006 (160-17034-6), TI-TO04-BS-R-SU8-S007 (160-17034-7), TI-TO04-BS-R-SU8-S008 (160-17034-8), TI-TO04-BS-R-SU8-S009 (160-17034-9), TI-TO04-BS-R-SU8-S010 (160-17034-10), TI-TO04-BS-R-SU8-S011 (160-17034-11), TI-TO04-BS-R-SU8-S012 (160-17034-12), TI-TO04-BS-R-SU8-S013 (160-17034-13), TI-TO04-BS-R-SU8-S014 (160-17034-14), TI-TO04-BS-R-SU8-S015 (160-17034-15), TI-TO04-BS-R-SU8-S016 (160-17034-16) and TI-TO04-BS-R-SU8-S019 (160-17034-17) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 04/19/2016, prepared on 04/21/2016 and analyzed on 05/13/2016 and 05/15/2016.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

UPS CampusShip: View/Print Label

1. **Ensure there are no other shipping or tracking labels attached to your package.** Select the Print button on the print dialog box that appears. Note: If your browser does not support this function select Print from the File menu to print the label.
2. **Fold the printed label at the solid line below.** Place the label in a UPS Shipping Pouch. If you do not have a pouch, affix the folded label using clear plastic shipping tape over the entire label.
3. **GETTING YOUR SHIPMENT TO UPS**
Customers with a Daily Pickup
Your driver will pickup your shipment(s) as usual.

Customers without a Daily Pickup

Take your package to any location of The UPS Store®, UPS Access Point(TM) location, UPS Drop Box, UPS Customer Center, UPS Alliances (Office Depot® or Staples®) or Authorized Shipping Outlet near you. Items sent via UPS Return Services(SM) (including via Ground) are also accepted at Drop Boxes. To find the location nearest you, please visit the Resources area of CampusShip and select UPS Locations.

Schedule a same day or future day Pickup to have a UPS driver pickup all your CampusShip packages.

Hand the package to any UPS driver in your area.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	N/A	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: CB&I Environmental & Infrastructure, Inc

Project: Treasure Island - 500060

Report Number: 160-14099-2

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica St. Louis attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results for Chemistry analyses are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header. All soil/sediment sample results for radiochemistry analyses are based upon sample as dried and disaggregated with the exception of tritium, carbon-14, and iodine-129 by gamma spectroscopy unless requested as wet weight by the client."

Reference the chain of custody and condition upon receipt report for any variations on receipt conditions and temperature of samples on receipt

Manual Integrations were performed only when necessary and are in compliance with the laboratory's standard operating procedure. Detailed information can be found in the raw data section of the level IV report.

The following clean-up methods for Organic analyses may have been used on the samples in this data set. Specific methods employed are documented on the batch extraction logs:

Method 3600C: Cleanup
Method 3620C: Florisil Cleanup
Method 3630C: Silica Gel Cleanup
Method 3640A: Gel-Permeation Cleanup
Method 3650B: Acid-Base Partition Cleanup
Method 3660B: Sulfur Cleanup
Method 3665A: Sulfuric Acid/Permanganate Cleanup

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 10/05/2015; the samples arrived in good condition, properly preserved . The temperature of the coolers at receipt was 20.0 C.

RADIUM-226 BY GAMMA SPEC (21 DAY INGROWTH)

Samples TI-TO04-NP-BIFSS_SU1-001 (160-14099-1), TI-TO04-NP-BIFSS_SU1-002 (160-14099-2) and TI-TO04-NP-BIFSS_SU1-003 (160-14099-3) were analyzed for Radium-226 by gamma spec (21 day ingrowth) in accordance with EPA GA_01_R. The samples were dried on 10/05/2015, prepared on 10/08/2015 and analyzed on 10/29/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is $<6\text{mm}$ (1/4").	N/A	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

Definitions/Glossary

Client: CB&I Environmental & Infrastructure, Inc
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-14099-2

Qualifiers

Rad

Qualifier	Qualifier Description
U	Undetected at the Limit of Detection.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Method Summary

Client: CB&I Environmental & Infrastructure, Inc
Project/Site: Treasure Island - 500060

TestAmerica Job ID: 160-14099-2

Method	Method Description	Protocol	Laboratory
GA-01-R	Radium-226 & Other Gamma Emitters (GS)	DOE	TAL SL

Protocol References:

DOE = U.S. Department of Energy

Laboratory References:

TAL SL = TestAmerica St. Louis, 13715 Rider Trail North, Earth City, MO 63045, TEL (314)298-8566

WILCOXON RANK SUM TEST

Nuclide: Ra-226 Location: RSY 13-15
 LBGR: 0.483 pCi/g

DCGL 1
 LBGR = 3x Background Std Deviation
 LBGR = 0.483

POWER CURVE CALCULATION

The power curve demonstrates that at a Ra-226 concentration above background of 0.81 pCi/g or greater, the SU will fail the WRS test with a 100% probability. At the DCGL of 1.00 pCi/g above background and estimated LBGR of 0.483, the SU will pass the WRS test at a 00% probability.

* This spreadsheet is designed to work with a set of twenty measurements, 10 from the survey unit (S) and 10 from the background reference area (R). If a different number of measurements have been performed, it is necessary to modify the spreadsheet to account for the change in the number of measurements.

of R: 20 n
 # of S: 12 m
 Avg Rank R: 22.5
 Avg Rank S: 6.5

For m or n greater than 20, the critical value (k) can be calculated for Scenario B from

$$\frac{m(n+m+1)}{2} + z \sqrt{\frac{nm(n+m+1)}{12}}$$

$z = 97.5\%$ percentile of standard normal distribution = 1.960

$k = 248.4$

$\alpha_w = \alpha/2 = 0.025$

$\beta = 0.05$

Since the sum of survey unit ranks is less than the critical value, the null hypothesis that the survey unit concentrations do not exceed the LBGR is accepted (i.e., survey unit passes). Scenario B

QUANTILE TEST

From NUREG 1505, Table A.7c Values of r and k for the Quantile Test When α is Approximately 0.05

12 n (number of survey unit measurements)
 20 m (number of reference area measurements)
 Use:
 $m = 20$
 $n = 15$
 $6 r$
 $5 k$
 0.04 α

If k or more of the r largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 6 adjusted measurements are from S. The null hypothesis is accepted.

WRS Test, Quantile Test, and Power Calculation

* This spreadsheet is designed to work with a set of twenty measurements, 10 from the survey unit (S) and 10 from the background reference area (R). If a different number of measurements have been performed, it is necessary to modify the spreadsheet to account for the change in the number of measurements.

of R: 20 n
 # of S: 12 m
 Avg Rank R: 22.5
 Avg Rank S: 6.5

For m or n greater than 20, the critical value (k) can be calculated for Scenario B from

$$\frac{m(n+m+1)}{2} + z \sqrt{\frac{nm(n+m+1)}{12}}$$

$z = 97.5\%$ percentile of standard normal distribution = 1.960

$k = 248.4$

$\alpha_W = \alpha/2 = 0.025$

$\beta = 0.05$

Since the sum of survey unit ranks is less than the critical value, the null hypothesis that the survey unit concentrations do not exceed the LBGR is accepted (i.e., survey unit passes). Scenario B

QUANTILE TEST

From NUREG 1505, Table A.7c Values of r and k for the Quantile Test When α is Approximately 0.05

12 n (number of survey unit measurements)
 20 m (number of reference area measurements)
 Use:
 $m = 20$
 $n = 15$
 $6 r$
 $5 k$
 0.04 α

If k or more of the r largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 6 adjusted measurements are from S. The null hypothesis is accepted.

WRS Test, Quantile Test, and Power Calculation

WILCOXON RANK SUM TEST

Nuclide: Ra-226 Location: RSY A1-D3
 LBGR: 0.483 pCi/g

DCGL 1
 LBGR = 3x Background Std Deviation
 LBGR = 0.483

POWER CURVE CALCULATION

The power curve demonstrates that at a Ra-226 concentration above background of 0.81 pCi/g or greater, the SU will fail the WRS test with a 100% probability. At the DCGL of 1.00 pCi/g above background and estimated LBGR of 0.483, the SU will pass the WRS test at a 00% probability.

WILCOXON RANK SUM TEST

Nuclide: Ra-226 Location: Bayside SU 8
 LBGR: 0.483 pCi/g

DCGL 1
 LBGR = 3x Background Std Deviation
 LBGR = 0.483

POWER CURVE CALCULATION

The power curve demonstrates that at a Ra-226 concentration above background of 0.81 pCi/g or greater, the SU will fail the WRS test with a 100% probability. At the DCGL of 1.00 pCi/g above background and estimated LBGR of 0.483, the SU will pass the WRS test at a 00% probability.

* This spreadsheet is designed to work with a set of twenty measurements, 10 from the survey unit (S) and 10 from the background reference area (R). If a different number of measurements have been performed, it is necessary to modify the spreadsheet to account for the change in the number of measurements.

of R: 20 n
 # of S: 21 m
 Avg Rank R: 31.5
 Avg Rank S: 11

For m or n greater than 20, the critical value (k) can be calculated for Scenario B from

$$\frac{m(n+m+1)}{2} + z \sqrt{\frac{nm(n+m+1)}{12}}$$

$z = 97.5\%$ percentile of standard normal distribution = 1.960

$k = 516.1$

$\alpha_W = \alpha/2 = 0.025$

$\beta = 0.05$

Since the sum of survey unit ranks is less than the critical value, the null hypothesis that the survey unit concentrations do not exceed the LBGR is accepted (i.e., survey unit passes). Scenario B

QUANTILE TEST

From NUREG 1505, Table A.7c Values of r and k for the Quantile Test When α is Approximately 0.05

21 n (number of survey unit measurements)
 20 m (number of reference area measurements)

Use:
 $m = 20$
 $n = 25$
 $r = 5$
 $k = 5$
 $\alpha = 0.043$

If k or more of the r largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 5 adjusted measurements are from S.

The null hypothesis is accepted.

* This spreadsheet is designed to work with a set of twenty measurements, 10 from the survey unit (S) and 10 from the background reference area (R). If a different number of measurements have been performed, it is necessary to modify the spreadsheet to account for the change in the number of measurements.

of R: 20 *n*
 # of S: 9 *m*
 Avg Rank R: 19.5
 Avg Rank S: 5

For *m* or *n* greater than 20, the critical value (*k*) can be calculated for Scenario B from

$$\frac{m(n+m+1)}{2} + z \sqrt{\frac{nm(n+m+1)}{12}}$$

z = 97.5% percentile of standard normal distribution = 1.960

k = 176.6

$\alpha_W = \alpha/2 = 0.025$
 $\beta = 0.05$

Since the sum of survey unit ranks is less than the critical value, the null hypothesis that the survey unit concentrations do not exceed the LBGR is accepted (i.e., survey unit passes). Scenario B

QUANTILE TEST

From NUREG 1505, Table A.7c Values of *r* and *k* for the Quantile Test When α is Approximately 0.05
 9 *n* (number of survey unit measurements)
 20 *m* (number of reference area measurements)

Use:
m = 20
n = 10
 8 *r*
 5 *k*
 0.056 alpha

If *k* or more of the *r* largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 8 adjusted measurements are from S. The null hypothesis is accepted.

