Dear Senator Williams;

I am very concerned over the plans to issue a manufacturing license to Offshore Power Systems of Jacksonville, Florida, a Westinghouse subsidiary, to build eight floating nuclear power plants in the Atlantic and the Gulf of Mexico. I am unable to learn if they recieved this license; would you please let us know if they have? I am concerned that we are having troubles containing oil slicks---how could we possibly handle nuclear leaks? I would like to see our nation stop adding to our nuclear wastes until our bright scientists have discovered a way to de-activate nuclear wastes! Thank you for your help.

Sincerely,

Patricia A. Nilsson
