Subject: [External_Sender] Nuclear Plant Worker (Work) Quality

Hi Bridget,

Within the last year, as I recall, both Southern company and Entergy have been embarrassed by the "performance" of their operating crews. In one case, they lied about actually doing their assigned rounds. I don't recall what the other problem was. Perhaps this type of performance is now here in Oswego County.

A tactful question about the frequency of Random Drug testing for maintenance and operating crews may be in order.

Thank you,

Tom
