**Attachments:** 03214.611850.13-35481-01.NRC 699 signed.pdf

Dear Mr. Bayt:

Thank you for taking the time this morning to discuss the referenced radioactive materials license termination request with me. As we discussed, our office has reviewed the March 8, 2019 request from Daniel Polsky, BWGS, LLC, to terminate the referenced NRC radioactive materials license authorizing receipt and possession of krypton-85 sealed sources in lamps.

I have provided the request for additional information in the attached NRC Form 699, "Conversation Record." As noted, the requested information is based on information requested in the NRC Form 314, "Certificate of Disposition of Materials," as required by Title 10 of the Code of Federal Regulations Section 30.36(j).

As noted on the attached document, you may provide your response directly on the NRC Form 314, or via a signed and dated letter. In either case, you may send the response as a pdf file attached to an email message. Upon receipt of the requested final disposition information for the krypton-85 sources, previously stored in the licensee's Mooresville, Indiana facilities, the NRC will proceed with completing the termination of the referenced license, as requested.

Please do not hesitate to contact me if you have any questions concerning this request.

Sincerely,

Sara A. Forster, Health Physicist Licensing Reviewer
