Main Street,
Hancocks Bridge
New Jersey 08038
November 9, 1976

Gentlemen:

I wish to thank Mr. Karl Abraham from the regional office for the information to Radio Station W.T.I.C. The interest here in Salem Co is acute and perhaps a communication link to W.T.I.C. from the N.R.C., would be in accord.

BUCKET NUMBER

PROD. & UTIL. 50-272,311

I read in Today Sunbeam today a full power operating license for Salem #1 is expected this week by P.S.E. & G.

May I ask if the company is able to notify emergency planning people at the local + state level if any offsite problems are anticipated? Also it is my understanding the N.R.C. requires a full scale drill of these emergency procedures before an operating license is issued and requires them to test communications.

I question this as a resident of the PAZ expressing concern of the availability of workable communications.
Sincerely, Mrs. Richard Hanner
