Hanson (EGC), "Byron Station, Unit Nos. 1 and 2 - Supplemental Information Needed for Acceptance of Requested Licensing Action Re: One-Time Extension of Technical Specification 3.8.1, 'AC Sources-Operating,' A2 Completion Time (EPID L-2018-LLA-0218)," dated December 12, 2018
 3. Letter from D. M. Gullott (EGC) to NRC, "Supplemental Information Related to License Amendment Request for a One-Time Extension to Technical Specification 3.8.1, 'AC Sources-Operating,' Required Action A.2," dated December 21, 2018

In Reference 1, Exelon Generation Company, LLC (EGC) requested an amendment to Facility Operating License (FOL) Nos. NPF-37 and NPF-66 for Byron Station, Units 1 and 2. The proposed change to the Byron Station, Units 1 and 2 Technical Specifications (TS) was intended to serve as a contingency to allow the restoration of an inoperable qualified circuit between the offsite transmission network and the onsite Class 1E AC Electrical Power Distribution System that would result from an unanticipated failure of Unit 2 System Auxiliary Transformer (SAT) 242-1.

In Reference 2, the NRC requested supplemental information required to complete its review of Reference 1.

In Reference 3, EGC provided the information requested in Reference 2.

Based on the current schedule for the replacement of Byron Station, Unit 2 SAT 242-2, EGC hereby withdraws its Reference 1 request for amendments to the Byron Station, Units 1 and 2 Technical Specifications.

There are no regulatory commitments contained within this letter.

If you have any questions concerning this letter, please contact Mr. Mitchel A. Mathews at (630) 657-2819.

Respectfully,

A handwritten signature in black ink, appearing to read 'D. M. Gullott', followed by a horizontal line.