WILCOXON RANK SUM TEST

Nuclide: Ra-226 Location: North Point SU 1
 LBGR: 0.483 pCi/g

DCGL 1
 LBGR = 3x Background Std Deviation
 LBGR = 0.483

POWER CURVE CALCULATION

The power curve demonstrates that at a median Ra-226 concentration of 0.8 pCi/g or greater, the SU will fail the WRS test with a 100% probability. At the observed Ra-226 median concentration of 0.324 pCi/g and estimated LBGR of 0.483, the SU will pass the WRS test at a 100% probability.

**QUANTILE TEST**

From NUREG 1505, Table A.7c Values of r and k for the Quantile Test When α Is Approximately 0.05

12 n (number of survey unit measurements)
 20 m (number of reference area measurements)

Use:
 $m = 20$
 $n = 15$
 6 r
 5 k
 0.04 α

If k or more of the r largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 6 adjusted measurements are from S. The null hypothesis is accepted.

The power curve demonstrates that at a Ra-226 concentration above background of 0.81 pCi/g or greater, the SU will fail the WRS test with a 100% probability. At the DCGL of 1.00 pCi/g above background and estimated LBGR of 0.483, the SU will pass the WRS test at a 00% probability.

 LBGR = 0.483

POWER CURVE CALCULATION

The power curve demonstrates that at a Ra-226 concentration above background of 0.81 pCi/g or greater, the SU will fail the WRS test with a 100% probability. At the DCGL of 1.00 pCi/g above background and estimated LBGR of 0.483, the SU will pass the WRS test at a 00% probability.

* This spreadsheet is designed to work with a set of twenty measurements, 10 from the survey unit (S) and 10 from the background reference area (R). If a different number of measurements have been performed, it is necessary to modify the spreadsheet to account for the change in the number of measurements.

of R: 20 n
 # of S: 20 m
 Avg Rank R: 30.5
 Avg Rank S: 10.5

For m or n greater than 20, the critical value (k) can be calculated for Scenario B from

$$\frac{m(n+m+1)}{2} + z \sqrt{\frac{nm(n+m+1)}{12}}$$

$z = 97.5\%$ percentile of standard normal distribution = 1.960

$k = 482.5$

$a_w = a/2 = 0.025$

$\beta = 0.05$

Since the sum of survey unit ranks is less than the critical value, the null hypothesis that the survey unit concentrations do not exceed the LBGR is accepted (i.e., survey unit passes). Scenario B

QUANTILE TEST

From NUREG 1505, Table A.7c Values of r and k for the Quantile Test When α is Approximately 0.05

20 n (number of survey unit measurements)
 20 m (number of reference area measurements)

Use:
 $m = 20$
 $n = 20$
 $r = 4$
 $k = 4$
 0.053 α

If k or more of the r largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 4 adjusted measurements are from S.

The null hypothesis is accepted.

**QUANTILE TEST**

From NUREG 1505, Table A.7c Values of *r* and *k* for the Quantile Test When α is Approximately 0.05

20 *n* (number of survey unit measurements)
 20 *m* (number of reference area measurements)

Use:
m = 20
n = 20
 4 *r*
 4 *k*
 0.053 α

If *k* or more of the *r* largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 4 adjusted measurements are from S.

The null hypothesis is accepted.

WILCOXON RANK SUM TEST

Nuclide: Ra-226 Location: RSY 10-8
 LBGR: 0.483 pCi/g

DCGL 1
 LBGR = 3x Background Std Deviation
 LBGR = 0.483

POWER CURVE CALCULATION

The power curve demonstrates that at a Ra-226 concentration above background of 0.81 pCi/g or greater, the SU will fail the WRS test with a 100% probability. At the DCGL of 1.00 pCi/g above background and estimated LBGR of 0.483, the SU will pass the WRS test at a 00% probability.

* This spreadsheet is designed to work with a set of twenty measurements, 10 from the survey unit (S) and 10 from the background reference area (R). If a different number of measurements have been performed, it is necessary to modify the spreadsheet to account for the change in the number of measurements.

of R: 20 n
 # of S: 20 m
 Avg Rank R: 30.5
 Avg Rank S: 10.5

For m or n greater than 20, the critical value (k) can be calculated for Scenario B from

$$\frac{m(n+m+1)}{2} + z \sqrt{\frac{nm(n+m+1)}{12}}$$

$z = 97.5\%$ percentile of standard normal distribution = 1.960

$k = 482.5$

$a_w = a/2 = 0.025$

$\beta = 0.05$

Since the sum of survey unit ranks is less than the critical value, the null hypothesis that the survey unit concentrations do not exceed the LBGR is accepted (i.e., survey unit passes). Scenario B

QUANTILE TEST

From NUREG 1505, Table A.7c Values of r and k for the Quantile Test When α is Approximately 0.05

20 n (number of survey unit measurements)
 20 m (number of reference area measurements)

Use:
 $m = 20$
 $n = 20$
 $4 r$
 $4 k$
 0.053 α

If k or more of the r largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 4 adjusted measurements are from S.

The null hypothesis is accepted.

* This spreadsheet is designed to work with a set of twenty measurements, 10 from the survey unit (S) and 10 from the background reference area (R). If a different number of measurements have been performed, it is necessary to modify the spreadsheet to account for the change in the number of measurements.

of R: 20 n
 # of S: 12 m
 Avg Rank R: 22.5
 Avg Rank S: 6.5

For m or n greater than 20, the critical value (k) can be calculated for Scenario B from

$$\frac{m(n+m+1)}{2} + z \sqrt{\frac{nm(n+m+1)}{12}}$$

$z = 97.5\%$ percentile of standard normal distribution = 1.960

$k = 248.4$

$\alpha_W = \alpha/2 = 0.025$

$\beta = 0.05$

Since the sum of survey unit ranks is less than the critical value, the null hypothesis that the survey unit concentrations do not exceed the LBGR is accepted (i.e., survey unit passes). Scenario B

QUANTILE TEST

From NUREG 1505, Table A.7c Values of r and k for the Quantile Test When α is Approximately 0.05

12 n (number of survey unit measurements)
 20 m (number of reference area measurements)
 Use:
 $m = 20$
 $n = 15$
 $6 r$
 $5 k$
 0.04 α

If k or more of the r largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 6 adjusted measurements are from S. The null hypothesis is accepted.

WILCOXON RANK SUM TEST

Nuclide: Ra-226 Location: RSY 11-5
 LBGR: 0.483 pCi/g

DCGL 1
 LBGR = 3x Background Std Deviation
 LBGR = 0.483

POWER CURVE CALCULATION

The power curve demonstrates that at a Ra-226 concentration above background of 0.81 pCi/g or greater, the SU will fail the WRS test with a 100% probability. At the DCGL of 1.00 pCi/g above background and estimated LBGR of 0.483, the SU will pass the WRS test at a 00% probability.

* This spreadsheet is designed to work with a set of twenty measurements, 10 from the survey unit (S) and 10 from the background reference area (R). If a different number of measurements have been performed, it is necessary to modify the spreadsheet to account for the change in the number of measurements.

of R: 20 n
 # of S: 12 m
 Avg Rank R: 22.5
 Avg Rank S: 6.5

For m or n greater than 20, the critical value (k) can be calculated for Scenario B from

$$\frac{m(n+m+1)}{2} + z \sqrt{\frac{nm(n+m+1)}{12}}$$

$z = 97.5\%$ percentile of standard normal distribution = 1.960

$k = 248.4$

$\alpha_w = \alpha/2 = 0.025$

$\beta = 0.05$

Since the sum of survey unit ranks is less than the critical value, the null hypothesis that the survey unit concentrations do not exceed the LBGR is accepted (i.e., survey unit passes). Scenario B

QUANTILE TEST

From NUREG 1505, Table A.7c Values of r and k for the Quantile Test When α is Approximately 0.05

12 n (number of survey unit measurements)
 20 m (number of reference area measurements)
 Use:
 $m = 20$
 $n = 15$
 $6 r$
 $5 k$
 0.04 α

If k or more of the r largest measurements in the combined ranked data set are from the survey unit, the null hypothesis of the Quantile test (that there is no residual radioactivity above the LBGR in any part of the survey unit) is rejected.

0 of the largest 6 adjusted measurements are from S. The null hypothesis is accepted.

WILCOXON RANK SUM TEST

Nuclide: Ra-226 Location: RSY Pad 14-2
 LBGR: 0.483 pCi/g

DCGL 1
 LBGR = 3x Background Std Deviation
 LBGR = 0.483

POWER CURVE CALCULATION

The power curve demonstrates that at a median Ra-226 concentration of 0.8 pCi/g or greater, the SU will fail the WRS test with a 100% probability. At the observed Ra-226 median concentration of 0.336 pCi/g and estimated LBGR of 0.483, the SU will pass the WRS test at a 100% probability.

B-1	Dose conversion factors for inhalation, mrem/pCi:			
B-1	Pb-210+D	4.017E-02	2.231E-02	DCF2(1)
B-1	Ra-226+D	3.823E-02	3.811E-02	DCF2(2)
D-1	Dose conversion factors for ingestion, mrem/pCi:			
D-1	Pb-210+D	1.026E-02	3.774E-03	DCF3(1)
D-1	Ra-226+D	1.677E-03	1.676E-03	DCF3(2)
D-34	Food transfer factors:			
D-34	Pb-210+D , plant/soil concentration ratio, dimensionless	1.000E-02	1.000E-02	RTF(1,1)
D-34	Pb-210+D , beef/livestock-intake ratio, (pCi/kg)/(pCi/d)	8.000E-04	8.000E-04	RTF(1,2)
D-34	Pb-210+D , milk/livestock-intake ratio, (pCi/L)/(pCi/d)	3.000E-04	3.000E-04	RTF(1,3)
D-34				
D-34	Ra-226+D , plant/soil concentration ratio, dimensionless	4.000E-02	4.000E-02	RTF(2,1)
D-34	Ra-226+D , beef/livestock-intake ratio, (pCi/kg)/(pCi/d)	1.000E-03	1.000E-03	RTF(2,2)
D-34	Ra-226+D , milk/livestock-intake ratio, (pCi/L)/(pCi/d)	1.000E-03	1.000E-03	RTF(2,3)
D-5	Bioaccumulation factors, fresh water, L/kg:			
D-5	Pb-210+D , fish	3.000E+02	3.000E+02	BIOFAC(1,1)
D-5	Pb-210+D , crustacea and mollusks	1.000E+02	1.000E+02	BIOFAC(1,2)
D-5				
D-5	Ra-226+D , fish	5.000E+01	5.000E+01	BIOFAC(2,1)
D-5	Ra-226+D , crustacea and mollusks	2.500E+02	2.500E+02	BIOFAC(2,2)

#For DCF1(xxx) only, factors are for infinite depth & area. See ETFG table in Ground Pathway of Detailed Report.

