Re: Catawba Nuclear Station  
IE Bulletin 79-02, Revision 1  
Duke Files: CN-1412.11-1 and CN-1196.02

Dear Mr. O'Reilly:

Mr. W. O. Parker, Jr., has forwarded to your office a copy of Teledyne Engineering Services Technical Report TR-3501-1 in his letter of August 14, 1979. This report contains the results of the cyclic testing which was performed at Catawba per the requirements of the referenced IE Bulletin. In a telephone conversation between R. B. Priory of this office and W. P. Ang of your office, Duke was informed that a single submittal of this report would be sufficient for replies to this bulletin on all of Duke's nuclear stations. For this reason, Mr. Parker's submittal of this report is referenced as Duke's final response to this bulletin for Catawba.

Very truly yours,

L. C. Dail, Vice-President  
Design Engineering
