May 19, 2019

Mr. David Drucker
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Mr. Drucker,

It's more important to take care of sea life and stop water pollution than it is to continue to run the nuclear plant at Turkey Point and figure out how to do it under water.

Contaminated water from Turkey Point's antiquated cooling canal system has been seeping into the groundwater and polluting surface waters.

Any plans to extend the operating life of Turkey Point must include concrete measures to address both the water contamination and threats from sea level rise and storm surge.

Thank you.

Sincerely,

Ms. Donna Grace
