The aircraft struck a building, causing significant damage and resulting in the death of several people.	
8. The aircraft was flying at a low altitude (approximately 100 feet) over a residential area. The pilot was observed to be in a state of panic and was unable to maintain control of the aircraft. The aircraft struck a building, causing significant damage and resulting in the death of several people.	
9. The aircraft was flying at a low altitude (approximately 100 feet) over a residential area. The pilot was observed to be in a state of panic and was unable to maintain control of the aircraft. The aircraft struck a building, causing significant damage and resulting in the death of several people.	
10. The aircraft was flying at a low altitude (approximately 100 feet) over a residential area. The pilot was observed to be in a state of panic and was unable to maintain control of the aircraft. The aircraft struck a building, causing significant damage and resulting in the death of several people.	

02 While securing the line up for purging the drywell, CAC-V10 would not shut. This

03 | valve is in the vent line for the drywell and is in series with another isolation

04 | valve, CAC-V9, which was operable.

05 | Technical Specifications 3.6.3, 6.9.1.9b
