U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555  
ATTN: Docketing & Service Section

To whom this may concern:

We wish to be full party to the proposed Allens Creek nuclear plant project near Wallis, Texas. We have not intervened previously as prior notices were too restrictive and ambiguous; thus, we did not know that it was expedient to do so.

As residents of Orchard, Texas, we live well within the 50-mile radius of the proposed Allens Creek site. We have lived here for almost two years now, and will continue to do so unless the AllensCenter facility comes on stream.

As former residents of New England, we are quite familiar with nuclear power facilities already in operation. And because of this familiarity, we fear real and imminent danger to us and to our future issue. As a farrier and professional horse trainer, we also fear that Allens Creek would pose a danger to our livelihood --- as that livelihood depends strongly on the health and well-being of the environment and other living things.

Until that time when we have the technology and the empherical restraint to build and operate nuclear plants in a 100% fail-safe manner, we fear strongly for all life forms. Especially with the problem of nuclear waste as yet so carelessly unsolved. Who knows which of us will be the first to be adversely effected? Will it be us? Or will it be our as yet unconceived child?

We demand that you stop this now. For it is much easier and wiser to move forward carefully, at a snail's pace...than it is to recreate something rare and beautiful which haste and short-sightedness has destroyed.

Sincerely,

*Bruce A. Palmiter*

*Doreen J. Dvorin*
