**Subject:** Pending NRC License Amendment Discussion 11.28.2018 - Follow-Up

Hello Craig,

Thank you again for taking time out of your afternoon to discuss your pending NRC license amendment request. As we discussed, below is a list of the items from your previous submissions dated September 29, 2018 and Nov. 2, 2018 that we request be included with your pending response.

1. Please formally request to remove Carson Young from the license.
2. Letter dated Nov. 2, 2018: please include your response provided in Item 2.a. regarding source exchanges to be performed by vendors.
3. Letter dated Nov. 2, 2018: please include your response provided in Item 3.e. regarding survey meter possession and calibration.
4. Letter dated Nov. 2, 2018: please include your response provided in Item 3.f. regarding 10 CFR 20.1301 radiation limits to non-radiation workers. Please also include the referenced survey results in Attachment 6.
5. Letter dated Nov. 2, 2018: please include the picture concept referenced in Other Items: 1 with your updated submission. Additional information regarding the description of the new storage bins and where/how they will be used was requested in Item 12 of the conversation record sent on Nov. 9, 2018. Please ensure that updated response to this item includes the picture concept of the bins currently included in Attachment 7.
6. Letter dated Nov. 2, 2018: please include your response provided in Other Items: 2 confirming that the locking mechanism of the temporary storage cabinet has been repaired.

Additionally, as we discussed today, please update Step 12 of your procedures to include a threshold dose rate limit for workers to reference when taking survey readings to confirm that the device shutter is in the closed position. I understand that you will need additional time to submit this updated procedure.

Please feel free to contact me if you have any questions. You can reach me at 630-829-9712.

Thank you,  
Laura