*Base Case means Default.Lib w/o Associate Nuclide contributions.

Summary : RESRAD Default Parameters

File : C:\RESRAD_FAMILY\ONSITE\7.2\USERFILES\NSTI SWDA NORTH POINT SU 5.RAD

Site-Specific Parameter Summary

Menu	Parameter	User Input	Default	Used by RESRAD (If different from user input)	Parameter Name
R011	Area of contaminated zone (m**2)	1.000E+03	1.000E+04	---	AREA
R011	Thickness of contaminated zone (m)	2.000E+00	2.000E+00	---	THICK0
R011	Fraction of contamination that is submerged	0.000E+00	0.000E+00	---	SUBMFRACT
R011	Length parallel to aquifer flow (m)	1.000E+02	1.000E+02	---	LCZPAQ
R011	Basic radiation dose limit (mrem/yr)	5.000E+00	3.000E+01	---	BRDL
R011	Time since placement of material (yr)	0.000E+00	0.000E+00	---	TI
R011	Times for calculations (yr)	1.000E+00	1.000E+00	---	T(2)
R011	Times for calculations (yr)	3.000E+00	3.000E+00	---	T(3)
R011	Times for calculations (yr)	1.000E+01	1.000E+01	---	T(4)
R011	Times for calculations (yr)	3.000E+01	3.000E+01	---	T(5)
R011	Times for calculations (yr)	1.000E+02	1.000E+02	---	T(6)
R011	Times for calculations (yr)	2.500E+02	3.000E+02	---	T(7)
R011	Times for calculations (yr)	5.000E+02	1.000E+03	---	T(8)
R011	Times for calculations (yr)	7.500E+02	0.000E+00	---	T(9)
R011	Times for calculations (yr)	1.000E+03	0.000E+00	---	T(10)
R012	Initial principal radionuclide (pCi/g): Pb-210	2.300E-01	0.000E+00	---	S1(1)
R012	Initial principal radionuclide (pCi/g): Ra-226	2.300E-01	0.000E+00	---	S1(2)
R012	Concentration in groundwater (pCi/L): Pb-210	not used	0.000E+00	---	W1(1)
R012	Concentration in groundwater (pCi/L): Ra-226	not used	0.000E+00	---	W1(2)
R013	Cover depth (m)	0.000E+00	0.000E+00	---	COVER0
R013	Density of cover material (g/cm**3)	not used	1.500E+00	---	DENSCV
R013	Cover depth erosion rate (m/yr)	not used	1.000E-03	---	VCV
R013	Density of contaminated zone (g/cm**3)	1.500E+00	1.500E+00	---	DENSCZ
R013	Contaminated zone erosion rate (m/yr)	1.000E-03	1.000E-03	---	VCZ
R013	Contaminated zone total porosity	4.000E-01	4.000E-01	---	TPCZ
R013	Contaminated zone field capacity	2.000E-01	2.000E-01	---	FCCZ
R013	Contaminated zone hydraulic conductivity (m/yr)	1.000E+01	1.000E+01	---	HCCZ
R013	Contaminated zone b parameter	5.300E+00	5.300E+00	---	BCZ
R013	Average annual wind speed (m/sec)	2.000E+00	2.000E+00	---	WIND
R013	Humidity in air (g/m**3)	not used	8.000E+00	---	HUMID
R013	Evapotranspiration coefficient	5.000E-01	5.000E-01	---	EVAPTR
R013	Precipitation (m/yr)	1.000E+00	1.000E+00	---	PRECIP
R013	Irrigation (m/yr)	2.000E-01	2.000E-01	---	RI
R013	Irrigation mode	overhead	overhead	---	IDITCH
R013	Runoff coefficient	2.000E-01	2.000E-01	---	RUNOFF
R013	Watershed area for nearby stream or pond (m**2)	1.000E+06	1.000E+06	---	WAREA
R013	Accuracy for water/soil computations	1.000E-03	1.000E-03	---	EPS
R014	Density of saturated zone (g/cm**3)	1.500E+00	1.500E+00	---	DENSAQ
R014	Saturated zone total porosity	4.000E-01	4.000E-01	---	TPSZ
R014	Saturated zone effective porosity	2.000E-01	2.000E-01	---	EPSZ
R014	Saturated zone field capacity	2.000E-01	2.000E-01	---	FCSZ
R014	Saturated zone hydraulic conductivity (m/yr)	1.000E+02	1.000E+02	---	HCSZ
R014	Saturated zone hydraulic gradient	2.000E-02	2.000E-02	---	HGWT
R014	Saturated zone b parameter	5.300E+00	5.300E+00	---	BSZ
R014	Water table drop rate (m/yr)	1.000E-03	1.000E-03	---	VWT
R014	Well pump intake depth (m below water table)	1.000E+01	1.000E+01	---	DWIBWT
R014	Model: Nondispersion (ND) or Mass-Balance (MB)	ND	ND	---	MODEL

Data Validation Reports

COVER LETTER

February 16, 2017

Lynn Caragan
C, B, & I Federal services
420 Exchange, #150
Irvine, CA. 92602

Dear Mrs. Caragan:

Enclosed is Revision 0 of the data validation report for the Treasure Island Naval Shipyard, Site 12, project number 500060. This DVR encompasses the laboratory data produced by TestAmerica Laboratories, Inc. for the sample delivery groups (SDG) listed in Table 1-1 of the DVR.

The specific sample identifications are listed in the sample identification table(s). The data packages were reviewed per the data validation procedures referenced in the introduction of the report.

Sincerely,

A handwritten signature in cursive script, appearing to read "Larry W. Duty", is positioned above a solid horizontal line.

Larry Duty

Acronyms and Abbreviations

Following is a list of acronyms and abbreviations that may be used in data validation reports and/or data quality assessment reports.

%D	percent difference	DFTPP	decafluorotriphenylphosphine
%R	percent recovery	DOD	Department Of Defense
µg/L	microgram per liter	DQAR	data quality assessment report
mg/L	milligram per liter		
pg/L	picogram per liter	DUP	laboratory duplicate
µg/kg	microgram per kilogram	DVP	data validation procedure
mg/kg	milligram per kilogram	EDB	ethylene dibromide
ng/kg	nanogram per kilogram	EDL	estimated detection limit
pg/g	picogram per gram	EICP	extracted ion current profile
AA	atomic absorption	EPA	Environmental Protection Agency, United States
ARRF	average relative response factor	EB	equipment blank
BFB	bromofluorobenzene	FB	field blank
BNA	base/neutral/acid compounds	GC	gas chromatography
CCB	continuing calibration blank	GC/ECD	gas chromatography/electron capture detector
CCC	calibration check compound	GC/ELCD	gas chromatography/electrolytic conductivity detector (Hall detector)
CCV	continuing calibration verification	GC/FPD	gas chromatography/flame photometric detector
CF	calibration factor	GC/MS	gas chromatography/mass spectrometry
CLP	Contract Laboratory Program	GC/PID	gas chromatography/photoionization detector
COC	chain of custody record	GFAA	graphite furnace atomic

			absorption
COD	chemical oxygen demand	GPC	gel permeation chromatography
CTO	contract task order	Hg	mercury
CVAA	cold vapor atomic absorption	HPLC	high-performance liquid chromatography
DBCP	dibromochloropropane	HRGC/HR MS	high resolution gas chromatography/high resolution mass spectrometry
DCB	decachlorobiphenyl	RF r2	response factor coefficient of determination
4,4'-DDD	4,4'-dichlorodiphenyldichloroethane	RICRF	reconstructed ion chromatogram response factor
4,4'-DDE	4,4'-dichlorodiphenyldichloroethylene	RLRIC	reporting limit reconstructed ion chromatogram
4,4'-DDT	4,4'-dichlorodiphenyltrichloroethane	RPDRL	relative percent difference reporting limit
ICV	initial calibration verification	RRFRPD	relative response factor relative percent difference
IDL	instrument detection limit	RRTRRF	relative retention time relative response factor
IR	infrared spectroscopy	RSDRRT	relative standard deviation relative retention time
IRP	installation restoration program	RTRSD	retention time relative standard deviation
IS	internal standards	RT	retention time
LCS	laboratory control sample	HT	holding time
MBAS	methyl blue active substance	ICB	initial calibration blank
MDL	method detection limit	ICP	inductively coupled plasma
MS	matrix spike	ICS	interference check sample
MSA	method of standard addition	SDG	sample delivery group

MSD	matrix spike duplicate	SICP	selected ion current profiles
m/z	mass to charge ratio	s/n	signal to noise ratio
NFESC	Naval Facilities Engineering Services Center	SOP	standard operating procedure
OP	organophosphorus	SOW	statement of work
PAH	polynuclear aromatic hydrocarbon	SPCC	system performance check compound
PARCC	precision, accuracy, representativeness, comparability, completeness	SRM	standard reference material
PCB	polychlorinated biphenyl	SVOC	semivolatile organic compound
PCDD	polychlorinated dibenzodioxin	TB	trip blank
PCDF	polychlorinated dibenzofuran	TCDD	tetrachlorodibenzodioxin
PE	performance evaluation	TCX	tetrachloro-m-xylene
PEM	performance evaluation mixture	TDS	total dissolved solids
PFK	perfluorokerosene	TIC	tentatively identified compound
PQO	project quality objective	TOC	total organic carbon
QAPFK	quality assurance perfluorokerosene	TOX	total organic halides
QACQA	quality assurance coordinator quality assurance	TPHE	total petroleum hydrocarbons as extractables
QAPPQA C	quality assurance project plan quality assurance coordinator	UV/VIS	ultraviolet/visible
QCQAPP	quality control quality assurance project plan	VOA	volatile organic analysis
QSM QC	quality system manual quality control	VOC	volatile organic compound
rQSM	correlation coefficient quality system manual	VTSR	validated time of sample receipt

r ² r	coefficient of determination correlation coefficient	WDM	window defining mixture

1.0 INTRODUCTION

This Data Validation Report (DVR) contains the results of the data validation conducted for samples collected and analyzed as part of the Treasure Island Naval Shipyard Site 12 investigation. The project was conducted per contract number N62473-12-D-2005 under task order 004 for the Base Realignment and Closure Program Management Office, West Naval Facilities Engineering Command, 1455 Frazee Road, #600, San Diego CA. 92108. This DVR was subcontracted to E-Lab Consultants from Chicago, Bridge, and Iron (CB&I) to serve third party data assessment purposes and evaluates the laboratory data contained in Sample Delivery Groups (SDGs) list in **Table 1-1** produced by TestAmerica Laboratories, Inc.

