---

I am seeking access to records under the Freedom of Information Act.

Please provide the records related to evaluations and/or calculations performed to develop and/or support the suggested release criteria for cats treated for hyperthyroidism with I-131 contained on NUREG-1556, Volume 7, Revision 1, Appendix D, page D-4. These requested documents should include, but not be limited to, the analyses and simulations mentioned in Dr. Katie Tapp's email to myself on February 1, 2019 (copy attached) and information regarding cat behavioral characteristics used to develop the analyses and simulations. This request includes emails, correspondence, calculations, and electronic files related to this topic, including but not limited to, those developed by, or to or from, the authors of NUREG-1556 Volume 7 Revision 1, K. Avery, M. Hammond, S. Hawkins, B. Parker, and B. Ullrich, and any other NMSS staff involved with this revision.

I request that the records be provided in their native format (e.g. MSExcel .xls or .xlsx, MSWord .doc or .docx files as applicable) such that the equations contained in the spreadsheet cells are viewable.

I am willing to pay applicable fees associated with processing my request. Please provide the cost estimate for processing this request.

Matthew Arno, Ph.D., P.E., CHP
