May 16, 2019

Mr. David Drucker
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Mr. Drucker,

My family and I support the the National Parks Conservation Association and I am writing to express my opposition to Florida Power & Light's plans to extend the operating life of the nuclear reactors at Turkey Point Nuclear Power Plant.

We believe that Turkey Point's current operations already jeopardize the health of Biscayne National Park, threatened and endangered wildlife, Everglades restoration plans, and the quality of South Florida's drinking water.

Contaminated water from Turkey Point's antiquated cooling canal system has been seeping into the groundwater and polluting surface waters connected to Biscayne and the aquifer that supplies drinking water for millions.

In addition, Turkey Point's geographic location makes it particularly susceptible to sea level rise and storm surge impacts. Even the most optimistic sea level rise projections point towards Turkey Point and parts of the cooling canals being inundated by 2040. That's 13 years before the end of the reactors' operating life if this proposal is approved!

This is why we strongly suggest that any plans to extend the operating life of Turkey Point must include concrete measures to address both the water contamination and threats from sea level rise and storm surge to protect Biscayne National Park and the health of surrounding communities and natural areas.

If not, the plant's cooling canals should be decommissioned and replaced with alternate cooling technology, such as mechanical draft cooling towers.

Thank you for taking the time to read my letter.

Sincerely,

Mrs. Ursula Cohrs