These samples were analyzed in accordance with the approved *United States Department of Defense (DOD) Quality Systems Manual (QSM) for Environmental Laboratories Version 5.0, July 2013* and the analytical methods specified for the analytes requested on the Chain of Custody (COC) documentation. **Table 1-1** provides a list of the samples collected, a laboratory sample number cross-reference, sample matrix, date collected, sample purpose, and analytical methods performed for each sample pertaining to this DVR. This DVR is conducted per the analysis requested on the COC in accordance with the; *Sampling and Analysis Plan (SAP) October 2013, Environmental Protection Agency (EPA) National Functional Guidelines (NFG) for Organic (NFGO) Data Review (August 2014), NFG for Inorganic (NFGIO) Data Review (August 2014)*, and the method specified for the analysis.

The data were evaluated against the quantitative acceptance limits given in the DOD QSM for the data quality parameters of sensitivity, accuracy, precision, and completeness. **Appendix A** contains the Laboratory Data Report Form 1s that has been annotated with qualifiers assigned during the validation process in accordance with the project procedures manual.

In accordance with SAP, a review of the data was conducted independent of the laboratory. This review consisted of an evaluation of laboratory performance criteria from the case narrative, and an evaluation of the sample-specific criteria included in the laboratory data packages analyzed in accordance with the DOD QSM.

The validation consists of an evaluation of the chain of custody and associated laboratory sample receipt forms, proper sample preservations, holding times, initial calibration and continuing calibration procedures and results, laboratory control sample (LCS) (and duplicate [LCSD] if reported) accuracy and precision and matrix spike (MS) and matrix spike duplicate (MSD) sample analyses, method blanks, field blanks, and field duplicate precision.

Additional review included;

- Organic Analysis; internal standards, surrogate recoveries, instrument tuning, initial calibration, second source calibration verification, continuing calibration verification, internal standards, degradation summary, retention times, second column or second detector confirmations
- Inorganic Analysis; laboratory duplicate precision, instrument tuning, initial calibration, low-level calibration check standards, initial and continuing calibration verification, initial and continuing calibration blanks, interference check sample, internal standards, serial dilution results, post digestion spike recoveries, and interelement correction factors

The results of the independent data review are presented in **Section 2.0**.

Following the specifications in the SAP related to the data validation process, the data were annotated with data validation qualifiers and codes on the analytical data sheets that are required qualifier flags as described in the SAP. **Table 1-2** provides definitions of the data qualifiers references, and **Table 1-3** lists and defines the data review qualifier codes.

Table 1-2
Data Qualifier References

Qualifier	Organics	Inorganics
U	The analyte was analyzed for, but was not detected above the method detection limit.	The analyte was analyzed for, but was not detected above the method detection limit.
J	The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification."	Not applicable.
NJ	The analysis indicates the presence of an analyte that has been "tentatively identified" and the associated numerical value represents its approximate concentration.	Not applicable.
UJ	The analyte was not detected above the method detection limit. However, the associated value is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.	The analyte was analyzed for, but was not detected. The associated value is an estimate and may be inaccurate or imprecise.
R	The sample results are rejected due to serious deficiencies in the ability to analyze the sample and to meet quality control criteria. The presence or absence of the analyte cannot be verified.	The data are unusable. The sample results are rejected due to serious deficiencies in meeting the Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Table 1-3
Data Review Qualifier Codes

Reason Code	Description
A	Serial dilution outside criteria (Level IV).
B1	Method blank contaminants above reporting limit.
B2	Calibration blank contaminants above reporting limit.
B2 (Bias flag –)	Calibration blank indicates negative interference, false negatives may be present
B3	Trip blank contamination
B4	Equipment rinsate contamination.
B5	Ambient blank contamination
C	ICV or CCV % D outside control limits.
C1	Initial calibration RSD outside control limit.
C2	Initial calibration RRF outside control limit.
C3	Continuing calibration RRF outside control limit.
D1	Sample Duplicate RPD outside control limit.
D2	Matrix Duplicate RPD outside control limit
E	The sample results exceed the linear calibration range of the instrument.
F	Hydrocarbon pattern does not match hydrocarbon pattern in the standard.
H	Holding time exceeded.
I	Internal standard recovery outside control limit.
L	LCS outside control limits.
M	MS outside control limits.
M1	MS, MSD or RPD outside of control limits
O	Interference check sample outside acceptance criteria
P	Analyte qualified based on the professional judgement of the reviewer.
S	Surrogate recovery outside control limit.
T	Temperature outside acceptance criteria.
Tr	Value reported detected between the DL and LOQ
W	Pesticide breakdown outside criteria (Level IV).

X	Raised reporting limit due to matrix interference or high analyte concentration.
Y	Analyte was not confirmed by a second column.
Y1	Primary and Confirmation Sample Duplicate RPD outside control limit.

2.0 DATA VALIDATION RESULTS

Laboratory Data Package Review

The samples reported, QC designations, and validation level is listed in **Table 1-1**. The data packages were reviewed in accordance with the project procedures manual.

Sample Documentation, Preservation, Handling, and Transport

All samples arrived at the laboratory on time, intact and within preservation requirements.

A cross reference of the COC and analytical reports has concluded all extractions and analysis were performed within the required holding times. The validation met all QC requirements listed in the method and data validation requirements of the SAP. None of the data is qualified based on sample documentation, preservation, handling, or transport

2.1 Radium-226 by GAMMA SPEC (21 DAY INGROWTH)

2.1.1 Instrument Performance Checks

Data verification included the recalculation of raw data, verifying the mass spectral abundance and assignment are correct and within the method requirements. All samples were analyzed with an acceptable BFB performance check and within the 12-hour window requirement.

2.1.2 Instrument Initial Calibrations

Relative Retention Factors (RRF) was verified against the quantitation reports, mass spectra, and chromatograms. Average RRF and percent relative Standard Deviations (%RSD) were verified for one compound associated with each internal standard. All initial calibration average relative response factors were within the project DoD QSM requirements.

2.1.3 Initial Calibration Verifications

The initial calibration curve was verified with a second source standard mix that contained all target compounds.

2.1.4 Continuing Calibrations

Continuing calibration average relative response factors were within the DoD QSM requirements (<20%). Continuing calibrations were performed on a 12-hour basis.

2.1.5 Blanks

Each analytical batch was represented with a method blank. The laboratory reports none of the target compounds were detected in any of the method blanks

2.1.6 Laboratory Control Sample Recovery (Blank Spikes)

The LCS values were validated by recalculating two compounds per LCS. None of the data are qualified based on LCS recoveries.

2.1.7 Matrix Spike/Matrix Spike Duplicate Recoveries

MS/MSD samples were not submitted for this analysis.

2.1.8 Laboratory Duplicate Recoveries

All laboratory generated duplicate recoveries are within QC limits.

2.1.9 Field QC Samples

2.1.9.1 Trip, Equipment and Field Blanks

Field blank samples were not submitted for this analysis.

2.1.10 Target Compound Identification

None of the identified target compounds were qualified based compound identification.

2.1.11 Compound Quantitation and Reporting Limits

Reporting limits were verified to be equal to the Level of Detection (LOD). The LODs have been verified to meet or exceed the project required performance standards. Sample dilutions, cleanup concentrations, and moisture correction have been applied to all reportable results. The results are reported on a dry weight basis where applicable.

2.1.12 Tentatively Identified Compounds

No Tentatively Identified Compounds are reported.

TestAmerica St. Louis

COVER LETTER

February 21, 2017

Lynn Caragan
C, B, & I Federal services
420 Exchange, #150
Irvine, CA. 92602

Dear Mrs. Caragan:

Enclosed is Revision 0 of the data validation report for the Treasure Island Naval Shipyard, Site 12, project number 500060. This DVR encompasses the laboratory data produced by TestAmerica Laboratories, Inc. for the sample delivery groups (SDG) listed in Table 1-1 of the DVR.

The specific sample identifications are listed in the sample identification table(s). The data packages were reviewed per the data validation procedures referenced in the introduction of the report.

Sincerely,

A handwritten signature in cursive script, appearing to read "Larry W. Duty", is written above a solid horizontal line.

Larry Duty
Data Validation Project Manager

Acronyms and Abbreviations

Following is a list of acronyms and abbreviations that may be used in data validation reports and/or data quality assessment reports.

%D	percent difference	DFTPP	decafluorotriphenylphosphine
%R	percent recovery	DOD	Department Of Defense
µg/L	microgram per liter	DQAR	data quality assessment report
mg/L	milligram per liter		
pg/L	picogram per liter	DUP	laboratory duplicate
µg/kg	microgram per kilogram	DVP	data validation procedure
mg/kg	milligram per kilogram	EDB	ethylene dibromide
ng/kg	nanogram per kilogram	EDL	estimated detection limit
pg/g	picogram per gram	EICP	extracted ion current profile
AA	atomic absorption	EPA	Environmental Protection Agency, United States
ARRF	average relative response factor	EB	equipment blank
BFB	bromofluorobenzene	FB	field blank
BNA	base/neutral/acid compounds	GC	gas chromatography
CCB	continuing calibration blank	GC/ECD	gas chromatography/electron capture detector
CCC	calibration check compound	GC/ELCD	gas chromatography/electrolytic conductivity detector (Hall detector)
CCV	continuing calibration verification	GC/FPD	gas chromatography/flame photometric detector
CF	calibration factor	GC/MS	gas chromatography/mass spectrometry
CLP	Contract Laboratory Program	GC/PID	gas chromatography/photoionization detector
COC	chain of custody record	GFAA	graphite furnace atomic

			absorption
COD	chemical oxygen demand	GPC	gel permeation chromatography
CTO	contract task order	Hg	mercury
CVAA	cold vapor atomic absorption	HPLC	high-performance liquid chromatography
DBCP	dibromochloropropane	HRGC/HR MS	high resolution gas chromatography/high resolution mass spectrometry
DCB	decachlorobiphenyl	RF r2	response factor coefficient of determination
4,4'-DDD	4,4'-dichlorodiphenyldichloroethane	RICRF	reconstructed ion chromatogram response factor
4,4'-DDE	4,4'-dichlorodiphenyldichloroethylene	RLRIC	reporting limit reconstructed ion chromatogram
4,4'-DDT	4,4'-dichlorodiphenyltrichloroethane	RPDRL	relative percent difference reporting limit
ICV	initial calibration verification	RRFRPD	relative response factor relative percent difference
IDL	instrument detection limit	RRTRRF	relative retention time relative response factor
IR	infrared spectroscopy	RSDRRT	relative standard deviation relative retention time
IRP	installation restoration program	RTRSD	retention time relative standard deviation
IS	internal standards	RT	retention time
LCS	laboratory control sample	HT	holding time
MBAS	methyl blue active substance	ICB	initial calibration blank
MDL	method detection limit	ICP	inductively coupled plasma
MS	matrix spike	ICS	interference check sample
MSA	method of standard addition	SDG	sample delivery group

