ATTENTION: Mr. J. P. O'Reilly, Director

Dear Mr. O'Reilly:

SUBJECT: Grand Gulf Nuclear Station
File 0270/15525/15526
Potential Reportable Deficiency
No. 79/05 - Interim Report No.
3
AECM-79/97

On February 23, 1979, Mississippi Power & Light Company notified Mr. W. B. Kenna of your office, of a potential reportable deficiency at the Grand Gulf Nuclear Station construction site. The deficiency concerns improper drawings supplied by the General Electric Company.

General Electric has issued a Field Deviation Disposition Request (FDDR) calling for changes in wire and cable lists. Consequently, all termination cabinet panels at the site are being reviewed against as-shipped drawings. We expect to submit the findings of this review in a final report by November 30, 1979.

Yours truly,

L. F. Dale
Nuclear Project Manager
