Mr Hendrie,

I was just wondering,
why in the world does the NRC
bother to set federal standards on
radiations releases from nuclear
power plants? I am referring to
Peach Bottom Nuclear Power Plant
in Penn.

I feel their license
should be revoked until their
plant proves safe.

Also I wanted to send
you some water from Lancaster
city. I figured you wouldn't drink
it. I hope you and the NRC and
Met-Ed can live with the accident
at Three Mile Island and its effects
~~it~~ it's had on people like me.