MSD	matrix spike duplicate	SICP	selected ion current profiles
m/z	mass to charge ratio	s/n	signal to noise ratio
NFESC	Naval Facilities Engineering Services Center	SOP	standard operating procedure
OP	organophosphorus	SOW	statement of work
PAH	polynuclear aromatic hydrocarbon	SPCC	system performance check compound
PARCC	precision, accuracy, representativeness, comparability, completeness	SRM	standard reference material
PCB	polychlorinated biphenyl	SVOC	semivolatile organic compound
PCDD	polychlorinated dibenzodioxin	TB	trip blank
PCDF	polychlorinated dibenzofuran	TCDD	tetrachlorodibenzodioxin
PE	performance evaluation	TCX	tetrachloro-m-xylene
PEM	performance evaluation mixture	TDS	total dissolved solids
PFK	perfluorokerosene	TIC	tentatively identified compound
PQO	project quality objective	TOC	total organic carbon
QAPFK	quality assurance perfluorokerosene	TOX	total organic halides
QACQA	quality assurance coordinator quality assurance	TPHE	total petroleum hydrocarbons as extractables
QAPPQA C	quality assurance project plan quality assurance coordinator	UV/VIS	ultraviolet/visible
QCQAPP	quality control quality assurance project plan	VOA	volatile organic analysis
QSM QC	quality system manual quality control	VOC	volatile organic compound
rQSM	correlation coefficient quality system manual	VTSR	validated time of sample receipt

r ² r	coefficient of determination correlation coefficient	WDM	window defining mixture

1.0 INTRODUCTION

This Data Validation Report (DVR) contains the results of the data validation conducted for samples collected and analyzed as part of the Treasure Island Naval Shipyard Site 12 investigation. The project was conducted per contract number N62473-12-D-2005 under task order 004 for the Base Realignment and Closure Program Management Office, West Naval Facilities Engineering Command, 1455 Frazee Road, #600, San Diego CA. 92108. This DVR was subcontracted to E-Lab Consultants from Chicago, Bridge, and Iron (CB&I) to serve third party data assessment purposes and evaluates the laboratory data contained in Sample Delivery Groups (SDGs) list in **Table 1-1** produced by TestAmerica Laboratories, Inc.

These samples were analyzed in accordance with the approved *United States Department of Defense (DOD) Quality Systems Manual (QSM) for Environmental Laboratories Version 5.0, July 2013* and the analytical methods specified for the analytes requested on the Chain of Custody (COC) documentation. **Table 1-1** provides a list of the samples collected, a laboratory sample number cross-reference, sample matrix, date collected, sample purpose, and analytical methods performed for each sample pertaining to this DVR. This DVR is conducted per the analysis requested on the COC in accordance with the; *Sampling and Analysis Plan (SAP) October 2013, Environmental Protection Agency (EPA) National Functional Guidelines (NFG) for Organic (NFGO) Data Review (August 2014), NFG for Inorganic (NFGIO) Data Review (August 2014)*, and the method specified for the analysis.

The data were evaluated against the quantitative acceptance limits given in the DOD QSM for the data quality parameters of sensitivity, accuracy, precision, and completeness. **Appendix A** contains the Laboratory Data Report Form 1s that has been annotated with qualifiers assigned during the validation process in accordance with the project procedures manual.

In accordance with SAP, a review of the data was conducted independent of the laboratory. This review consisted of an evaluation of laboratory performance criteria from the case narrative, and an evaluation of the sample-specific criteria included in the laboratory data packages analyzed in accordance with the DOD QSM.

The validation consists of an evaluation of the chain of custody and associated laboratory sample receipt forms, proper sample preservations, holding times, initial calibration and continuing calibration procedures and results, laboratory control sample (LCS) (and duplicate [LCSD] if reported) accuracy and precision and matrix spike (MS) and matrix spike duplicate (MSD) sample analyses, method blanks, field blanks, and field duplicate precision.

Additional review included;

- Organic Analysis; internal standards, surrogate recoveries, instrument tuning, initial calibration, second source calibration verification, continuing calibration verification, internal standards, degradation summary, retention times, second column or second detector confirmations
- Inorganic Analysis; laboratory duplicate precision, instrument tuning, initial calibration, low-level calibration check standards, initial and continuing calibration verification, initial and continuing calibration blanks, interference check sample, internal standards, serial dilution results, post digestion spike recoveries, and interelement correction factors

The results of the independent data review are presented in **Section 2.0**.

Following the specifications in the SAP related to the data validation process, the data were annotated with data validation qualifiers and codes on the analytical data sheets that are required qualifier flags as described in the SAP. **Table 1-2** provides definitions of the data qualifiers references, and **Table 1-3** lists and defines the data review qualifier codes.

Table 1-2
Data Qualifier References

Qualifier	Organics	Inorganics
U	The analyte was analyzed for, but was not detected above the method detection limit.	The analyte was analyzed for, but was not detected above the method detection limit.
J	The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification."	Not applicable.

NJ	The analysis indicates the presence of an analyte that has been "tentatively identified" and the associated numerical value represents its approximate concentration.	Not applicable.
UJ	The analyte was not detected above the method detection limit. However, the associated value is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.	The analyte was analyzed for, but was not detected. The associated value is an estimate and may be inaccurate or imprecise.
R	The sample results are rejected due to serious deficiencies in the ability to analyze the sample and to meet quality control criteria. The presence or absence of the analyte cannot be verified.	The data are unusable. The sample results are rejected due to serious deficiencies in meeting the Quality Control (QC) criteria. The analyte may or may not be present in the sample.

**Table 1-3
Data Review Qualifier Codes**

Reason Code	Description
A	Serial dilution outside criteria (Level IV).
B1	Method blank contaminants above reporting limit.
B2	Calibration blank contaminants above reporting limit.
B2 (Bias flag –)	Calibration blank indicates negative interference, false negatives may be present
B3	Trip blank contamination
B4	Equipment rinsate contamination.
B5	Ambient blank contamination
C	ICV or CCV % D outside control limits.
C1	Initial calibration RSD outside control limit.
C2	Initial calibration RRF outside control limit.
C3	Continuing calibration RRF outside control limit.

D1	Sample Duplicate RPD outside control limit.
D2	Matrix Duplicate RPD outside control limit
E	The sample results exceed the linear calibration range of the instrument.
F	Hydrocarbon pattern does not match hydrocarbon pattern in the standard.
H	Holding time exceeded.
I	Internal standard recovery outside control limit.
L	LCS outside control limits.
M	MS outside control limits.
M1	MS, MSD or RPD outside of control limits
O	Interference check sample outside acceptance criteria
P	Analyte qualified based on the professional judgement of the reviewer.
S	Surrogate recovery outside control limit.
T	Temperature outside acceptance criteria.
Tr	Value reported detected between the DL and LOQ
W	Pesticide breakdown outside criteria (Level IV).
X	Raised reporting limit due to matrix interference or high analyte concentration.
Y	Analyte was not confirmed by a second column.
Y1	Primary and Confirmation Sample Duplicate RPD outside control limit.

2.0 DATA VALIDATION RESULTS

Laboratory Data Package Review

The samples reported, QC designations, and validation level is listed in **Table 1-1**. The data packages were reviewed in accordance with the project procedures manual.

Sample Documentation, Preservation, Handling, and Transport

All samples arrived at the laboratory on time, intact and within preservation requirements.

A cross reference of the COC and analytical reports has concluded all extractions and analysis were performed within the required holding times. The validation met all QC requirements listed in the method and data validation requirements of the SAP. None of the data is qualified based on sample documentation, preservation, handling, or transport

2.1 Radium-226 by GAMMA SPEC (21 DAY INGROWTH)

2.1.1 Instrument Performance Checks

Data verification included the recalculation of raw data, verifying the mass spectral abundance and assignment are correct and within the method requirements. All samples were analyzed with an acceptable BFB performance check and within the 12-hour window requirement.

2.1.2 Instrument Initial Calibrations

Relative Retention Factors (RRF) was verified against the quantitation reports, mass spectra, and chromatograms. Average RRF and percent relative Standard Deviations (%RSD) were verified for one compound associated with each internal standard. All initial calibration average relative response factors were within the project DoD QSM requirements.

2.1.3 Initial Calibration Verifications

The initial calibration curve was verified with a second source standard mix that contained all target compounds.

2.1.4 Continuing Calibrations

Continuing calibration average relative response factors were within the DoD QSM requirements (<20%). Continuing calibrations were performed on a 12-hour basis.

2.1.5 Blanks

Each analytical batch was represented with a method blank. The laboratory reports none of the target compounds were detected in any of the method blanks

2.1.6 Laboratory Control Sample Recovery (Blank Spikes)

The LCS values were validated by recalculating two compounds per LCS. None of the data are qualified based on LCS recoveries.

2.1.7 Matrix Spike/Matrix Spike Duplicate Recoveries

MS/MSD samples were not submitted for this analysis.

2.1.8 Laboratory Duplicate Recoveries

All laboratory generated duplicate recoveries are within QC limits.

2.1.9 Field QC Samples

2.1.9.1 Trip, Equipment and Field Blanks

Field blank samples were not submitted for this analysis.

2.1.10 Target Compound Identification

None of the identified target compounds were qualified based compound identification.

2.1.11 Compound Quantitation and Reporting Limits

Reporting limits were verified to be equal to the Level of Detection (LOD). The LODs have been verified to meet or exceed the project required performance standards. Sample dilutions, cleanup concentrations, and moisture correction have been applied to all reportable results. The results are reported on a dry weight basis where applicable.

2.1.12 Tentatively Identified Compounds

No Tentatively Identified Compounds are reported.

COVER LETTER

March 2, 2017

Lynn Caragan
C, B, & I Federal services
420 Exchange, #150
Irvine, CA. 92602

Dear Mrs. Caragan:

Enclosed is Revision 0 of the data validation report for the Treasure Island Naval Shipyard, Site 12, project number 500060. This DVR encompasses the laboratory data produced by TestAmerica Laboratories, Inc. for the sample delivery groups (SDG) listed in Table 1-1 of the DVR.

The specific sample identifications are listed in the sample identification table(s). The data packages were reviewed per the data validation procedures referenced in the introduction of the report.

Sincerely,

A handwritten signature in cursive script, appearing to read "Larry W. Duty", is positioned above a solid horizontal line.

