Mr. David Drucker
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Mr. Drucker,

Turkey Point's reactor and cooling mechanisms pose a threat to the ecosystems of South Florida. As state citizens, we need to take action to protect the quality of our water, since water is the basis of all life. The Turkey Point area will likely be inundated in the very near future, and the nuclear reactor needs to be decommissioned and removed far before the rise in sea levels threatens the stability and safety of the reactor. Our state boasts some of the most important well-preserved aquatic ecosystems in the United States, and it is our responsibility as citizens to protect them as long as we are able.

Warm regards,

Sincerely,

Mr. Michael Nilon
