Office of New Reactors

SUBJECT: SUMMARY OF A PUBLIC MEETING WITH SOUTHERN NUCLEAR
OPERATING COMPANY ON MARCH 28, 2019

The U.S. Nuclear Regulatory Commission (NRC) staff held a Category 1 public meeting with Southern Nuclear Operating Company (SNC) on March 28, 2019. The purpose of the meeting was to discuss issues associated with the Uncompleted Inspection, Test, Analysis, and Acceptance Criteria (ITAAC) Notification (UIN), Item 2.2.02.07f.i [Index No. 145] for SNC's Vogtle Electric Generating Plant (VEGP) Units 3 and 4.

The meeting notice can be found in the Agencywide Documents Access and Management System (ADAMS) under Accession No. ML19052A394. The meeting notice is also posted on the NRC public website. Enclosures 1 and 2 are the meeting agenda and attendance list for the meeting, respectively. The other documents referenced during the discussion can be found at the ADAMS Accession Nos. given below:

- Notice of Uncompleted ITAAC 225-days Prior to Initial Fuel Load, Item 2.2.02.07f.i [Index No. 145] ML19052A376
- UIN ICN [ITAAC Closure Notice] comment status sheet ITAAC Index No. 145 ML19077A387
- Briefing: Passive Containment Cooling Water Flow Tests, ITAAC Index 145 ML19084A139

CONTACT: Donald Habib, NRO/DLSE
(301) 415-1035

Summary of Meeting:

On March 28, 2019, staff from the NRC conducted a public meeting with representatives from SNC to discuss issues associated with the proposed testing methodology for SNC's VEGP Units 3 and 4 Notice of Uncompleted ITAAC for Item 2.2.02.07f.i, ITAAC Index No. 145. The staff had commented on the notice, and SNC requested a meeting to explain its approach to completing the ITAAC.

SNC briefed their presentation (ADAMS Accession No. ML19084A139) to the staff, and the staff asked clarifying questions about SNC's approach for the test, which involves measuring water delivery rates between the passive containment cooling system ancillary water storage tank, the passive containment cooling system water storage tank, and the spent fuel pool. SNC's approach for completing the ITAAC divided the test into two flowpaths, each with two segments and sharing a common point, and performing the test of each flowpath at different times to support the construction schedule and equipment availability issues. Detailed information about the testing configuration was provided in the briefing.

The staff commented that including the figures from the presentation in the UIN for this ITAAC would provide clarity to support the ITAAC closure. SNC agreed to follow up with the staff about whether additional information would be formally submitted to support the UIN.

At the conclusion of the meeting, there was an opportunity for the public to provide comments and ask questions. There were no comments or questions from the public.

Note: Subsequent to the meeting, SNC informed the staff it would resubmit the UIN with the additional figures.

Docket Nos.: 52-025
52-026

Enclosure:
As stated