Larry Duty
Data Validation Project Manager

------------	---

Acronyms and Abbreviations

Following is a list of acronyms and abbreviations that may be used in data validation reports and/or data quality assessment reports.

%D	percent difference	DFTPP	decafluorotriphenylphosphine
%R	percent recovery	DOD	Department Of Defense
µg/L	microgram per liter	DQAR	data quality assessment report
mg/L	milligram per liter		
pg/L	picogram per liter	DUP	laboratory duplicate
µg/kg	microgram per kilogram	DVP	data validation procedure
mg/kg	milligram per kilogram	EDB	ethylene dibromide
ng/kg	nanogram per kilogram	EDL	estimated detection limit
pg/g	picogram per gram	EICP	extracted ion current profile
AA	atomic absorption	EPA	Environmental Protection Agency, United States
ARRF	average relative response factor	EB	equipment blank
BFB	bromofluorobenzene	FB	field blank
BNA	base/neutral/acid compounds	GC	gas chromatography
CCB	continuing calibration blank	GC/ECD	gas chromatography/electron capture detector
CCC	calibration check compound	GC/ELCD	gas chromatography/electrolytic conductivity detector (Hall detector)
CCV	continuing calibration verification	GC/FPD	gas chromatography/flame photometric detector
CF	calibration factor	GC/MS	gas chromatography/mass spectrometry
CLP	Contract Laboratory Program	GC/PID	gas chromatography/photoionization detector
COC	chain of custody record	GFAA	graphite furnace atomic

			absorption
COD	chemical oxygen demand	GPC	gel permeation chromatography
CTO	contract task order	Hg	mercury
CVAA	cold vapor atomic absorption	HPLC	high-performance liquid chromatography
DBCP	dibromochloropropane	HRGC/HR MS	high resolution gas chromatography/high resolution mass spectrometry
DCB	decachlorobiphenyl	RF r2	response factor coefficient of determination
4,4'-DDD	4,4'-dichlorodiphenyldichloroethane	RICRF	reconstructed ion chromatogram response factor
4,4'-DDE	4,4'-dichlorodiphenyldichloroethylene	RLRIC	reporting limit reconstructed ion chromatogram
4,4'-DDT	4,4'-dichlorodiphenyltrichloroethane	RPDRL	relative percent difference reporting limit
ICV	initial calibration verification	RRFRPD	relative response factor relative percent difference
IDL	instrument detection limit	RRTRRF	relative retention time relative response factor
IR	infrared spectroscopy	RSDRRT	relative standard deviation relative retention time
IRP	installation restoration program	RTRSD	retention time relative standard deviation
IS	internal standards	RT	retention time
LCS	laboratory control sample	HT	holding time
MBAS	methyl blue active substance	ICB	initial calibration blank
MDL	method detection limit	ICP	inductively coupled plasma
MS	matrix spike	ICS	interference check sample
MSA	method of standard addition	SDG	sample delivery group

MSD	matrix spike duplicate	SICP	selected ion current profiles
m/z	mass to charge ratio	s/n	signal to noise ratio
NFESC	Naval Facilities Engineering Services Center	SOP	standard operating procedure
OP	organophosphorus	SOW	statement of work
PAH	polynuclear aromatic hydrocarbon	SPCC	system performance check compound
PARCC	precision, accuracy, representativeness, comparability, completeness	SRM	standard reference material
PCB	polychlorinated biphenyl	SVOC	semivolatile organic compound
PCDD	polychlorinated dibenzodioxin	TB	trip blank
PCDF	polychlorinated dibenzofuran	TCDD	tetrachlorodibenzodioxin
PE	performance evaluation	TCX	tetrachloro-m-xylene
PEM	performance evaluation mixture	TDS	total dissolved solids
PFK	perfluorokerosene	TIC	tentatively identified compound
PQO	project quality objective	TOC	total organic carbon
QAPFK	quality assurance perfluorokerosene	TOX	total organic halides
QACQA	quality assurance coordinator quality assurance	TPHE	total petroleum hydrocarbons as extractables
QAPPQA C	quality assurance project plan quality assurance coordinator	UV/VIS	ultraviolet/visible

1.0 INTRODUCTION

This Data Validation Report (DVR) contains the results of the data validation conducted for samples collected and analyzed as part of the Treasure Island Naval Shipyard Site 12 investigation. The project was conducted per contract number N62473-12-D-2005 under task order 004 for the Base Realignment and Closure Program Management Office, West Naval Facilities Engineering Command, 1455 Frazee Road, #600, San Diego CA. 92108. This DVR was subcontracted to E-Lab Consultants from Chicago, Bridge, and Iron (CB&I) to serve third party data assessment purposes and evaluates the laboratory data contained in Sample Delivery Groups (SDGs) list in **Table 1-1** produced by TestAmerica Laboratories, Inc.

These samples were analyzed in accordance with the approved *United States Department of Defense (DOD) Quality Systems Manual (QSM) for Environmental Laboratories Version 5.0, July 2013* and the analytical methods specified for the analytes requested on the Chain of Custody (COC) documentation. **Table 1-1** provides a list of the samples collected, a laboratory sample number cross-reference, sample matrix, date collected, sample purpose, and analytical methods performed for each sample pertaining to this DVR. This DVR is conducted per the analysis requested on the COC in accordance with the; *Sampling and Analysis Plan (SAP) October 2013, Environmental Protection Agency (EPA) National Functional Guidelines (NFG) for Organic (NFGO) Data Review (August 2014), NFG for Inorganic (NFGIO) Data Review (August 2014)*, and the method specified for the analysis.

The data were evaluated against the quantitative acceptance limits given in the DOD QSM for the data quality parameters of sensitivity, accuracy, precision, and completeness. **Appendix A** contains the Laboratory Data Report Form 1s that has been annotated with qualifiers assigned during the validation process in accordance with the project procedures manual.

In accordance with SAP, a review of the data was conducted independent of the laboratory. This review consisted of an evaluation of laboratory performance criteria from the case narrative, and an evaluation of the sample-specific criteria included in the laboratory data packages analyzed in accordance with the DOD QSM.

The validation consists of an evaluation of the chain of custody and associated laboratory sample receipt forms, proper sample preservations, holding times, initial calibration and continuing calibration procedures and results, laboratory control sample (LCS) (and duplicate [LCSD] if reported) accuracy and precision and matrix spike (MS) and matrix spike duplicate (MSD) sample analyses, method blanks, field blanks, and field duplicate precision.

Additional review included;

- Organic Analysis; internal standards, surrogate recoveries, instrument tuning, initial calibration, second source calibration verification, continuing calibration verification, internal standards, degradation summary, retention times, second column or second detector confirmations
- Inorganic Analysis; laboratory duplicate precision, instrument tuning, initial calibration, low-level calibration check standards, initial and continuing calibration verification, initial and continuing calibration blanks, interference check sample, internal standards, serial dilution results, post digestion spike recoveries, and interelement correction factors

The results of the independent data review are presented in **Section 2.0**.

Table 1-1
Sample Field and Laboratory ID Numbers

Field I.D.	Lab Sample Number	Matrix	Date Collected	Purpose	Analytical Methods	Validation Level

Following the specifications in the SAP related to the data validation process, the data were annotated with data validation qualifiers and codes on the analytical data sheets that are required qualifier flags as described in the SAP. **Table 1-2** provides definitions of the data qualifiers references, and **Table 1-3** lists and defines the data review qualifier codes.

Table 1-2
Data Qualifier References

Qualifier	Organics	Inorganics
U	The analyte was analyzed for, but was not detected above the method detection limit.	The analyte was analyzed for, but was not detected above the method detection limit.

J	The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification."	Not applicable.
NJ	The analysis indicates the presence of an analyte that has been "tentatively identified" and the associated numerical value represents its approximate concentration.	Not applicable.
UJ	The analyte was not detected above the method detection limit. However, the associated value is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.	The analyte was analyzed for, but was not detected. The associated value is an estimate and may be inaccurate or imprecise.
R	The sample results are rejected due to serious deficiencies in the ability to analyze the sample and to meet quality control criteria. The presence or absence of the analyte cannot be verified.	The data are unusable. The sample results are rejected due to serious deficiencies in meeting the Quality Control (QC) criteria. The analyte may or may not be present in the sample.

Table 1-3
Data Review Qualifier Codes

Reason Code	Description
A	Serial dilution outside criteria (Level IV).
B1	Method blank contaminants above reporting limit.
B2	Calibration blank contaminants above reporting limit.
B2 (Bias flag –)	Calibration blank indicates negative interference, false negatives may be present

B3	Trip blank contamination
B4	Equipment rinsate contamination.
B5	Ambient blank contamination
C	ICV or CCV % D outside control limits.
C1	Initial calibration RSD outside control limit.
C2	Initial calibration RRF outside control limit.
C3	Continuing calibration RRF outside control limit.
D1	Sample Duplicate RPD outside control limit.
D2	Matrix Duplicate RPD outside control limit
E	The sample results exceed the linear calibration range of the instrument.
F	Hydrocarbon pattern does not match hydrocarbon pattern in the standard.
H	Holding time exceeded.
I	Internal standard recovery outside control limit.
L	LCS outside control limits.
M	MS outside control limits.
M1	MS, MSD or RPD outside of control limits
O	Interference check sample outside acceptance criteria
P	Analyte qualified based on the professional judgement of the reviewer.
S	Surrogate recovery outside control limit.
T	Temperature outside acceptance criteria.
Tr	Value reported detected between the DL and LOQ
W	Pesticide breakdown outside criteria (Level IV).
X	Raised reporting limit due to matrix interference or high analyte concentration.
Y	Analyte was not confirmed by a second column.
Y1	Primary and Confirmation Sample Duplicate RPD outside control limit.

2.0 DATA VALIDATION RESULTS

Laboratory Data Package Review

The samples reported, QC designations, and validation level is listed in **Table 1-1**. The data packages were reviewed in accordance with the project procedures manual.

Sample Documentation, Preservation, Handling, and Transport

All samples arrived at the laboratory on time, intact and within preservation requirements.

A cross reference of the COC and analytical reports has concluded all extractions and analysis were performed within the required holding times. The validation met all QC requirements listed in the method and data validation requirements of the SAP. None of the data is qualified based on sample documentation, preservation, handling, or transport

2.1 Radium-226 by GAMMA SPEC (21 DAY INGROWTH)

2.1.1 Instrument Performance Checks

Data verification included the recalculation of raw data, verifying the mass spectral abundance and assignment are correct and within the method requirements. All samples were analyzed with an acceptable BFB performance check and within the 12-hour window requirement.

2.1.2 Instrument Initial Calibrations

Relative Retention Factors (RRF) was verified against the quantitation reports, mass spectra, and chromatograms. Average RRF and percent relative Standard Deviations (%RSD) were verified for one compound associated with each internal standard. All initial calibration average relative response factors were within the project DoD QSM requirements.

