Office Nuclear Reactor Regulation  
Attn: William Gammill, Acting Assistant Director  
Division of Operating Reactors, Projects  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

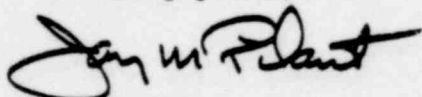

Subject: Letter entitled, "Adequacy of Station Electric  
Distribution Systems Voltages," William Gammill to all  
Power Reactor Licensees, August 8, 1979

Dear Mr. Gammill:

The subject letter requested Nebraska Public Power District to submit an analysis for Cooper Nuclear Station by October 8, 1979. This letter is written to inform the NRC that due to the large amount of time required to acquire all of the power source and power distribution equipment data necessary for the analysis, the analysis will be submitted approximately November 15, 1979.

If you have any questions relative to this extended submittal date, please do not hesitate to contact me.

Sincerely yours,

Jay M. Pilant  
Director of Licensing  
and Quality Assurance
