Subject: Draft EA available for comment -- proposed amendment to Army's NRC license for possession of depleted uranium at Jefferson Proving Ground

Greetings,

The NRC has published a draft EA assessing the potential environmental impacts associated with a proposed amendment of NRC source materials license SUB-1435 for the Jefferson Proving Ground in southeastern Indiana. The NRC staff is making the draft EA and draft finding of no significant impact available for a 30-day comment period. The comment period will start with the publication of a notice in the *Federal Register*, which we expect will be on Monday, February 4.

You may access the draft EA here: <https://www.nrc.gov/docs/ML1900/ML19008A310.pdf>. If you would like to receive a paper copy by mail, please let us know.

Please provide the NRC with any comments on the draft EA through one of these means:

- Through the Federal Rulemaking Web Site (go to <http://www.regulations.gov> and search for Docket ID NRC-2019-0027)
- Through the U.S. mail to Office of Administration, Mail Stop TWFN-7-A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001 (include Docket ID NRC-2019-0027 in the subject line)
- By e-mail to JPG-EA@nrc.gov

The NRC staff will consider all of the comments we receive on the draft EA. If you have any questions about the proposed licensing action or the environmental review process, please feel free to call me at the number below or reply to this email.

Please let us know if you prefer not to receive future communications about this project.

Kind Regards,
Christine

Christine Pineda