2.1.3 Initial Calibration Verifications

The initial calibration curve was verified with a second source standard mix that contained all target compounds.

2.1.4 Continuing Calibrations

Continuing calibration average relative response factors were within the DoD QSM requirements (<20%). Continuing calibrations were performed on a 12-hour basis.

2.1.5 Blanks

Each analytical batch was represented with a method blank. The laboratory reports none of the target compounds were detected in any of the method blanks

2.1.6 Laboratory Control Sample Recovery (Blank Spikes)

The LCS values were validated by recalculating two compounds per LCS. None of the data are qualified based on LCS recoveries.

2.1.7 Matrix Spike/Matrix Spike Duplicate Recoveries

MS/MSD samples were not submitted for this analysis.

2.1.8 Laboratory Duplicate Recoveries

All laboratory generated duplicate recoveries are within QC limits.

2.1.9 Field QC Samples

2.1.9.1 Trip, Equipment and Field Blanks

Field blank samples were not submitted for this analysis.

2.1.10 Target Compound Identification

None of the identified target compounds were qualified based compound identification.

2.1.11 Compound Quantitation and Reporting Limits

Reporting limits were verified to be equal to the Level of Detection (LOD). The LODs have been verified to meet or exceed the project required performance standards. Sample dilutions, cleanup concentrations, and moisture correction have been applied to all reportable results. The results are reported on a dry weight basis where applicable.

2.1.12 Tentatively Identified Compounds

No Tentatively Identified Compounds are reported.

TestAmerica St. Louis

COVER LETTER

December 14, 2017

Lynn Caragan
C, B, & I Federal services
420 Exchange, #150
Irvine, CA. 92602

Dear Mrs. Caragan:

Enclosed is Revision 0 of the data validation report for the Treasure Island Naval Shipyard, Site 12, project number 500060. This DVR encompasses the laboratory data produced by TestAmerica Laboratories, Inc. for the sample delivery groups (SDG) listed in Table 1-1 of the DVR.

The specific sample identifications are listed in the sample identification table(s). The data packages were reviewed per the data validation procedures referenced in the introduction of the report.

Sincerely,

Larry Duty
Data Validation Project Manager

Data Validation Report 102017 for Treasure Island Site 12, Navy BRAC PMO West

Contract Number N62473-12-D-2005
TO004

San Francisco, California

TestAmerica Laboratories

Subcontract Number 203598

Prepared for CB&I Federal Services
420 Exchange, Suite 150
Irvine, CA 92602
CB&I Project Number 50060

Table of Contents

1.0	INTRODUCTION	1-1
2.0	DATA VALIDATION RESULTS	2-1
	Laboratory Data Package Review.....	2-1
	Sample Documentation, Preservation, Handling, and Transport.....	2-1
2.1	Radium-226 by GAMMA SPEC (21 DAY INGROWTH).....	2-1
2.1.1	Instrument Performance Checks.....	2-1
2.1.2	Instrument Initial Calibrations.....	2-1
2.1.3	Initial Calibration Verifications	2-1
2.1.4	Continuing Calibrations	2-2
2.1.5	Blanks.....	2-2
2.1.6	Laboratory Control Sample Recovery (Blank Spikes).....	2-2
2.1.7	Matrix Spike/Matrix Spike Duplicate Recoveries	2-2
2.1.8	Laboratory Duplicate Recoveries	2-2
2.1.9	Field QC Samples.....	2-2
2.1.9.1	Trip, Equipment and Field Blanks.....	2-2
2.1.10	Target Compound Identification	2-2
2.1.11	Compound Quantitation and Reporting Limits.....	2-2
2.1.12	Tentatively Identified Compounds	2-3

List of Tables

Table 1-1	Sample Field and Laboratory ID Numbers	1-3
Table 1-2	Data Qualifier References	1-9
Table 1-3	Data Review Qualifier Codes	1-10

List of Appendices

Appendix A	Annotated Laboratory Analytical Data Reporting Forms 1s
------------	---

Acronyms and Abbreviations

Following is a list of acronyms and abbreviations that may be used in data validation reports and/or data quality assessment reports.

%D	percent difference	DFTPP	decafluorotriphenylphosphine
%R	percent recovery	DOD	Department Of Defense
µg/L	microgram per liter	DQAR	data quality assessment report
mg/L	milligram per liter		
pg/L	picogram per liter	DUP	laboratory duplicate
µg/kg	microgram per kilogram	DVP	data validation procedure
mg/kg	milligram per kilogram	EDB	ethylene dibromide
ng/kg	nanogram per kilogram	EDL	estimated detection limit
pg/g	picogram per gram	EICP	extracted ion current profile
AA	atomic absorption	EPA	Environmental Protection Agency, United States
ARRF	average relative response factor	EB	equipment blank
BFB	bromofluorobenzene	FB	field blank
BNA	base/neutral/acid compounds	GC	gas chromatography
CCB	continuing calibration blank	GC/ECD	gas chromatography/electron capture detector
CCC	calibration check compound	GC/ELCD	gas chromatography/electrolytic conductivity detector (Hall detector)
CCV	continuing calibration verification	GC/FPD	gas chromatography/flame photometric detector
CF	calibration factor	GC/MS	gas chromatography/mass spectrometry
CLP	Contract Laboratory Program	GC/PID	gas chromatography/photoionization detector
COC	chain of custody record	GFAA	graphite furnace atomic

			absorption
COD	chemical oxygen demand	GPC	gel permeation chromatography
CTO	contract task order	Hg	mercury
CVAA	cold vapor atomic absorption	HPLC	high-performance liquid chromatography
DBCP	dibromochloropropane	HRGC/HR MS	high resolution gas chromatography/high resolution mass spectrometry
DCB	decachlorobiphenyl	RF r2	response factor coefficient of determination
4,4'-DDD	4,4'-dichlorodiphenyldichloroethane	RICRF	reconstructed ion chromatogram response factor
4,4'-DDE	4,4'-dichlorodiphenyldichloroethylene	RLRIC	reporting limit reconstructed ion chromatogram
4,4'-DDT	4,4'-dichlorodiphenyltrichloroethane	RPDRL	relative percent difference reporting limit
ICV	initial calibration verification	RRFRPD	relative response factor relative percent difference
IDL	instrument detection limit	RRTRRF	relative retention time relative response factor
IR	infrared spectroscopy	RSDRRT	relative standard deviation relative retention time
IRP	installation restoration program	RTRSD	retention time relative standard deviation
IS	internal standards	RT	retention time
LCS	laboratory control sample	HT	holding time
MBAS	methyl blue active substance	ICB	initial calibration blank
MDL	method detection limit	ICP	inductively coupled plasma
MS	matrix spike	ICS	interference check sample
MSA	method of standard addition	SDG	sample delivery group

MSD	matrix spike duplicate	SICP	selected ion current profiles
m/z	mass to charge ratio	s/n	signal to noise ratio
NFESC	Naval Facilities Engineering Services Center	SOP	standard operating procedure
OP	organophosphorus	SOW	statement of work
PAH	polynuclear aromatic hydrocarbon	SPCC	system performance check compound
PARCC	precision, accuracy, representativeness, comparability, completeness	SRM	standard reference material
PCB	polychlorinated biphenyl	SVOC	semivolatile organic compound
PCDD	polychlorinated dibenzodioxin	TB	trip blank
PCDF	polychlorinated dibenzofuran	TCDD	tetrachlorodibenzodioxin
PE	performance evaluation	TCX	tetrachloro-m-xylene
PEM	performance evaluation mixture	TDS	total dissolved solids
PFK	perfluorokerosene	TIC	tentatively identified compound
PQO	project quality objective	TOC	total organic carbon
QAPFK	quality assurance perfluorokerosene	TOX	total organic halides
QACQA	quality assurance coordinator quality assurance	TPHE	total petroleum hydrocarbons as extractables
QAPPQA C	quality assurance project plan quality assurance coordinator	UV/VIS	ultraviolet/visible
QCQAPP	quality control quality assurance project plan	VOA	volatile organic analysis
QSM QC	quality system manual quality control	VOC	volatile organic compound
rQSM	correlation coefficient quality system manual	VTSR	validated time of sample receipt

r ² r	coefficient of determination correlation coefficient	WDM	window defining mixture

1.0 INTRODUCTION

This Data Validation Report (DVR) contains the results of the data validation conducted for samples collected and analyzed as part of the Treasure Island Naval Shipyard Site 12 investigation. The project was conducted per contract number N62473-12-D-2005 under task order 004 for the Base Realignment and Closure Program Management Office, West Naval Facilities Engineering Command, 1455 Frazee Road, #600, San Diego CA. 92108. This DVR was subcontracted to E-Lab Consultants from Chicago, Bridge, and Iron (CB&I) to serve third party data assessment purposes and evaluates the laboratory data contained in Sample Delivery Groups (SDGs) list in **Table 1-1** produced by TestAmerica Laboratories, Inc.

These samples were analyzed in accordance with the approved *United States Department of Defense (DOD) Quality Systems Manual (QSM) for Environmental Laboratories Version 5.0, July 2013* and the analytical methods specified for the analytes requested on the Chain of Custody (COC) documentation. **Table 1-1** provides a list of the samples collected, a laboratory sample number cross-reference, sample matrix, date collected, sample purpose, and analytical methods performed for each sample pertaining to this DVR. This DVR is conducted per the analysis requested on the COC in accordance with the; *Sampling and Analysis Plan (SAP) October 2013, Environmental Protection Agency (EPA) National Functional Guidelines (NFG) for Organic (NFGO) Data Review (August 2014), NFG for Inorganic (NFGIO) Data Review (August 2014)*, and the method specified for the analysis.

The data were evaluated against the quantitative acceptance limits given in the DOD QSM for the data quality parameters of sensitivity, accuracy, precision, and completeness. **Appendix A** contains the Laboratory Data Report Form 1s that has been annotated with qualifiers assigned during the validation process in accordance with the project procedures manual.

In accordance with SAP, a review of the data was conducted independent of the laboratory. This review consisted of an evaluation of laboratory performance criteria from the case narrative, and an evaluation of the sample-specific criteria included in the laboratory data packages analyzed in accordance with the DOD QSM.

The validation consists of an evaluation of the chain of custody and associated laboratory sample receipt forms, proper sample preservations, holding times, initial calibration and continuing calibration procedures and results, laboratory control sample (LCS) (and duplicate [LCSD] if reported) accuracy and precision and matrix spike (MS) and matrix spike duplicate (MSD) sample analyses, method blanks, field blanks, and field duplicate precision.

Additional review included;

- Organic Analysis; internal standards, surrogate recoveries, instrument tuning, initial calibration, second source calibration verification, continuing calibration verification, internal standards, degradation summary, retention times, second column or second detector confirmations
- Inorganic Analysis; laboratory duplicate precision, instrument tuning, initial calibration, low-level calibration check standards, initial and continuing calibration verification, initial and continuing calibration blanks, interference check sample, internal standards, serial dilution results, post digestion spike recoveries, and interelement correction factors

The results of the independent data review are presented in **Section 2.0**.

