Attachments: NRC-2016-0024-0001 (1).pdf

Good morning.

The Nuclear Regulatory Commission recently published a *Federal Register* Notice announcing our intent to submit an information collection request to the Office of Management and Budget (OMB) for *Reporting of Defects and Noncompliance*. A supporting statement describing the requested information is available at <http://regulations.gov> by searching docket NRC–2016–0024.

As a potential respondent to this information collection, we are interested in your feedback. Specifically, we are seeking input on the following questions by October 12, 2016:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions?
Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

Comments can be submitted by going to <http://www.regulations.gov> and searching for Docket No. NRC–2016–0024. Please note that comments will be made available for public inspection. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

If you have any questions regarding this correspondence, please contact me via email or telephone.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized below.

1. *The title of the information collection:* 10 CFR part 21, "Reporting of Defects and Noncompliance."

2. *OMB approval number:* 3150-0035.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* On occasion. Defects and noncompliances are reportable as they occur.

6. *Who will be required or asked to respond:* Individual directors and responsible officers of firms constructing, owning, operating, or supplying the basic components of any facility or activity licensed under the Atomic Energy Act of 1954, as amended, or the Energy Reorganization Act of 1974, as amended, to report immediately to the NRC the discovery of defects in basic components or failures to comply that could create a substantial safety hazard.

7. *The estimated number of annual responses:* 530 (177 reporting responses + 3 third party disclosure responses + 350 recordkeepers).

8. *The estimated number of annual respondents:* 350.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 43,425 hours (17,883 hours reporting + 25,257 hours recordkeeping + 285 hours third-party disclosure).

10. *Abstract:* Part 21 of title 10 of the *Code of Federal Regulations* (10 CFR), requires each individual, corporation, partnership, commercial grade dedicating entity, or other entity subject to the regulations in this part to adopt appropriate procedures to evaluate deviations and failures to comply to determine whether a defect exists that could result in a substantial safety hazard. Depending upon the outcome of the evaluation, a report of the defect

must be submitted to the NRC. Reports submitted under 10 CFR part 21 are reviewed by the NRC staff to determine whether the reported defects or failures to comply in basic components at the NRC licensed facilities or activities are potentially generic safety problems. These reports have been the basis for the issuance of numerous NRC Generic Communications that have contributed to the improved safety of the nuclear industry. The records required to be maintained in accordance with 10 CFR part 21 are subject to inspection by the NRC to determine compliance with the subject regulation.

III. Specific Requests for Comments