- Sample id represents a resample of the location. Refer to the Project reporting documents for additional explanation

Following the specifications in the SAP related to the data validation process, the data were annotated with data validation qualifiers and codes on the analytical data sheets that are required qualifier flags as described in the SAP. **Table 1-2** provides definitions of the data qualifiers references, and **Table 1-3** lists and defines the data review qualifier codes.

Table 1-2
Data Qualifier References

Qualifier	Organics	Inorganics
U	The analyte was analyzed for, but was not detected above the method detection limit.	The analyte was analyzed for, but was not detected above the method detection limit.

J	The analyte was positively identified; the associated numerical value is the approximate concentration of the analyte in the sample.	The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification."	Not applicable.
NJ	The analysis indicates the presence of an analyte that has been "tentatively identified" and the associated numerical value represents its approximate concentration.	Not applicable.
UJ	The analyte was not detected above the method detection limit. However, the associated value is approximate and may or may not represent the actual limit of quantitation necessary to accurately and precisely measure the analyte in the sample.	The analyte was analyzed for, but was not detected. The associated value is an estimate and may be inaccurate or imprecise.
R	The sample results are rejected due to serious deficiencies in the ability to analyze the sample and to meet quality control criteria. The presence or absence of the analyte cannot be verified.	The data are unusable. The sample results are rejected due to serious deficiencies in meeting the Quality Control (QC) criteria. The analyte may or may not be present in the sample.

**Table 1-3
Data Review Qualifier Codes**

Reason Code	Description
A	Serial dilution outside criteria (Level IV).
B1	Method blank contaminants above reporting limit.
B2	Calibration blank contaminants above reporting limit.

B2 (Bias flag –)	Calibration blank indicates negative interference, false negatives may be present
B3	Trip blank contamination
B4	Equipment rinsate contamination.
B5	Ambient blank contamination
C	ICV or CCV % D outside control limits.
C1	Initial calibration RSD outside control limit.
C2	Initial calibration RRF outside control limit.
C3	Continuing calibration RRF outside control limit.
D1	Sample Duplicate RPD outside control limit.
D2	Matrix Duplicate RPD outside control limit
E	The sample results exceed the linear calibration range of the instrument.
F	Hydrocarbon pattern does not match hydrocarbon pattern in the standard.
H	Holding time exceeded.
I	Internal standard recovery outside control limit.
L	LCS outside control limits.
M	MS outside control limits.
M1	MS, MSD or RPD outside of control limits
O	Interference check sample outside acceptance criteria
P	Analyte qualified based on the professional judgement of the reviewer.
S	Surrogate recovery outside control limit.
T	Temperature outside acceptance criteria.
Tr	Value reported detected between the DL and LOQ
W	Pesticide breakdown outside criteria (Level IV).
X	Raised reporting limit due to matrix interference or high analyte concentration.
Y	Analyte was not confirmed by a second column.
Y1	Primary and Confirmation Sample Duplicate RPD outside control limit.

2.0 DATA VALIDATION RESULTS

Laboratory Data Package Review

The samples reported, QC designations, and validation level is listed in **Table 1-1**. The data packages were reviewed in accordance with the project procedures manual.

Sample Documentation, Preservation, Handling, and Transport

All samples arrived at the laboratory on time, intact and within preservation requirements.

A cross reference of the COC and analytical reports has concluded all extractions and analysis were performed within the required holding times. The validation met all QC requirements listed in the method and data validation requirements of the SAP. None of the data is qualified based on sample documentation, preservation, handling, or transport

2.1 Radium-226 by GAMMA SPEC (21 DAY INGROWTH)

2.1.1 Instrument Performance Checks

Data verification included the recalculation of raw data, verifying the mass spectral abundance and assignment are correct and within the method requirements. All samples were analyzed with an acceptable BFB performance check and within the 12-hour window requirement.

2.1.2 Instrument Initial Calibrations

Relative Retention Factors (RRF) was verified against the quantitation reports, mass spectra, and chromatograms. Average RRF and percent relative Standard Deviations (%RSD) were verified for one compound associated with each internal standard. All initial calibration average relative response factors were within the project DoD QSM requirements.

2.1.3 Initial Calibration Verifications

The initial calibration curve was verified with a second source standard mix that contained all target compounds.

2.1.4 Continuing Calibrations

Continuing calibration average relative response factors were within the DoD QSM requirements (<20%). Continuing calibrations were performed on a 12-hour basis.

2.1.5 Blanks

Each analytical batch was represented with a method blank. The laboratory reports none of the target compounds were detected in any of the method blanks

2.1.6 Laboratory Control Sample Recovery (Blank Spikes)

The LCS values were validated by recalculating two compounds per LCS. None of the data are qualified based on LCS recoveries.

2.1.7 Matrix Spike/Matrix Spike Duplicate Recoveries

MS/MSD samples were not submitted for this analysis.

2.1.8 Laboratory Duplicate Recoveries

All laboratory generated duplicate recoveries are within QC limits.

2.1.9 Field QC Samples

2.1.9.1 Trip, Equipment and Field Blanks

Field blank samples were not submitted for this analysis.

2.1.10 Target Compound Identification

None of the identified target compounds were qualified based compound identification.

2.1.11 Compound Quantitation and Reporting Limits

Reporting limits were verified to be equal to the Level of Detection (LOD). The LODs have been verified to meet or exceed the project required performance standards. Sample dilutions, cleanup concentrations, and moisture correction have been applied to all reportable results. The results are reported on a dry weight basis where applicable.

- Sample TITO04-NP-SU5-SWFSS-5-16-S002 (160-19909-1) was reported twice in the Laboratory SDG. The recount analysis have been determined to be the accurate reportable result.

2.1.12 Tentatively Identified Compounds

No Tentatively Identified Compounds are reported.

Field Work Variances

Non-Time Critical Removal Action, Solid Waste Disposal Areas Westside, Bayside, and North Point Former Naval Station Treasure Island, San Francisco, Californian, (IR)		
Project Name: <u>Site 12-Phase III)</u>	DCN: <u>CBI-2005-0004-0065</u>	
Project Number: <u>500060</u>	Project Manager: <u>Ulrika Messer</u>	WV #: <u>003</u>
Contract Number: <u>N62473-12-D-2005</u>	SWDIV RPM: <u>Chris Yantos, Dave Clark</u>	Date: <u>1/6/2016</u>
CTO Number: <u>CTO 0004</u>	SWDIV CS: <u>Steve Miliner</u>	
Modification 04-Changes to Final Approved SAP to add Chemical and Radiological sampling to Bldg 1235 footprint - originally not included in Item: the SWDA North Point sampling areas.		
Primary WBS: <u>500060</u>		
Description (include recommended action to resolve changed condition and action taken to date) Modification 04 to CTO 004 adds Building 1235 demolition, excavation, chemical confirmation and radiological characterization sampling under the footprint of the demolished building. All chemical and radiological sampling will be consistent with existing approved Final SAP for the SWDA North Point area.		
Action This FWV documents the additions to Work Sheets (WS)#2 and #18 and revised applicable figures to describe the required sampling to complete the additional requirements of Contract Modification 04. All sampling and analytical procedures described in the Final SAP for CTO 004 (CBI, 2015) remain in place for this FWV. Data Quality Objectives for these additional samples have not changed from the original approved SAP. This FWV only describes numbers and types of additional samples to be collected under the new area added to the contract, i.e. Building 1235 footprint upon completion of demolition and excavation. See attached additions to SAP WS#2 (crosswalk), WS#18 and Figures 1, 2 and 3.		
Reason for Change To complete chemical confirmation sampling and radiological characterization sampling under Building 1235 footprint upon completion of demolition and excavation.		
Technical Justification Navy awarded additional scope to the original contract, including Bldg 1235 footprint.		
Estimated Cost Impact Captured in CTO Modification 04	Estimated Schedule Impact Captured in CTO Modification 04	WBS Information X WBS Code Opened to Capture Cost Task Title: WBS Code: 07012702

Item: <u>Section 6.5 Radiological Characterization Survey and Sampling</u>	Primary WBS:	<u>500060</u>

Description *(include recommended action to resolve changed condition and action taken to date)*

The Final WP Section 6.5 states that "Radiological soil samples will be collected when the planned extent of excavation is reached. Radiological samples will be collected from the excavation bottom on a random-start triangular systematic grid at a frequency of 20 samples per 1,000 square meters, or 50 square meters per sample (Figures 15 through 20)." This FWV is issued to clarify that if the bottom is submerged and the bottom soil layer is excavated in accordance with Section 6.5.6 and transported to an RSY pad for final gamma scan and systematic soil sampling, those systematic soil samples are the equivalent samples and will thereby represent the excavation bottom systematic grid samples as required by Section 6.5.

Action

Modify text to Final Work Plan Section 6.5, third row "Radiological Characterization Survey and Sampling" to: (changed text in *italics*)
Radiological soil samples will be collected when the planned extent of excavation is reached. Radiological samples will be collected from the excavation bottom on a random-start triangular systematic grid at a frequency of 20 samples per 1,000 square meters, or 50 square meters per sample (Figures 15 through 20). *If the bottom of the excavation is submerged by water and 6 inches of submerged soil at the excavation extent is removed and placed on an RSY pad for final gamma scanning in accordance with Section 6.5.6, the soil layer on the RSY pad representing the bottom will be radiologically sampled systematically at the same frequency as if the soil layer was still in situ. The samples collected from the representative soil layer on the bottom will be equivalent to in situ samples.*

Although some radiological samples were collected during Phase I of the NTCRA, results from those samples will be used only for guiding specific remediation activities (Section 6.6) and not for final release. All samples used to support the radiological release of the SWDAs will be collected during Phase III and analyzed by a laboratory accredited in the Department of Defense Environmental Accreditation Program. Additional details are provided in the following subsections.

Reason for Change

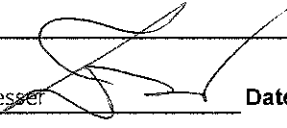

As the project was planned, excavation depths were generally expected to reach 4 ft bgs and not anticipated to extend beyond the water table. Because excavation surfaces can not be radiologically gamma scanned under water, the submerged bottom (and sidewalls as applicable) soil layer is excavated and placed on an RSY pad. This FWV clarifies that the samples collected on the representative soil layer on an RSY pad are equivalent to, and represent, the excavated bottoms and sidewalls as applicable.

Technical Justification

See above. Given that the origin and volumes of soils are closely tracked, systematic sampling on the RSY Pad is equivalent to the systematic sampling originally planned to be mainly executed in situ.
